## PREFACE.

THERE never was a time in the history of civilized man, when the desire of truth for its own sake was more evident in all departments of intellectual activity than it is at the present day. And this desire does not seem to be hindered, much less arrested, by the pressure of practical business, which has developed beyond all bounds in the modern world; nor even by that determined pursuit of the prizes of life which is so marked a characteristic of the times in which we live. Nobody, not even the professed pleasure-seeker, is any longer satisfied with the mere allegation of authority in matters of belief. Everybody who reflects at all, and many a one who does nothing worthy of the name of reflection, demands the reason of things propounded for his assent and acceptance. An impatience of mere assertion, an irreconcileable discontent with traditional statements and formulas, is the very atmosphere of our generation. Men want to justify their beliefs, as well as to be justified by them.

Like all other sciences, history has undergone a complete revolution in our day. Masters of style, no doubt, occasionally produce brilliant romances which they dignify as "histories"; but the public is too sensitive to the importance of facts to be long misled by the superficial charm of style. Novelty, eloquence, imagination, count for little or nothing, when the demand is for truth and correspondence with reality. And however passionately some may desire that it might not be so, Sacred History-the history of religious institutions, ideas, literatures, in connexion with that of the
peoples among whom they originated-is so far from being exempt from the influence of these modern demands and tendencies, that it is precisely in this field of inquiry that men are most anxious to bring their opinions into harmony with fact.

The present work is the fruit of an honest endeavour to furnish Bible students who are not versed in the languages of the ancient East, with some of the chief results of recent Oriental research and discovery, so far as these are calculated to throw light on the text and meaning of Scripture. I have not approached my subject, nor handled my material, after the fashion of a professional Apologist. It has not been my direct aim to "confirm the Scriptures" by showing that they are in absolute agreement with all the available contemporary evidence. I do not believe that the Hebrew Scriptures stand in need of either apology or confirmation. My purpose has rather been to lead my readers to the right point of view for understanding them. At the same time, the documents here brought forward afford ample proof of the general trustworthiness of Israelitish history, so far as it is the work of writers who lived in or near to the times which they describe. And even when that is not the case, Hebrew tradition gains a relative justification, sufficient to satisfy all reasonable minds, by the demonstration that it is not due to the idle imaginings of ignorant and prejudiced priests and popular story-tellers; a demonstration which is effected by tracing it to its origin in more ancient Semitic legend, or by comparing it with the parallel accounts of the older and more or less kindred races. I might enlarge on this theme; but a glance at the Table of Contents or at the Index of Subjects will do more than pages of introduction towards enabling the reader to form a conception of the range and variety of interesting and relevant matters which are discussed with more or less completeness in this volume, from the "Babylonian Epic of Creation" to those few but
important Phœnician inscriptions which offer so many striking parallels to the religious ideas and practices of ancient Israel. I sincerely envy those readers to whom these illustrations of the Bible, derived from earlier and contemporary sources, will come invested with all the charm of the novel and the unexpected. They will find the sacred writings with which they are familiar acquiring fresh force, significance, and value, by comparison and contrast with the literary remains and monumental records of the great empires and peoples which so powerfully affected the fortunes of Israel. Their Old Testament will become to them a new Testament in the light of Oriental Archæology.

It is hoped that the number of cuneiform and other texts with translations, and the accurate reproductions of hundreds of Babylonian, Egyptian, Assyrian, North Syrian, and Phœnician antiquities, here brought together for the first time within the compass of a handy volume, may recommend the book to scholars and teachers as well as to the intelligent student of our English Bible.

To my old and valued friend, Mr. W. H. Rylands, F.S.A., my warmest acknowledgments are due for the untiring interest he has taken in the progress of the work, and for the material assistance he has given in connexion with its pictorial illustration.

## Babylonian Epic of Creation.

The Assyrian Creation Tablets were found by the late George Smith at Kuyunjik, on the site of the ancient Nineveh, in a chamber of the ruined palace of Assur-bani-pal, king of Assyria, b.c. 668626. Their contents, however, are not of Assyrian origin, the tablets having been copied from Babylonian originals for Assur-bani-pal's library (sec page 200). As duplicate copies of portions of them have been found in the ruined temples of

 Borsippa and Sippara, We may reasonably suppose the composition of the series to be at least as early as the great literary period ber. z200-1800, when the Deluge and other stories seem to have been lirst commited to writing.

There appear to have been seven tablets in the series, but very little is left of several of them. The following is a translation of the principal fragments (cf. Professor Delitzsch's recent German edition) :-

## TABLET I.

The Birth of the Gods from Apsû and Tiâmat (Ocean and the
Deep), before the Creation of Heaven and Earth-Tiâmat
Plots to Destroy her Divine Offspring-Some of the Gods
Rally to her Side-She Prepares for the Conflict by
Creating Eleven Kinds of Monsters of the Deep, and
Appointing Kingu Leader of her Host.
Cf. Gen. 1. 6, 8. When aloft Heaven existed not,
Gen. 1.9, 10. When Earth below had yet no being ; But eldest Ocean, the Sower of them (i.e. of the gods),
Gen. 1. 2. And the dark (?)* Deep, who was to bear them all,-
5
The waters of these mingled in union, and
No fields $\dagger$ were embanked, no islands (or marshes) were seen ;
When the gods had not come forth, not one,
When they neither had being, nor [settled] destinies :
Then were born the [cldest] gods-
io Lachmu $\ddagger$ andl Lachamu came forth [together].
The ages multiplied . . . . . .
Gen. 2. 1. Anshar § [and] Kishar were born [together ?] Long time they lived
Anu
15 Anshar [and] Anu
From this point, l. I5 to 1 . II5, only a few half-lines are preserved. But in l. 38 sqq. Apsê and Tî̂mat appear as taking counsel together against the great gods, their offspring. Aps $\hat{\mathrm{U}}$ declares " Their way shall

[^1]

THE BROOI) OF TIAMMAT.
[From a Hronze Dish discovered at Ninevah.]
be destroyed," and "A cry of woe shall be made"; while Tiamat says (1. 50) " Let their way be made hard" or "painful!" Then 1. 55 sq. we read :-

> Occan [rejoiccll] at her ; his face became bright: Evil they plotted against the [great] gods.

Although the lines which related the grounds of 「IAMAT's enmity against the great gods are unhappily lost, it was evidently founded on a foreboding that they were destined to supplant their parents and dethrone them from the position of sole supremacy; just as the elder gods of the Greek mythology are dethroned by their own mightier progeny. The old mythmakers perceived that the new world is but the old one under new forms. They suggest the intimate connexion between the successive states of existence by the very natural metaphor of generation. On the other hand, the changes incident to the evolution of the Cosmos are symbolised by the strife which arises in the family of the gods. Variation is figured by variance, differentiation by difference; and the process of creation becomes a warfare of elemental powers. Apsô and Tiâmat with their divine following are opposed to their kindred Lachmu and Lachamu, Anshar and Kishar, Anu, Bel and Ia, Ia's son Merodach, the god of light, Bil-gi or Gi-bil, the god of fire, and the Igigi or spirits of heaven.

After the great gap between lines 56 and 106 the narrative, as restored from Tablets II. and III., continues thus:106 All the gods (i.e. of her party) turned unto her;

Cf. Rey. 12. 3-9. They cut themselves off (?), and to Tiâmat's side went over. They sulk, they plot restlessly, night and day.
Challenging conflict, they chafe, they rage ; ifo They muster and prepare battle.

The Mother of the Depth, the Maker of All,
Cf. Gen. 1. 21. Added matchless instraments, bringing forth monster-snakes :
Heb. tannînîm. Sharpfanged were they, unsparing of attack ; With venom for blood their body she filled.
II5 Raging pythons with terrors she clothed;
With awful brightness she robed them, overwhelming from above :
"Whoso seeth them, let trembling overcome him!
Let their bodies rear up, and none repel their breasts !"
She posted vipers, basilisks, and dragons ;
120 Giant asps,* furious hounds, scorpion-men;
Fierce white-snakes,* fish-men, and chimacras ;

[^2]Bearing ruthless weapons, fearless of battle :
Strict were her orders, not to be gainsaid.
Mighty the cleven (kinds of monsters) as a stom (?) she made.
125 Among the gods her firstborn who made her a muster,
She exalted Kingu in their midst-him she made great :
'The leading of the van, the command of all,
The first lifting of weapons, the stirring up of the fray, Mastcry in conflict, winning of victory,
130 She entrusted to his hand, she seated him on a cushion.
"I have uttered a spell for thee, in the assembly of the gods I have magnified thee,
The rule of all the gods have I delivered unto thee!
Thou shalt be great, thou, my sole (or chosen) spouse!
Let them magnify thy name over all regions !"
135 She gave him the Tablets of Destiny, she put them in his bosom :
" Thy word be not made void, that which goeth forth from thy mouth be established!"
Cf. Isa. 14. 13. When Kingu was exalted, having received godhead (or supremacy),
Among the gods her children he gave decrees:
" Make up your mouth, let it still the Fire-god !
I40 The highest in valour shall become great in power !"

## TABLET II.

## Tiâmat's Doings are Reported to Anshar-He Sends Anu first, and then Ia (Nudimmud), to Appease her, but both Return without Success-Anshar then Applies to Merodach, who Undertakes to Quell Tiâmat, on the Condition that the Gods Recognize him as their Lord.

The opening lines are lost. They probably repeated the account of the creation of the monsters by Tî̂mat (Tab. I. ifi-i22), though in what precise connexion is not clear. Then followed, as before, the story of Kingu's exaltation (Tab. I. I25-I40). It is not necessary to exhibit here the more than Homeric repetitions of the Babylonian epic. It would seem that some messenger has reported to Anshar these doings of Tiâmat, whereupon

27 [Of Anshar the soul] was mightily troubled ;
[His loins he smote and his li]p he bit ;
. . . . . . his mind was agitated :
30 . . . . . . he uttered a painful cry.

After a considerable gap in the narrative, we find Anshar bidding his son And undertake the reduction of TiÀmat:-

$$
\begin{aligned}
& 66 \text { [To Anu] his son [a word] he speaks: } \\
& \text { ". . . . . . . . . mighty one, champion, } \\
& \text { Whose powers are great, whose onset resistless ! . } \\
& \text { [Go,] and before Tiâmat take thy stand; } \\
& 70 \text { Let her temper [loc soothed,] her leart relieved! } \\
& \text { [If she be stubborn and] hearken not to thy speech, } \\
& \text { Address her with [a spell,] and she will be appeased !" } \\
& \text { [Anu heard] the words of his father Anshar, } \\
& \text { [Took the straight ro]ad to her, and followed the way to her. } \\
& 75 \text { Anu [went,] the grinning (?) of Tianmat he saw ; } \\
& \text { [Anu was dismayed and] turned ljack again. }
\end{aligned}
$$

And returns to his father Anshar, and tells him how he has sped; but his words are lost. There is a complete gap of 24 lines, and only the closing syllables of the next twenty-five are preserved; but it is inferred from Tab. III. 54 that Anshar next applied to the god Nudimmud (Ia) with like ill success. Then this very fragmentary Tablet closes with a reply of Merodach to his "father," i.e., grandfather, Anshar, who seems to have tempted him to the perilous enterprise with offers of high distinction.
[Merodach heard] the speech of his father;
130 His heart [ex]ulted, and to his father he saith:
"Lord (?) of the gods, Arbiter of the great gods !
If I, as your avenger,
Quell Tiâmat and preserve your lives,
Hold the assembly, declare my lot supreme!
J35 in Ub-shu-ukkin * all together joyfully take your seats;
Framing my mouth, instead of you, I will pronounce dooms!
Whatever I do, let it not be changed ;
Let the word of my lip return not, nor be made void !"

Story of Tiâmat's Plot, and to Propose a Banquet of the Gods, at which they shall be Induced to Resign their Prerogatives to Merodach - The Banquet is Held, and Succeeds.
[Anshar] his [mouth] made up, and [To Gaga] his [minister] a word he speaks: " [Go, Gaga, minis]ter that gladdeneth my soul!
[To Lachmu and Lach]amu will I send thee.
5
. . . . . . . . let the gods, all together,
[Ply the tongue,] sit at the banquet,
[Eat bread,] prepare sesame-wine,
io [To Merodach,] their [aven]ger, decree the lot!
[Go, Gaga,] stand before them, and
[All that l sa]y to thee, rehearse to them as followeth :
Anshar, your son, hath sent me;
He hath made me apprehend his will as followeth :
15 Tiâmat, our parent, hateth us;
She hath made a muster, and raged wrathfully;
All the gods (i.e. of her party) turned unto her;
With those whom ye created, to her side they are gone."

The next thirty-four lines, relating the creation of the eleven kinds of monsters and the exaltation of Kingu, are identical with Tab. I. Io6-r 40 . Anshar then continues his message in these terms:

FRAGMENT OI THE THIRD TABLET.
"I sent Anm ; he durst not encoumter her ; Nudimmud was dismayed, and turned back again. 55 Merodach came forward, the Sage of the grods, your son ; To encounter Tiâmat his heat urged him to set forward.

Framing his mouth, he saith to me :
If I, as your avenger,
Quell Tiâmat and prescrve your lives,
60 Hold the Assembly, declate my lot supreme :
In UB-SHU-UKKIN all together joyfully take your seats, and
Framing my mouth, instcad of you, I will pronounce dooms!
Whatever I do, let it not be changed ;
Let the word of my lip return not, nor be made void !
65 Make haste! your prerogative quickly assign him !
Let him go to encounter your strong enemy!"
Gaga went, pursued his way, and
Reverently to Lachmu and Lachamu, the gods his parents, Did obeisance, and kissed the ground beneath them;
70 He fell down, rose, and spake to them:
"Anshar, your son, hath sent me ; "
Etc., etc., repeating word for word the message of Anshar ( 52 lines). The poem then continues (l. 125) :-

I25 Lachmu (and) Lachamu heard, they started up (izzizu? ?) ;
The lgigi, all of them, lamented grievously :
"What is altered, so that they have taken offence (?) ?
We know not, we, Tiâmat's purpose (?)."
They crowded together and went -
130 The great gods, all of them, the arbiters of destiny-
They went in before Anshar, they filled [the hall ?] :
They jostled one another in the assembly
They plied the tongue, they [sate] at the banquet ;
Bread they ate, they prepared the [sesame-wine].
135 'The sweet liquor altered their [sense];
They were drunken with drinking, swollen in body;
Greatly bewildered, their [cry ?] went up;
To Merodach, their avenger, they assigned their prerogatives.

## TABLET V.

## Creation of the Heavenly Bodies-Institution of the <br> Year and its Divisions.

There is no break between the Fourth and Fifth Tablets. The latter tells of the creation of the stars as the "stations" or posts of " the great gods"; the institution of the year with its twelve months, each in connexion with three presiding stars (of the Zodiac ; see Diodorus Siculus, 2. 30) ; the arrangements made for preventing any star from wandering from its appointed place (cf. Jude 6, 13; Isa. 24. 21 sqq.; to. 26) ; and the making of the moon, and assignment of its functions of distinguishing

[^5]days and revealing the nightly heavens. The Tablet thus corresponds, with striking differences, to the account of the Fourth Day's Work, Gen. I. 14-Ig.

He formed a station for the great gods;
Stars like unto themselves, the $L u$-mashi,* he stationed [there].
He appointed the year, dividing it into seasons;
The twelve months-three stars for each he stationed,
5
Reverse, 6-8. He founded fast the station of Nibiru, to show their boundary ;
That none (i.e. of these stars) might do wrong nor go astray.
The station of Bel and Ia he established with him.
Then opened he great doors (i.e. in heaven) on both sides ;
to The barrier he made strong to left and right.

## [One line omitted.]

Nannarat he made shine forth, made him overseer of night ;
He appointed him, a being of night, to determine days:
" Every month unfailingly with crescent-crown make division (?) !
15 At the beginning of the month, and $\qquad$
Horns thou shootest forth to reveal the heavens.
Cf Gen. 2. 2. On the seventh day . . . the crescent-crown;
On the fourteenth ."

The remaining lines are too broken and too difficult for connected translation. What else the Tablet related, after the account of the celestial arrangements, we do not know. Zimmern supposes that it went on to tell of the creation of dry land and sea, and perhaps also of vegetation. Delitzsch gives a fragment, which may have belonged to the Fifth Tablet, and which seems to say that Anu exhibited the net and the bow of the victor Merodach to the assembled gods; after which the bow was placed in the sky (cf. Gen. 9. 13).

## TABLET VI.

There are no certain, but some possible, remains of Tablet VI. The sole exception is the latter half of the first line, which is quoted as catchword of the next Tablet at the close of Tablet V. (. . . . . . . . of the gods when he heard). An interesting fragment, published in Delitzsch's Lesestücke, may perhaps have belonged to another cycle of Creation Legends. Gunkel and Zimmern give it very doubtfully as the Seventh Tablet of the present series, adding in a note that the attribution is highly precarious. Delitzsch declares that both the form and the contents of the fragment prove that it does not belong to our Epic. It may be thus translated:-

Gen. 1. 7, 8; 26, When the gods in their assembly (or in a body) had created Let us make. [heaven ?], and
Gen. 1.14-16. Had fomed the firm (?) constellations
They caused [all] the living creatures to come forth,-
Gen. 1. 24, 25. The cattle of the field, the [wild beasts] of the field, and the creeping things [of the field].
. . . . . . to the living creatures . . . . . .
. . . . . . . and with creeping (i.e. moving) things the city they fill[ed]
". . . . . . all the moving things, the whole of the creatures which in my entire family [are seen ?]
."
Gen. 1. 27, 28. [Then made] Nin-1GI-AZAG (i.e. Ia) two litt[le]
[Among the wh]ole of the moving things he made (them) mighty.

The last two lines perhaps refer to the creation of the first human pair, so that their broken state is particularly tantalising. On this subject, as indeed on that of Creation in general, the Babylonians appear to have possessed various mythical accounts; but in what is probably the closing Tablet of the present series the creation of man is distinctly ascribed to Ia's son Merodach.

Delitzsch, who thinks that the Sixth Tablet must have treated of the creation of the earth, of the gathering together of the waters of Ocean ( $A p s i u)$ and the formation of the dry land, of the clothing of the ground with plants and trees (cf. Gen. I. 9-12), and of making the water, air, and
earth alive with all sorts of animals (cf. (Gen. I. 20-25), has transcribed the scanty but precious remains of a much-injured fragment, which may have belonged to 「rablet VI., or at least to the series. It mentions the naqbu, the hole or well, i.c. the abyss of the w'aters under the earth (cf. Gen. 49. 25 ; Exod. 20.4) ; and the nachivé, or larger marine animals, such as seals and porpoises; after which it states that the Creator " heaped up" something, probably a dyke or barrier against the seat (cf. Job 38. 8-II). The next line mentions the "springs" (namba'ê), perhaps " the springs of the sea" (Job 38. I6). On the reverse side we read :-

Anshar making up his mouth speaketh, unto L[achmu he saith]:
25 "Above Ocean, [Nudimmud's] dwelling,
Over against Isharra which I builded . .
The places below [I] made fast (or solid)
I will make a house; it shall be the dwelling of . . .
Within it let him firmly found his hold ! . . ."

There can be little doubt that the founding of the earth " upon the seas" (Ps. 24. 2; 2 Pet. 3. 5) and facing heaven (Isharra), to be the home of man and the seat of his protecting deities, was the subject of these broken and partially obscure verses ( $c f$. the last six lines of Tablet IV.). The " house," which is to be the dwelling-place of some god, or, perhaps, of mankind, may denote the ground or dry land itself, just as heaven is called a "great house" (IV. I44 sq.).-The tablet goes on to mention the institution of holy days (nubatta; cf. Gen. 2. 3), the " houses" or temples " of the great gods," and even the ancient cities of Nippur and Ashshur, which are thus made coeval with creation. The service of the gods in their chosen cities and sanctuaries appears to have been regarded as the ultimate reason for the origin of man and his world. In the Book of Genesis also, the building of cities (4. 17) and the formal worship of Jehovah (4. 26) begin soon after creation, in the lifetime of the first man. Quite naturally, therefore, a broken tablet of precepts concerning man's duties towards the gods and his fellows may be supposed to have followed next in the series, as the continuation or conclusion of Tablet VI.

Reverse, line II. Daily thy god thou shalt worship
With offering, word of mouth, clue of [in]cense.
Towards thy god thou shalt have purity of heart:
That is the due of godhead.
If Prayer, supplication, and a humble countenance,
Early shalt thou present unto Him

And earnestly shalt thou direct (thine) hands. In thy skill peruse the tablet (i.c. search the Scriptures).

Fear (i.e. of God) begetteth grace, 20 And offering [in]creaseth life, And prayer [loo]seth sin.
He that feareth the gods shall not call [in vain] ;
He that feareth the Anunnaki shall prolong [his days].
With friend or companion say nothing [amiss];
25 Say not low things, [say] what is good.
If thou promise, give, [withhold] not.
It is deplorable that a document, so deeply interesting from the point of view of universal morality, should have suffered so much in transmission. But enough remains to prove, if other proof were wanting, that religion and morality were bound up together in the consciousness of the old Semitic population of Assyria and Babylonia, and in that of the Sumerians before them.

## TABLET VII. (?)

". And God sawe everything that He had made, and, behold, it was very good." -Gen. I. 3 I.

What is generally assumed to be the closing Tablet of this Epic of Creation, though not free from serious fractures on both sides, especially at the beginning and the end, is upon the whole better preserved than most of those which precede it. The subject is the acclamations with which Merodach was greeted by the assembly of the gods (cf. Job 38.7; Isa. 14. 13), after his conquest of Tî̀mat and subsequent creative labours. He is hailed by all his titles of honour, and men are repeatedly called upon to remember his mighty works and to glorify him. ## Another Babylonian Account of the Creation.

The Book of Genesis, as is well known, opens with two distinct and apparently independent accounts of the Creation (I. 1-2. $4 \boldsymbol{a}$ and 2. $4^{b-25}$ ). It is, therefore, a fact of the highest interest that the Babylonians also possessed two accounts, differing so greatly from each other as the two before us. This second Babylonian Cosmogony, brief and bald as it is in comparison with the one already considered, yet presents many points of contact with both of the Biblical narratives. It occupies a small but clearly-written terra-cotta tablet, which was unearthed by Mr. Rassam at Abú Habbah (Sippara) in 1882 . Its comparative antiquity is suggested by the bald brevity and artless monotony of the style; by the fact that it is bilingual, being written in Sumerian, the primitive speech of Shinar (Shumer) or Southern Babylonia, with the addition of a Semitic Babylonian translation inserted in smaller characters between the halves of the Sumerian lines; and by the further fact that it is preserved as a sort of hymn prescribed for recitation in the ritual of some special service, apparently held in the temple of E-Zidda at Borsippa, as indicated by the remains of the inscription on the reverse side of the tablet.

It will be noticed that the founding of the primeval holy cities of Nippur (Niffer), Erech (Warka), Eridu (....), and Babylon (Bâbil), with their respective temples, is put in the forefront of this ancient mythical poem. The sanctuaries and service of the gods are the final purpose

[^9]of Merodach's creative activity. Nippur was the sacred city of Illil or Bel, the father of the gods and lord of the habitable world; Erech of Anu, the god of heaven; Eridu of Ai or Ia , the god of deep wisdom, who dwelt in the abyss of waters under the earth; and Babylon of Ia's son Merodach, the creative and life-giving god. The goddess Aruru, who, according to the piece before us, assists Merodach in the creation of man, is elsewhere called Lady of the gods of Sippar and Aruru, and appears to have been the local deity of a town Aruru, which, like the town of Agadè, or Accad, became in the course of time a mere suburb of Sippara. In the Epic of Nimrod (VIII. 34) she creates Ia-bânî, the satyr-like com-

SEAL OF A PRIEST OR SCRIBE, Who calls himself arad abinut shamshi, "the panion of Gilgamesh, by nipping off a bit of clay and moulding it (cf. Gen. 2. 7; Job 33. 6; Isa. 64. 8). The obscure statement, l. 2I, that Aruru made seed (or the seed) of mankind "along with" Merodach, or with his help and cooperation, reminds us of the no less obscure exclamation of Exe, "I have formed a man along with Jehovah,'" Gen. 4. I (Assyr. itti = Heb. 'ēth).

The poem seems to open rather abruptly, unless we suppose that "the pure house, the house of the gods" (ll. 1, 9), may denote the inhabited world as known at the time of its composition-that is to say, Babylonia, or the valley of the Euphrates and Tigris (see the Ancient Map, page 23). Compare 1. 1o. But possibly the reference is to Eridu, the earliest and holiest city of Shinar, whose site was on the coast of the Persian Gulf at the mouth of the Four Rivers, and perhaps on an island close to the shore. Eridu, the earthly Paradise, might well be called preeminently the pure or holy house or home of the gods. It is the first thing made when there is an " off-flow," "outflow," or ebb of the sea from the site of it (ll. II, i2). E-SaG-ILla, House of the High Head (or top), is Ia's temple there, as E-Sag-illa at Babylon is the temple of his son Merodach; and the name recalls the tower whose top was to reach " unto heaven" (Gen. II. 4).

Lines 17, 18 may relate the origin of the reedy marshes at the southern extremity of Babylonia, though some think that they describe the creation of the dry land.

The word rendered "animals," l. 5, is of the greatest interest to the Biblical student. The Sumerian A-dam is literally "side-spouse,"
and seems, therefore, to denote all creatures which exist in pairs, or as male and female; so that it may be used of the entire animal creation, both brute and human. The meaning of the Sumerian term thus explains the story of the origin of woman (Gen. 2. 21 sq.), and accounts for the curious expression, "called their name Adam" (Gen. 5. 2). [The Assyrian equivalent, namǎ̌̌úu, seems to mean things that move or creep about, being derived from a root, namâsul, which looks like a cognate form of the Hebrew ramas, to creep (Gen. r. 21 sqq.). I read the verb in the Assyrian version of 1.5 as našsu $=$ nanšu = nams $u$ ].

# Ancient Babylonian Map of the World. 

(7th or 8th cent. B.c.)

This unique document is a tablet of dark-brown clay, unhappily very much injured. The two large concentric circles represent the Oceanstream, which, according to the ideas of antiquity, surrounded the earth (see Homer and Hesiod. Herodotus was the first to doubt the theory:
ii. 23). The cuneiform writing between these circles reads: NÂR Marratim, "The Bitter (or Briny) Flood."

Each of the triangular projections from the outer circle, of which there seem to have been seven when the tablet was intact, is vaguely marked as a " district" or "region" (Haupt: "island") ; and on the left side of each, an inscription specifies its exact distance (from the nearer shore, or from Babylonia ?). The inscription to the left of the great hole on the top of the outer circle, where one of these triangular projections once existed, reads: v (?) Kas-bu ina birit, "Five kas-bu (i.e. six hours) between"; with the strange addition, ashar DINGIR BABAR NU SHI. LAL (-: shamshu la innamar), "where the sun is not seen," which reminds us of Homer's Cimmerians (Odyss. II. I4).

The two parallel lines, which run across the ground of the inner circle, represent the river Euphrates, and the little rings on each side are the cities of the territory through which it flows. At the top of the right
(i.c. on the left bank of the river), the word shadû, "east," is written. The Euphrates cuts through the great city of inin. Tir. ki, i.c. Babylon, the larger part of which lies on its left or eastern bank. Below, in the south, the river enters the APPARU or " marshes."

## Babylonian and Assyrian Seals.

Heronotus states that in his day every Babylonian wore a seal (i. 195). This, no doubt, had been the case from time immemorial. And probably no better illustrations of the religious beliefs and ritual of the Old Babylonians and Assyrians are to be found than those afforded by the subjects engraved on the extant cylinder-seals or signets, obscure as many of these remain, owing to our still imperfect acquaintance with the corresponding literature. Statues and sculptures of the oldest period are rare; but we possess a considerable number of these smaller but not less precious relics of the distant past, many of which are as old as the times of Sargon of

Accad, Ur-ba'u and

CYLINDER WITH GISHTUBARRA AND THE LION. Dun-gi of Erech, Gudea of Lagash, and Hammurabi or Amraphel of Shinar (Gen. 14). The specimens given in this work, some of which are published for the first time, range in date from about в.c. 4500 to the close of the Assyrian monarchy (7th cent. в.c.). The usual shape of such seals is that of a small roller or cylinder, pierced lengthways, and sometimes fitted with a swivel for use. The names of the owners, of their fathers, their gods, and their cities, are sometimes added in the old linear character. (The impressions, as rolled out on wax, are reproduced here.)

The subjects represented are usually those which meet us again on the sculptured walls of temples and palaces. The most prominent among them are scenes from the Epic of Nimrod, which celebrates the exploits of Gishtubarra or Gilgamesh (Nimrod) and his friend Ia-bânî. Ia-bânî is a mythical hero, with human head and bust, but with the horns, ears, and hind-quarters of a bull; and this strange pair may be regarded as the remote archetypes of the better known Herakles and Cheiron or Theseus (see page 25, No. IV.). Another frepuent subject, variously modified, is

No. 1.-SUPPOSED SCENE OF THE TEMPTATION.

No. IV.-EPISODES IN TIIE IEPC OF NIMROH
prayer and sacrifice. As a rule, the gods have the human form: composite figures are confined to subordinate spirits, demigods, cherubic beings, and demons. In this latter respect, the religion of Mesopotamia presents a striking contrast to that of Egypt.

Sometimes, though rarely, the scene is either a human sacrifice, as Menant was the first to suggest, or at least a ceremonial symbolically imitating such a rite (page $\mathbf{I}_{52}$, No. III.). Other seals of similar style appear to represent scenes of initiation in religious mysteries, like those of Eleusis or of the Mithraic worship (page 27, No. VI.).

In some archaic specimens, we seem to see the very beginnings of the art of seal-engraving. The small chalcedony cylinder figured on page 27, No. V., shows a sacrificial scene of very primitive execution, in which limbs are indicated by straight lines, joints by round holes (cf. also pages 10 , and 25 , No. II.). The progress from these rude outlines to the masterly handling of animal forms, exhibited by seals as old as the time of Sargon I., B.c. 3800, is very remarkable (sec page 45, No. 2). No later Babylonian or Assyrian work can be compared with these masterpieces of the early Chaldean kingdoms for breadth and freedom of treatment and truth to nature.

Assyrian seals are less common than Babylonian (sec pages II, 3I). They are usually made of harder and finer materials, such as onyx and chalcedony. The flounced robe and the cap curving upward in horn-like projections (pages 15, 57), so characteristic of early Babylonian cylinders, are wanting to them. When inscribed, it is in the Assyrian cuneiform ; and their subjects are the sacred tree, the winged solar disk, the eagle-headed cherub, and other religious types familiar in the Assyrian sculptures.

In No. I. we have the famous scene of the palm-tree with pendent fruit, towards which two seated figures are each stretching out a hand, while a serpent stands erect behind one of them. George Smith supposed that this might represent the Temptation (Gen. 3), noting, however, that " the two figures seem both to be males" (Chaidean Gencsis). Others since have taken the fact for granted, but it is very doubtful ; compare No. II., a seal in my own collection, where we see a god or gooldess with a stellar symbol before the statue, a priest or king worshipping, and behind him an erect serpent and a naked woman. (Possibly the scene may be explatined by the custom mentioned by Herodotus (i. i 8 a sq.), and the maked female may be Bel's chosen bride. On the other hand, she may be a goddess; as the serpent denotes goddesses in ligyptian hieroglyphs.) In No. III. two
women are gathering dates, and apparently presenting them to a third figure (perhaps a deity, as the crescent moon is seen before it). In the right-hand corner is a cartouche with the name TA-TA.

No. IV. Seems to represent Gishdubar (Nimrod) and his friend Ia-bânî in conflict with the lion and the bull; and, on the other side of the defaced insctiption, the capture of Ia-bânî (episodes in the Epic of Nimrod).

No. VI., a seal of green jasper in my possession, bears the name of its owner in archaic (linear) characters, viz.:-

GISH . TUC; . PI . Ul) . A . RA<br>URU . MU . SA . (or LIG ?),

which in Semitic Babylonian may be read :-

## migir Pir-Nunna <br> Ala-mukîsh.

"Ala-mukish, the favourite of (the god ?) Pir-Nunna."
It seems to exhibit a religious rite, perhaps a human sacrifice, or a ceremony of initiation.

No. VII. is noticeable for the animal-form, probably representing a demigod or demon.

## Assyrian Sacred Trees with Cherubic Figures.

The sacred tree is common to almost all ancient religions. It is found among the Arabs, Phœenicians, Canaanites, Jews (cf. the groves, or rather Asherahs, I Kings 14. 23; 2 Kings 17. 10) ; among the Hindoos, the Persians, and the Scandinavians. It is therefore natural to find apparent traces of it in the sculptures of Assyria and Babylonia. It appears to have been most prevalent in Assyria during the Middle Empire, b.c. goo721 ; and the representations are found at Nimrîd (Calah, Gen. Io. II), and Khorsâblâd (Dûr-Shargâni, i.c. "Sargon's Castle"), but not at Nineyeh.

According to an old bilingual Babylonian hymn in praise of the god Ea or Ia (4 R. ${ }_{5}, 5^{2 b}$, sqq.),
"In Eri-du a dark gis/h-kin tree grew, On holy ground it sprang up :
Its appearance was that of gleaming lapis lazuli, Lying in the deep" (i.e. seen under water).

MALE CHERUBIC FIGURES, KNEELING BEFORE A SACREI TREE.

The rest of the hymn refers to the god, not to the tree as my friend Prof. Sayce supposed (Hibbert Lectures, 1887 , page 238 ). It may be rendered thus:
"Ia's way * in Eridu is frathght with abundance ;
His abode is the sanctuary of the earth ;
His resting-place is the bed of the goddess Bau;
Into the (his) pure House, whose shade spreads abroad like that of a forest,into it none may enter."

The two remaining lines are too defaced for translation.
The Gishkin was, perhaps, a kind of palm (Chinese k'inng, kwang ?), or a conifer (Chinese k'icn?). Black, white, and grey species are mentioned elsewhere. Eri-du, "Good City," being the principal seat of the worship of Ia, the tree was perhaps sacred as giving oracles by the motion or rustling of its leaves; like the oaks of Dodona, the laurel of Delos (Virgil Æn. 3. 91), and that of Delphi (Hymn to Apollo, 390) ; cf. 2 Sam. 5. 24. The "Teacher's Oak" or "Terebinth" (A.V. plain of Moreh), Gen. 12. 6; "The Oak of the Diviners" (A.V. plain of Meonenim), Judg. 9. 37 ; perhaps also Deborah's Palm, and even the Burning Bush, may reflect the same order of ancient ideas. The Arabs still believe the thorny bushes of the gharqad or box-thorn (a large species of Rham$n u s$ ), capable of uttering prophetic words, and regard the samūra, or Egyptian thorn, as sacred.

The trees before us are con-

COMPOSITE CHERUBIC FIGURES AND SACRED TREE. ventional representations of the palm. On the settlement of the Babylonians in the Plain of Shinar, or South Chaldea (Gen. II. 2), they probably found the Plain covered with palms. The character for palm, which was read both gi-shimmar, "shimnnar tree," and shanga, "pure," "holy," suggests that the name Shangar (Shinar), Shumir, may mean either Palm country or Holy Land. (f. Deut. 3+ 3. According to an Arab proverb, the palm has a hundred uses beneficial to man ; and, as regards Babylonia, the inscriptions prove that at an early period it supplied food, both for men and cattle, wood for building, fibre, and many other useful products, whilst its dates yielded wine. The palm was sacred to the pre-Islamic goddess Athtar (i.c. Ishtar or Ashtoreth) among the Arabs, as also among the Phœnicians.

The kind of tree is indicated by the palm buds at the termination of each branch, the "palmettes," which passed into Greek art in the form of the "honeysuckle" ornament.

Female (or Youthful) Cherubic Figures, standing before a Sacred Tree.- In this illustration the symbol held in the hand of each figure perhaps indicates the sex. The tree is, as usual, conventionally treated, and may represent a grove of palms rather than a single tree. The uplifted hand suggests blessing.

All the illustrations are taken from Assyrian sculptured slabs now in the British Museum.

AN ASSYRIAN WINGED HUMAN-HEADLED LION, REPRESENTING A GUARDIAN GENIUS OR SPIRIT.

## Assyrian Cherubic Figures.

Guardians of Gates and Doorways.-Guardian Genii were not unknown to the Assyrians and Babylonians, although the designation Cherubim has not yet been found in the inscriptions. It is, however, probably akin to the Assyrian term karūbī, "the mighty" (cf. Ps. 29. 1). At the doors of the royal palaces and temples were placed winged humanheaded lions and bulls, as also huge serpents. These strange composite figures were known by the name of $s h \bar{e} d \bar{\imath}(=$ Heb. shēdîm, Deut. 32. 17, A.V. devils), and lamassi , and were placed at the entrance to public buildings to protect the royal pathway and to repel enemies. So
Gen. 3. 24. the Cherubim guard the way to the Tree of Life. Cf. also the two Cherubim overshadowing the Ark, Exod. 25. 18; which were probably winged human figures like those which we see performing similar functions in Egyptian paintings. In Ps. i8. ıo; 104. 3, a cherub appears as Jehovah's steed or chariot; i.c. the stormcloud borne onward by the blast. The Cherubim of Ezekiel's vision (Ezek. I and ro) seem to combine the principal Assyrian forms in one.

The Scorpion Men.-On this small Assyrian seal, a flaming incense burner stands between the winged human-headed figures, whose composite bodies end in a scorpion's tail curled back ready to sting. Above them is the winged solar disk.

These figures are supposed to represent the "Scorpion Men" described in the Babylonian Epic of Nimrod. There, the scorpionman and his wife keep the gate of the mountain Māshu, which had to be passed to reach the Abode of the Blessed (cf. Gen.
 3. 24).

[^11]Eagle-headed Cherubic Figure.-The eagle-headed figures of the Assyrian sculptures have been by many considered to be representations of the god Nisroch ( 2 Kings 19. 37) ; but for this identification there is no ground whatever. No such name as Nisroch is known in the inscriptions; and the most tenable explanation is that Nisroch is a textual error, not for Nergal, as some have supposed, because there was a temple of Nergal at Nineyeh, but for the well-known Assyrio-Babylonian deity Nusku or Nusku rê'u," The Shepherd Nusku," a title of Ninib. (See Halévy, fournal Asiatique, 1879, page 387.)

The monuments afford us some explanation of what the eagle-headed creatures represented. The Babylonians believed that before the creation of man the world was occupied by a number of composite beings, half men and half animals; and among these, we are told in the so-called Creation Tablet of Cutha, were-
"warriors with bodies of birds of the mountain gorges, men with the faces of birds of the desert."

Like other cherubic figures in the sculptures, this one also holds a basket and a palm-spathe (in the act of fertilizing a palm-tree; a process often represented. The Assyrians and Babylonians considered the various arts of husbandry to be of divine origin : cf. Isa. 28. 23-29). Others think of a fir-cone, with which the figure is sprinkling the tree with holy water. Dr. Bonavia has proved that fir-cones were used by the ancients for such purposes (Trans. Ninth Congress of Orientalists, vol. ii.).

## The Chaldean Story of the Flood and the Chaldean Noah.

The Deluge Tablet, of which there are several copies in the British Museum, is one of the most important inscriptions yet discovered. It forms the eleventh book of the Chaldean Epic of Gilgamesh, or Nimrod. It is introduced there because the eleventh month of the Babylonian calendar, according to which

AN ARCHAIC BABYLONIAN SEAL
Representing an episode in the Epic of Nimrod, Tablet $X$. Gilgamesh and his friend Ia-bânî conversing with a monster. Nêsh-Ia and his boat, in which Gilgamesh went to seek Noh-napishtim, the Chaldean Noah. the Epic was arranged, was called "the Month of the Curse of Rain," or "the Month of Destruction," corresponding to the eleventh $Z$ odiacal sign of Aquarius.

The story is evidently older than the Epic into which it was woven ; and is therefore more ancient than B.C. 2200, the period at which the Epic is supposed to have been drawn up. It is related to "Gilgamesh" by his ancestor Nụ̣̂-napishtim * (i.e. Rest of Soul), called also Atraḥasis or Hasisatra (- the Greek Xisouthros), "the very wise or pious," who is the Chaldean Noah.

The principal points of contact with the Hebrew account are :-

The Deluge is a punishment for sin. Atrahasis and his family are servants of Ia, the god of the watery abyss. The other gods decree a flood. He is directed to build a ship to hold himself, his family, and the craftsmen (who were under the special protection of Ia), as well as the various kinds of animals. The ark is covered with pitch without and

[^12]within, and has a deck or corering. The rain lasted six days and nights. The birds--a dore, swallow, and raven are sent forth, and the last returns not. The ark rests on the mount of Nizir. The rescued come forth from the ark. Sacrifice is offered, and the gods wather round the altar smelling the sweet savour. The gods agree not to punish mankind asain with a flood. limally the hero and his wife are taken or translated, like Enoch, to live like gods in the immortal land at the month of the four rivers of P'aradise.

The chief part of this important text is translated here, Scripture parallels being suggested in the margin.

## An Archaic Babylonian Seal, representing the Chaldean Noah.

This Seal is commonly assumed (after (i. Smith, Chal. Gen.) to represent Nûḷ-napishtim, otherwise Atraḷasis, the Chaldean Noah, in his ark. Really, it represents him in his dwelling at the mouth of the Four Rivers of the Chaldean Paradise, on each side of which is a figure of Gilgamesh-Nimrod, holding an oar. A worshipper stands in front.

## Fragment of another Babylonian Account of the Flood.

In 1875 the late George Smith wrote as follows: "The 'Izdubar Legends' appear to me to have been composed during the early Babylonian empire, more than 2,000 years i.c." (Assyrian Discoveries, page 166). Early as this date may have appeared, it has recently been shown to be none too early. At the last Congress of Orientalists (Paris, I897), Scheil gave an account of a fragment of a tablet containing a different version of the story of the Deluge, which was unearthed by himself in the course of his excavations at $A b \hat{\imath} H a b b a h$, the ancient Sippara. Although the document is sadly mutilated, it is of the highest importance because of the colophon which gives the date as well as the name of the scribe, and because it connects the story with Sippara, as does Berosus (Euseb. Chron., ed. Schöne, page 20 sqq .), whose account differs in some respects from that which is embodied in the Epic of Nimrod. The colophon, according to Scheil, runs thus: "Second Tablet of the history (beginning), Whilst the man slept. Tablet of 439 lines. Mullil-Aya (or EllitAya), the Scribe. Month of Sebat, day 28, the year when Ammizaduga the king built the fortress Ammizadurg's Place at the mouth of the Euphrates." (With this mode of marking a year by an event cf. Amos I. i.)

Thus the new text of the Deluge Story is actually dated by its writer at some point in the century $2250-2150$ B.c. The tablet, however, from which he made his copy must even then have been already old ; for it appears that he could not read it in some places.

# The Babylonian Legend of Gilgamesh-Nimrod. 

"Even as Nimrod, the mighty hunter before the Lord."-Gen. 10. 8-10.
Gilgamesh or Gishțubarra, the old Sumerian demigod, who was called in Semitic-Babylonian Nârûdu-a weakened form of Navrûdu = Namrûdu, i.c. Nimrod-is the prototype of the Greek Heraklês, whose celebrated Twelve Labours recall the twelve episodes or books of the exploits of Gil-gamesh-Nimrod, which constitute the old Babylonian Epic of that name.

Three archaic Babylonian Seals are figured :-
In Seal No. i, Gilgamesh and the Lion, which many consider the absolute masterpiece of old Chaldean art, the mighty hunter is grappling with a huge lion, or raising it when vanquished upon his

SEAL No. r . row girdle or belt above the middle; and, like Samson when he rent the lion, he has nothing (i.e. no weapon) in his hand. His strong, sinewy frame is broadly and powerfully indicated. Here, as always, he is seen
full face. His long curling locks and beard remind us again of Samson. The inscription is apparently "KASHA-NABÛ, priest of DûRU (or IsIn) . . . . the scribe, thy scrvant." As Gilgamesh is a solar hero, the lion may represent the Zodiacal constellation of Leo.

Seal No. 2 shows Gilgamesh and his companion Ia-bânî in conflict with a bull and a lion. On the right stands the hero, grasping the lion by the throat with his right hand, and holding a fore-paw of the beast with his left. Ia-bânî is seizing the bull by horns and tail from behindliterally taking the bull by the horns-as he is said to have done in the 6th Tablet of the Epic of Nimrod; while Gilgamesh, whose figure is repeated, takes the animal by the throat and fore-leg in front. The bull is "the Bull
of Anu," which that god created to destroy Gilgamesh, at the request of Ishtar, whose wooing the hero had despised. It is the Zodiacal constellation of Taurus, in the sun's annual path through the heavens.

The inscription of the owner's name at the extreme right is effaced; but the style and execu-

SEAL No. 2. tion prove that the seal belongs to the same early period as the similar one in the New York Museum and that of Sargon I., b.c. 3800 , in the De Clercq collection.

In the Epic of Nimrod, the ancient city of Erech is the hero's residence; and in Gen. ro. io Nimrod appears as the founder of Babel, Erech, Accad, and Calneh.

Seal No. 3, according to the inscription in the right-hand top corner, belonged to "Ussi, the brother of the king of Erech, the scribe, thy servant." It may be referred to the times of Ur-ba'u and Dun-gi (b.c. 27oo). The central figure, the only one whose head is covered, who carries a sceptre, and towards whom the others look, those nearest him having the hands folded on the breast in the usual attitude of deference, is probably the king of Erech. He wears the flounced robe of the Babylonian priests and gods, which, according to Heuzey, was really a fleecy stuff or woollen tissue, with tufts arranged in rows, called by the Greeks kaunakes (the poet Menander mentions

SEAL No. 3. a purple robe of this kind; cf. Josh. 7. 21). Two of his attendants wear a dress of similar material, and carry wands of office. Immediately behind him walks a shaven personage in a fringed robe, who may represent the scribe, the owner of the seal. An armour-bearer or body-guard, with bow and quiver, and an arrow in the right hand, leads the way. Under the inscription two slave-boys are seen, carrying a stool and a bundle of some kind.

## Transcription in Roman Letters, and Translation.

This venerable relic of the remote past, found some years ago on the site of the temple of the Sun-God at Abi Habbah, the ancient Sippar (Sippara), in Southern Babylonia (by some wrongly identified with Sepharyaim), is important as exhibiting the oldest known forms of the archaic Babylonian writing, from which the cuneiform characters were in course of time developed. It probably belongs to the period b.c. $4500-4000$ ( $c f$. page 155 ). It seems to be part of an old templeregister, not only giving an account of the flocks and herds and other property of the sanctuary, but also briefly chronicling events of interest affecting the sacred lands. Professor Hommel considers the town A-idinna, mentioned in the i3th line, whose Assyrian name would be Nâdu, to be identical with the Nod of Gen. 4. I6. The tablet is now in Mr. Ball's collection.

On the reverse of the tablet four lines are ruled, but only two filled up. They are inscribed;--

Shunigin xxy und gUN-A—A
Total: twenty-five dwellings. Gunaa (i.e., prob., the scribe's name).
The third line exhibits a single arrow, the beginning of a character left unfinished. The tablet has evidently been broken in half, perhaps by those who found it. The publication of the part we possess may lead to the identification

OLD BABYLONIAN CYLINDER-SEAL WITH FIGURE OF THE MOON-GOD.
(Inscribed: "Ur-Ba'u, the mighty man, king of Ur. Hyashamer, the High Priest . . . . thy servant.") of the other portion, a result much to be desired.

The reference to the temple-garden in Col. II. 28 sqq. might be illustrated by many passages in the Babylonian religious texts. Thus in W.A.I., Vol. IV., pl. 25, which gives the service appointed for the consecration of an image of the Moon-god, we read what may be rendered as follows:-
". . . . . At sunset in the garden
[Thou shalt pray] to Bel ; his throne thou shalt cover with the cloth thereof; The great tablet in the garden thou shalt set up. At sunrise On the bank of the river, a grassy place, pure water draw ; three knots
For Ia, Shamash, and Merodach thou shalt tie ;
One knot for this god (i.e. the nerv statue) thou shalt tie;
Dates, wheaten meal for sprinkling, honey, butter thou shalt place ;
Make splendid, make rich (thine offerings) ! Three clrink-offerings to Bel, Shamash, and Merodach pour ;
One drink-offering to this god pour ; best wine pour out, and
Set on plenty. The great bason take up, and into the great bason
Cedar, cypress, tamarisk, the herb mashtakal, a palm sapling,
The reed shalalu, honey, butter, oil, choice oil, thou shalt put."
The temple-lands would be necessary for the production of all these ritual requisites, as well as for the maintenance of the priests and their dependents. See my version of the entire text, in the Procecdingrs of the Society of Biblical Archacology, February 1892.

## Head of a Mace or Sceptre Inscribed with the Name of Sargon I.

A. XWable of objects of this kind, mostly in limestonc or marlele, exist in the British Museum and other collections. The writer possesses two in fine blue chalcedony (see page 217), dedicated respectively to the gods Merodach and Nebo, and dating from the period of the New Baby.

lonian (mplire: Onsculptures and seals, gods and kings hold socputes with similar heads we pages 5,3 , ifoo). The example ligured here was found in the lower strata of the excanations of the Temple of sippata, and beats an inscription of Sasen I., king of Accad (6en. 10. 10): whosic date is
fixed by a statement in the inscription of Nabonidus, the last native king of Babylon, 1.c. 555 :-"I dug down to a depth of eighteen cubits, and the foundation inscription of Naram-Sin, the son of Sargon, which for 3,200 years no king my predecessor had seen, the Sun-god, the great lord of E-Barra, the dwelling-place

PORTRAIT OF NARAM-SIN. of his delight, suffered me to behold." This makes the date of Naram-Sin about B.c. 3750 , and that of Sargon, who reigned fifty years, B.c. 3800 . The inscription upon the mace-head reads "Sargon, king of the city, king of Agade (Accad). To the Sun-god in Sippara I look (for help)" ; cf. Pss. 123. 1, 2; 141. 8. This inscription is written in Semitic Babylonian, and therefore shows that the characters, the invention of the Sumerian (Turanian) population of Babylonia, had been long in use, and were borrowed by the Semites even earlier than b.c. 3800 . The same thing is proved by the inscribed bricks and door-sockets of Sargon and his son Naram-Sin, found by the Pennsylvania expedition in the ruins of E-Kurra, the great temple of Ellil or Bel at Nippur, now called Nuffar, supposed by some to be the Biblical Calneh. (See Hilprecht: Babylonian Expedition of University of Pennsylvania, Vol. I.).

INSCRIPTION ON TIIE MACE HEAD.

## Seal of Ilu-Ishtar (?).

This old Babylonian seal, figured in Plate X. of the Rev. H. G. Tomkins' learned and luminous work Abraham and his $A g e$, * and described by him on page xxviii of the same book, was found by Cesnola at Curium in Cyprus. The inscription may be thus read in Semitic Babylonian: Abil-Ishtar (?) abil Ilu-bânı̂ arad ili Narâm-Ŝ̂n, which means: "AbılIshtar (?) son of Ilu-bani, servant of the god Naram-Sin." Abil-Ishtar, the owner of the seal, therefore, was either a servant of the king NaramSin, who is called a "god," as the Pharaohs were called by their subjects; or he was the priest of the cult of Naram-Sin, who, like Gudea and other Babylonian monarchs, was deified and served with regular offer-

SEAL OF ILU-ISHTAR. ings in a special sanctuary after his death. Whether the worship of the old Babylonian sovereign extended to Cyprus, we cannot say. The seal of Abil-Ishtar (?) may have found its way into the Temple-treasury of Curium simply as a rare and precious object. Moreover, it is uncertain whether the king Naram-Sin, or the god of Accad, who appears to have borne that designation, is intended by the inscription. M. Thureau Dangin has lately published the legend stamped on a document addressed to Lugal-Ushumgal, a patesi of Sirgulla, contemporary with Sargon and Naram-Sin, which reads as follows: "The god Naram-Sin, god of Agade (Accad). Sharru-Ishdagal the scribe, thy servant " (Révue d'Assyriologie, Vol. IV., No. III., page 76).

As M. Dangin observes, we can hardly ascribe too much importance to the epoch of Sargon and Naram-Sin. By the substitution of a great and compact empire for the numerous small rival principalities into which the country was parcelled out, and by the remarkable impulse given to all branches of activity, and by the full expansion in all directions of an art, a culture, a civilisation, the slow development of which had occupied the previons centuries, nay, millenniums, it marks a culminating point in the history of the ancient East.

## Inscribed Statue of Gudea, King of Chaldea.

(Circ. в.c. 3000 or 2800 .)
This long inscription is in a somewhat later form of the archaic linear Babylonian character. The language is the non-Semitic Sumerian. The statue and inscription show the skill of the Chaldean sculptor as early, perhaps, as b.c. 3000 . The stone is hard diorite, which the inscription tells us was obtained from Magan, a country formerly identified with the peninsula of Sinai, but which is now more probably considered to be N.E. Arabia, bordering on Babylonia and the Persian Gulf. The inscription records the building by Gudea of the temple of his god, Ningirsu, or Nin-Sugir, " the Lord of Sugir" (= Sun-gir = Shinar ?).

The statue is one of eight, some standing, others sitting figures, some under life-size, and others over it, which were found by M. de Sarzec at Tell-Loh in 1881, and are now in the Louvre. All these statues have lost their heads; but one of the two heads on page 134 may have belonged to one of them, as these heads were found among them, in the central court of the palace. The statue here reproduced is known as " Gudea the Architect," the plan of a building and a graduated rule being sculptured on the lap.

Though the main topic is the building of "E-Ninnut," the temple of "Ningirsu," the inscription throws some light on Gudea's relations to other countries. Thus in col.v. 2I sqq. we read :-
"When he had built the House of Ningirsu, Ningirsu his belored King, spake, (and) opened wide his (Gudea's) way from the Upper Sea (i.c. the P'ersian (iulf) to the Lower Sea (i.e. the Mediterranean)."

On Amānum ( = Amanus, N. of Lebanon), " hec codar mountain," he felled cedars for the building of his temples, and fetched various kinds of stone from the mountains of Martu, or Syria and Phoenicia. From Meruchera, i.e. probably N.W. Arabia as far as the borders of Arabia Petrate, he brought hardwood trees and gold dust; from Gubin haluku trees; and nalua stones from Barsib (Borsippa), conveying them down the Euphrates in "great boats." (Sce page II6.)

In col. vi. $6+$ we have the important notice :-
"With the sword the city of Anshan in Elam he subdued; its spoils to Ningirsu in E-Ninnê he dedicated."
"Anshan," or Anzan was the kingdom of Cyrus, some 2000 years later.

In col. vii. Io Gudea records that he brought stone from Magan for making this statue of himself, to which he gave the honorific name, " $O$ My King Whose House I have built, be Life my Guerdon!" and dedicated it in "E-Ninnû," bidding the statue make constant appeal to his god, whose statue, no doubt, it faced:-"Speak thou to the image of my King !" All the statues of Gudea have the hands folded on the breast, in the manner of Oriental servants awaiting orders-a token of the king's continual worship and service. (So David would fold his hands when he " went in and sat before the Lord," 2 Sam. 7. 18.)

STATUE OI GUDEA, KING OI CIIMADEA.

# The Old Sumerian Inscription known as Gudea B. 

I have translated this inscription from the text as published in De Sarzec's Découvertes en Chaldéc. The version of Amiaud, there given, is the only one I have seen. Gudea's date is fixed by an inscription which mentions his son Ur-Ningirsu as contemporary with Dun-GI, king of Ur (see Winckler, Untersuchungen, 157.9).

BRONZE FIGURES, в.c. 2800 .

[^19]
## Bronze Statuette of a God or Pontiff-king.

This curious figure, $8 \frac{1}{4}$ inches high, found in a cavity of solid brickwork, bears an inscription of Gudea. It was cast in a mould,
Gen. 4. 22. thus showing that the art of casting bronze was known even at so remote a date; and it also bears traces of being chased and inlaid with gold in a primitive style of Damascene work. In the earliest Babylonian hymns, a man purified from sin is often compared to glowing molten bronze ;

BRONZ1: FIGURE OF A GOD OR PONTIFF-KING. a fact which indicates a very early knowledge of the working of metals. (The tiara with horns, conventionally indicated in profile, is characteristic of gods and genii or divine beings in the Assyrian sculptures.) It is generally held that the cone served for fixing such figures in cement. M. de Sarzec found several others; among them a statuette of a woman standing on a cone, and a bull lying on one, each concealed in a similar cavity (sec illustration, page 59).

Gudea got his copper from $\mathrm{Ka}(\mathrm{N})$. Galad.ki in the Copper Mountains (or Mountains of Kr.mash). The Sumerian Kan.gal-ad.ki, "Father's Gate Country," in Semitic Babylonian Abul-abîshu, "Gate of his father," is a name which, according to Hommel, refers to the passage of Gilgamesh-Nimrod through the "gate" or pass of the mountains of Mash (the high plateau of Central Arabia), which was guarded by the mythical Scorpion-men, when he went to seek his forefather Nûh-napishtim (see page 3I).

rude outlines of objects, from which they were slowly developed in. the course of time and use. It is a curious fact that the primitive picturecharacters of Babylonia had already lost their original shapes long before the time of Sargon I. ( 3800 b.c.) ; whereas the Egyptian hieroglyphs survived unaltered throughout the whole course of Egyptian history.

## Ur of the Chaldees, and Inscribed Bricks from its Site.

Ruins of the Great Temple of the Moon-god.-The explorations of Mr. Loftus have proved that the site of the city of Abram, Ur of the Chaldees, is represented by the mounds of Mugheir, or rather Muqayyar, situated on the west bank of the Euphrates, about

Gen. 11. 28 ;
Josh. 24. 2 ; 150 miles below the site of Babylon. The city of Ur , called by the primitive Sumerian population of Babylonia Uru-unu-ki, "Brother's or Protector's (i.e. the Moon-god's) dwelling-place," was one of the oldest city-kingdoms in Babylonia; and its situation on the western side of the Euphrates, bordering on the desert, made it one of the first towns

UR OF THE CHALDEES.
Ruins of the great Temple of the Moon-god. in which the Semitic people, the ancestors of the Hebrews, would settle. It was probably occupied at a very early period, certainly before в.c. 3800 by the Semites. The principal temple here was dedicated to the Moon-god, called En-zu and Nanna by the Accadians, Sin (cf. Sinai and Wilderness of Sin), or Nannaru, the " bright one," by the Semites. In Josh. 24. 2 it is expressly stated that when the family of Terah dwelt on the other side of the Euphrates they served other gods than Jehovah.

The following lines from a bilingual hymn to Nanna-Nannaru, "Lord of Ur," may suggest how closely akin might be the ideas and language of Babylonian and Hebrew devotion :-
"Father, merciful, relenting, whose hand holdeth the life of all the world, Lord, thy godhead, like the far heavens, filleth the broad sea with awe. Creating the world, fast-founding the temples, proclaiming their names, Father, begetter of gods and man, causing the sanctuary to be founded, ordaining the freewill offerings !
In heaven, who is supreme? Thou alone art supreme!
On earth, who is supreme? Thou alone art supreme!
As for thee, when thy word is spoken in heaven, the seven spirits bow their faces; When thy word is spoken on earth, the spirits below kiss the ground.
When thy word above sigheth like the wind, it causeth food and drink to sprout forth abundantly ; When thy word worketh on earth, vegetation springeth!"

In the Elamite invasion of Chaldea in b.e. 2280 the city of Ur, like most of the cities of Chaldea, fell into the hands of the enemy, and the new rule may haw pored particularly oppressive to the Semitic population, among whom we may number the family of Terah. No doubt at that time larse numbers of Semites left the country, and, amoner others, the family of Terah, who removed to Haran. The inscriptions show that the city of Kharran, the modern Haran, was
Gen. 11.31; affiliated with the city of $\mathbf{U r}$, and had a temple of great
\&2.4. antiquity dedicated to the Moon-rod. This temple was restored by Assur-nāṣir-pal (B.C. 885), by Shalmaneser (B.C. 858), by Assur-bani-pal (b.c. 668), who was crowned there, and by Nabonidus (B.c. 555). It is also worth notice in this connection that the Assyrians had a god Laban; a name which recalls that of Laban, Jacob's uncle, who lived at Haran (Gen. 29. 4, 5). Possibly Laban, "the white," was a title of the Moon-god of Haran, as one of the Hebrew terms for moon is lcbana $\bar{a}$ (fem. of láblan, white). Laban, we know, was an idolater (Gen. 3I. 19, 30).

## Inscribed Cylinder of Arioch (?), King of Ellasar.

This cylinder from Babylonia contains a most important inscription of Babylonian and Elamite kings. It is a votive memorial of Eri-ENZU, or Ert-aku, king of Larsa (Ellasar), for himself and his father, KudurMabug, king of Ur, and of Shumir (Shinar) and Accad. (The reading of the name is uncertain. It means "Servant of the Moon-god"; in Semitic, Arad-Sin. Both Enzu and aku were titles of Sin; but it is at present only a conjecture that the name here written in Sumerian ideograms, uru (?)-DIngir-EN-ZU, was pronounced Eri-âku.)

In the year b.c. 2280 the land of Chaldea was invaded by the Elamite king, Kudur-Nankhundi, "Servant of the god Nankhundi," and most of the principal cities were taken and sacked. For a period of about eighty years the Elamites were rulers in Babylonia; and the old capital, Erech, being destroyed, the Elamite viceroy, who was usually a member of the reigning family, had his seat of government at Larsa. At some time during this Elamite rule the invaders pushed on and conquered Syria and Palestine, the sovereignty of which, according to Gen. 14. 4, they retained for a period of thirteen years. On bricks found at Ur, Kudur-Mabug styles himself "Father of the West Country," i.e. Syria. Some
Gen. 14. 1-16. account of this rule, the revolt, and the expedition to reconquer Southern Palestine are found in the same chapter of Genesis, which may in part be based on Babylonian documents. The names of the allies in Scripture and the monuments correspond as follows:-

Scripture. Monuments.
Amraphel, king of Shinar . . . . $=\left\{\begin{array}{c}\text { Hammurabi (or Hammu-rapaltut), king } \\ \text { of Shumir, S. Babylonia. }\end{array}\right.$
Arioch, king of Ellasar . = Eri-âku(?), king of Larsa.
Chedorlaomer, king of Elam . . . $=\left\{\begin{array}{l}\text { Kudur-Lagamar, or Kudur-Laghamal,* } \\ \text { king of Elam. }\end{array}\right.$
Tidal (LXX., Targal), king of Goyim $\}=\{$ Tudghulâ,* king of the Gutî (moun(A.V. nations). . . . . . $\}=\{$ taineers of Kurdistan).

The overthrow of this foreign dominion took place about b.c. 2200, on the accession of Hammurabi to the throne, shortly, no doubt, after the defeat in Syria; and it is recorded upon a contract tablet that"then Hammurabi the king prosperously marched, and Eri-aku and the king of Elam he defeated" (Boscawen).

[^20]Upon these data we arrive at a very near approximation to the date of the migration of Abram, which may have taken
Gen. 12. 1-5. place between b.c. 2280 and в.c. 2255 . There are a number of other inscriptions of Hammurabi in the British and other Museums.

According to a statement of Nabonidus, Hammurabi reigned seven hundred years before Burna-Buriash (sec page 21I) : thus, circ. b.c. 2zoo, or, as others think, circ. 2000. He was the sixth king of the first Babylonian dynasty, which Professor Hommel has quite lately proved to have been of Arab origin. The names of these kings are as follows:-Shumuabî (Shem is my Father), Sumu-la-ilu (cf. Lael, Num. 3. 24), Zabium (warrior), Abil-Sin (son of Sin), Sin-muballiṭ (Sin quickeneth), Hammurabi ('Amm is great), Samsu-iluna (the Sun is our god), Abîshû’a or Ibishu

INSCRIBED CYLINDER OF ERI-AKU (?), OR ARIOCH, KING OF ELLASAR (Gen. 14. 1).
(Arab. Abí-yathû‘a), Ammi-satana, Ammi-zaduga ('Amm is righteous), and Samsu-satana. After the reduction of the Elamite power established at Larsam, Hammurabi and his successors ruled over the whole of Babylonia until his dynasty was again dispossessed by the Elamites (Kassites). A letter of Heammurabi to his vassal Sin-idinna, king of Larsam, published by Scheil in the Révue Biblique, 1896, page 6or, was supposed by that scholar to prove that Chedorlaomer was no mythical personage, but a real king of Elam contemporary with the writer. The text as transcribed by Scheil may be thus translated :-
"Unto Sin-idinna say thus: I Hammurabi restore thee the goddesses of Emutbal (i.c. W. Elam), thy conquest in the day of Chedorlaomer (written Ku-dur-la-akh-ga-mar). When the god thy maker (or father) is angry, with the men (i.e. warriors) of thy hand overthrow men, but let goddesses abide undisturbed in their dwelling!"

From this it would seem that after the battle which decided the fate of the Elamites, and which is expressively called "the Day of Chedorlaomer," just as Isaiah (9.4) alludes to Gideon's famous rout of the Midianites (Judg. 7) as "the Day of Midian," Sin-idinna had sent the Elamite goddesses, taken from the enemy by himself, as a present or trophy to his overlord. Hammurabi returns them, with the pious injunction that in future wars his vassal should be content with the overthrow of human

INSCRIPIION OF ARIOCH (?), KING OF ELLASAR.
enemies, and leave gods unmolested. Mr. L. W. King, of the British Museum, however, has just published a text from a photograph of the original, which shows that Scheil's copy is very incorrect, and especially that the name of Chedorlaomer is a misreading of Inukhsamar. Mr. King's version is as follows :-
"From Hammurabi to Sin-idinna. The goddesses of Elam which are assigned to thee, the troops under the command of Inukhsamar will bring to thee in safety. When
they reach thee, with the troops that ate in thy hand destroy the people, and the goddesses to their dwelling let them bring in safcty."

Hammurabi orders the restoration of the captive deities, probably on account of some misfortune, which his priest-prophets explained as due to their anger. (See Letters and Inscriptions of Hammurabi, by L. W. King, page xxxvi. Luzac, i898.)

## Sumerian and Semitic-Babylonian Inscription.

This inscription is written in two languages-Sumerian, the Turanian dialect of the old Babylonian people, and Semitic Babylonian, a language akin to Hebrew. It contains the names and titles of Hammurabi, king of Babylonia B.c. 2200 , and shows the existence at that time of a bilingual population. In connexion with the story of the Confusion of Tongues (Gen. Ir), we may remember that the plain of Shinar or South Babylonia

BILINGUAL INSCRIPTION.
has always been a land of mixed peoples and languages. In the very earliest days we find two Turanian sister dialects, the Accadian and Sumerian ; then Semitic Babylonian, with Elamite, Kassite, and Assyrian. Later comes Hebrew ; and after the Captivity, Median, Persian, Greek, and other tongues, until almost every language of antiquity is represented in the city of Babylon.

## Obverse of an Unbaked Clay Fragment in the British Museum.

The text of this document, which is one of several related fragments, is obscure, and the tablet itself appears to be comparatively late (4th cent. B.c. ?) ; but it derives considerable interest from the fact that it contains the names of Ku.ku.ku.mal,* or Ku.dur.ku.mal, which Mr. Pinches

OBVERSE OF AN UNBAKED CLAY FRAGMENT.
reads Kudur-laghamal, Eri.e.a.ku or Eri.e.ku.a, and Tu.ud.ghu.la.a, which more or less resemble the Chedorlaomer, Arioch, and Tidal (Heb. Tidghal) of Gen. I4. The reading of the first name, however, is highly precarious, although it is probable that the first half of it was Kudur ; and, in any case, it is certain from the fragmentary context that the persons intended by these names are not those mentioned in Gen. I4.

# Inscription of Ku-du-ur-Ma-bu-ug (Kudur-Mabug), on Bricks from the Foundations of the Buildings on the South of the Great Mound of Muqayyar.

Here the Elamite sovereign of Ur calls himself "Father," i.e. protector or suzerain of Syria (see page 64). He worships the Semitic deity Sin, the moon-god of Ur, calling Him his "King"-a frequent title of Jehovah in the Old Testament, especially in the Psalms. He records the making of the temple-garden (cf. page 49) as a thank-offering to the god.

## Tablet of Assur-Nāṣir-Pal I., King of Assyria.

This fine text preserves a prayer of a king who reigned five or six centuries before the times of Moses and the Exodus. The old Assyrian monarch calls upon-

"The Lady of Nineveh, The loftiest of the gods, The daughter of the Moon, The sister of the Sun, The Queen of Heaven and Earth,"

Ishtar, to deliver her devoted servant from deadly sickness. The piece may be called a Psalm of Supplication, and its language often recalls the familiar phraseology of the Hebrew Psalter. [See Brünnow, Zeitschrift für Assyriologie, Vol. V., 69.$\}$

Assur-nāṣir-pal I. was the son and successor of Samsi-Rammānu $I$., who reigned about B.c. 1820 , and built a temple of Anu and Rimmon in his capital city Assur ; but little more is known about either of these ancient kings.

## ASIATICS IN EGYPT.

A$a m u$ seems to have been a general name given to Asiatics, wandering Arabs, and others living to the north of Sinai, in the Negeb or "South" of Palestine; the type of face is a distinctly Semitic one. The coming of the Aamu was the beginning of a much larger influx of Asiatics, which a few years later led to the conquest of Lower Egypt by the Hyksos (Hak-Shasu = Arabs, see page 139) or Shepherd kings. This scene shows distinctly the honourable receptions accorded to these eastern clans, even in the period of the great 12 th dynasty. It also shows the high civilization which prevailed at that early period in the countries lying between Babylonia and Egypt. The rich clothing, the weapons (bow, boomerang, spear), the man playing the lyre, the women wearing socks as well as sandals, indicate a culture not inferior to that of Egypt.

[ From a wall-painting in one of the lombs it leni-Hassan (pare 73).]

The first of two barefooted seribes who introduce the party holds out a tablet inscribed: -

# Funerary Stele of Aunef. 

(13th Dynasty.)

Monuments of the obscure period of the I3th dynasty are not common. This one-the funerary tablet of a noble named AuNEF, who enjoyed the rank of a "king's son"-was found by Mr. Percy Newberry, and is now in my own collection.

From the Turin papyrus and other sources, Petrie gives a list of 55 kings of this dynasty, which was in power from circ. B.C. 2565 to 2112.

SEBEK, THE CROCODILE-HEADED GOD. The name Sebek-hotep occurs five or six times among the first thirty-seven, and an existing statue of Neferhotep, the twenty-first king of Petrie's list, is inscribed, "Beloved of Sebek in Shed" (Crocodilopolis). Probably, therefore, the dynastic capital was in the Fayûm, where the crocodile was sacred, and Sebek the crocodile-headed god was adored. The fine statues and other monuments of these kings, e.g. the brick pyramid of Rā-fu-àb at $D a h$ shîr, the large syenite figures of Mermeshau at Ṣân (Zoan-Tanis), and the grey granite colossi of Sebekhotep (the twenty-third king) on the isle of $A r q o$ above the third cataract, prove that theirs was a time of average peace and prosperity; while the distribution of these remains about the country indicates that both Upper and Lower Egypt were subject to their undiminished sway.

## The Hyksos or Shepherd (cf. Gen. 46. 34) Kings.

Monumental evidence and tradition appear to justify the opinion that Abraham and Jacob and his sons went down to Egypt (under stress of

Gen. 12. 10 \& 42.2. famine) during the period when Lower Egypt was in the hands of the foreign invaders from Asia, who entered the country shortly after the fall of the 12 th (or 13th) dynasty, that is, about b.c. 2200 . Such an invasion would not be the coming of one people, but of a vast wave or mixed body, composed of many Asiatic tribes, the majority borne on by the prospect of plunder. (Similar impulses carried the Mongols, Goths, and other barbarous peoples across whole continents at a later period of history.) The monuments of Egypt and Chaldea, as well as the Hebrew records, suggest that the Elamite invasion of Chaldea in B.c. 2280, the migration of Abram from Ur of the Chaldees to Kharran and Southern Palestine, and the Hyksos invasion of Lower Egypt, may have been more or less contemporaneous and perhaps connected events.

During the obscure period between the 12 th and $18 t h$ Egyptian dynasties, all Lower Egypt was overrun by bands of Asiatics, known as Hyksos, a term explained by the chronicler Manetho

HYKSOS KIN゙G APEPA. as derived from the Egyptian hyk or hak, "prince," and sos, "shepherd." Sos appears to be really a Græcized form of Shasu, the usual Egyptian name for the pastoral nomads of the Arabian desert; and hak Shasu, "Bêdâwî chiefs," would be a contemptuous nickname given to the kings after the expulsion of their dynasty. These foreign rulers, who for more than four centuries were masters of Lower Egypt, resided at a fortified frontier-city, Avaris (Eg., Hauar ; probably the same as Zoan-Tanis), at Memphis, and also midway at Bubastis. (Petrie makes the many kings of the I4th dynasty " merely the puppets of the

Hyksos power," and fixes the period of Hyksos rule to the time of the 15th to the 17th dynasties, circ. B.c. 2098-1587.)

That the ruling element, and probably the fighting class among the "Shepherd" people, was composed of Turanians of a Mongol type related to the Hittites, may be perhaps inferred from the faces of the statues and sphinxes of the Hyksos rulers. Note the high cheek-bones, flat cheeks, both in one plane, massive nose, firm projecting lips, and the thick hair, with the austere and almost savage expression of power ; and compare the racial characteristics of the Hittites (pages 95, 96).

Head and Statue of the Hyksos King Apepa.-This colossal seated statue and head, found by M. Naville at Bubastis (Pi-beseth, Ezek. 30. 17, now Tcll Basta), undoubtedly belong to the Hyksos period. Although the throne is inscribed with the name and titles of Osorkon II. of the 22nd dynasty, User-mā̄t-RĀ, i.e. Potent by the Law of Ra, Sotep-en Amun, i.e. chosen of Amun, Amun-meri, i.c. beloved of Amun, Uasarken, it is thought that the name and titles of Apepa have been obliterated from the pedestal of the throne of the statue. The style of the head (page 78 ) bears so close a resemblance to the Hyksos sphinxes and figures as to leave no doubt of its belonging to the same period. Both the Hyksos kings and those of the 22nd dynasty were of Asiatic ori-

Black Granite Group of Fish-Offerers, from the Ruins of Zoan.The faces are of the supposed Hyksos type. Between the figures is engraved the throne-name of Osorkon III. of the 23 rd dynasty: Aa-cherer-Ra, i.e. Great becoming (or Creation) of Ra, Sotep-en-Amun, i.e. chosen of Amun. (See Illustration on the next page.)

Zoan, or Tanis, called Sechet T'ant, i.e. "the ficld of Zoan," by the Egyptians (cf. Ps. 78. 12, 43), is now represented by the mounds of $S a \operatorname{an}$, on the Tanitic branch of the Nile. The excavations made here by Mariette and Petrie show that it must have been the chief city of Lower Egypt. Its records extend from the age of Pepi I., of the 6th dynasty, to the time of the 12th, and continue down to Ptolemaic times. The Decree of Canopus (see page 256), a bilingual inscription like the famous Rosetta Stone, was found here.

It may have been in Tanis and Bubastis, as the chief Hyksos cities, that Joseph acted as

BJACK GRANITE FISH OFFIERJERS IRROM TANAS (ZOAN), chief minister of King Apepa. As Abram found a welcome
Gen. 41. 43. from the
Hittites
of Hebron, so Joseph and his brethren would probably find one at the court of the Asiatic Pharaoh.

The Hyksos were patrons of art, and introduced new forms, e.g. the (Semitic) winged sphinx. The comparative rarity of remains of their period is due to the wholesale destruction of their monuments by the restored native princes, who, as Brugsch says, sedulously obliterated every record of the detested usurpers.

The Sallier papyrus gives a vivid picture of the relations between Apepa and an Egyptian vassal-king, SeqenenRa, who was permitted to rule at Thebes:-

ODSIDIAN HEAD OF A PHARAOH IN KLIFF AND URAFIS.

"Egypt was in the hands of enemics, and nobody was lord in that day. There was indecd a king, Seqenen-Ra; but he was but a chief ( $h a /$ ) in the City of the South (Thebes), while cnemics abode in the Town of the Tamu, and Apepa was king in Avaris. . . . . And king Apepa chose Set (Sutech = Baal-Zephon) for his gorl, and served none of the gads which were adored in the whole country. He built him a magnificent temple, appointing feasts and days of sacrifice."

Apepa seems to have demanded of Seqenen-Ra that he should establish the sole worship of SET or Sutech in the South country also.

The papyrus relates:-
"The messenger of King Apepa betook him to the governor of the city of the South, and was brought before the governor of the city of the South country. He spoke thus, when he spoke to the messenger of King Apepa: 'Who hath sent thee hither to the city of the South? Art thou come in order to spy out?""

It is noteworthy that this is the very question which Joseph puts to his brethren, when they appear at the northern court (Gen. 42. 9). (The Sallier papyrus does not give the sequel of the story. The account of the successful revolt of Egypt against the foreign yoke is to be read on the walls of the tomb of the brave captain Aay-mes at El-Kab, who relates his own feats of arms in connexion with the fall of Avaris and other Hyksos strongholds. See Brugsch, Hist. of Egypt.)

The Sallier papyrus also records that the court of Apepa was famous for its magicians; with this fact may be associated the high position of Joseph, who could interpret dreams. Indeed, historical and other considerations lead us to see in this Hyksos period the only period which is in harmony with the life and times of Joseph. The tradition preserved by the Byzantine writer George the Syncellus or Chancellor (fl. A.D. 800), that the Pharaoh of Joseph's days was named Aphophis, is one which is now found to agree exactly with the testimony of the

Ps. 78. 12, 43 ;
Gen. 42. 23 ;
43. 32 ; 44. 5 . monuments. There were two Hyksos kings named Apepa or Aphophis; but it was probably during the reign of Apepa I. of the 15 th dynasty that Joseph rose to power. During this period the court of Lower Egypt was at Zoan, in the field of Zoan ; and the conquerors had adopted the manners, customs, language, and court etiquette of the native Egyptians, but had introduced into the country the horse and chariot, hitherto unknown in Egypt (cf. "The Hittites" below).

After the expulsion of the foreigners, Tanis was largely patronised by Seti I. and Rameses II., of the Igth dynasty, who erected important buildings, statues, sphinxes, etc., there. During the period of the 2 Ist (в.c. IIIO) and 23 rd (is.c. 766) dynasties Tanis was again the seat of government.

## EGYPT AND SYRIA.

Chu-en-àten, or Àkhu-en-àten (Amenophis IV., King of Egypt, l8th Dynasty), the heretical or reforming Pharaoh.

Of all the Pharaohs whose names and doings are chronicled more or less completely by their own monuments, none - not even the great Rameses II.-is so interesting a figure as Chu-en-aten, son of

CHU-EN-ATEN, OR AKHU-EN-ATEN
( = Splendour of the Solar disk), i.c. Amenophis IV., king of Egypt, his queen, NeferTiti, and three of their six daughters, throwing largess to subjects from a balcony of a palace at Chu-aten (Tell cl-Amarna).

Amenophis III., and the Middannian, i.e. Mesopotamian, princess Tii, the famous king to whom so much of the Tell el-Amarna correspondence is addressed; who, if he resembled Solomon in his peace-loving disposition,
and the magnificence displayed in the palace and temple which he built at his new capital, no less reminds us of Daxid by the hymns which he wrote in honour of his god, and of Hezekiah and Josiah, by his earnest labours as a religious reformer and the short-lived results of those labours.

His father, Amenophis III., had married him in youth to Dâdughîpa, daughter of Dushradda, king of Middanni in Northern Mesopo-

CHU-EN-ATEN, OR AMENOPHIS IV., KING OF EGYPT,
His queen, Nefer-Titi, and three daughters. A domestic scene within the palace at Chu-äten (Tell el-Amarna). The queen is straining wine into the king's cup, and his three daughters are offering him cakes and fowers. He holds a flower in his left hand. Among the titles of Nefer-Titi are erpat urit hout hemtu neb, "the great heiress, the queen of all women"; hont yes meh nebt taui, "the queen of south and north, the lady of the two lands" (i.e. Upper and Lower Egypt), and Aten-neferneferu, "the beauty of the beauties of Aten."
tamia. In Egypt, Dâdu-ghîpa was called Nefer-titi, which is perhaps an adaptation of her name (nefer, "good," "fair" = ghîpa; Titi=Dâdu, Tâtu). Under her influence and that of the queen-mother Tii, who was regent during his minority, Amenophis IV. repudiated the worship of Amun of Thebes (see page 99), and of the other gods of Egypt, early in the sixth year of his reign, when-like Josiah (2 Kings 22.3)-he was about
eighteen years old ; adopting his Asiatic mother"s religion, the worship of the Aten (perhaps = = the Syrian Adon, " lord"), the sun as the lord and giver of life, to the cntirc exclusion of the polytheistic and theriomorphic* conceptions which had hitherto prevailed in Egypt. This new state-religion is indicated in the illustration on page 83. Over the heads of the royal persons is seen the Solar Disk, shedding rays terminating in hands, which support the bodies and sustain the crowns of the king and queen, while two of them hold the ankh or symbol of life to the nostrils of the sovereigns.

This radical change in religion was marked by a change of name. Rejecting his former designations, Nefer-cheperu-RA-UA-en-RA, i.e. the beautiful Becomings (or creations) of Ra, the Only One of Ra, and Amen-hotep-nutar-hag-Uast, i.e. Amen-hotep the divine king of Thebes, the king assumed the name of Chu-en-aten, i.e. splendour of the Solar Disk, with the prefix Ankh-em-mā̄t, i.e. living in Truth. A new capital was founded at Chu-iten (Tell el-Amarna, see page 86). Here were built a great palace, occupying a space of at least 1500 ft . by 500 ft ., and a temple of the Aten, about 250 ft . square, standing in a sacred enclosure nearly half a mile long.

Chu-en-àten took no delight in war; he was not so much a great conqueror as a good man. His family affection is proved by the significant fact that his wife and daughters are everywhere represented with him, and by the artistic splendour of the part of his palace dedicated to their use, as well as by his inscriptions, in one of which he says :-
"Sweet love fills my heart for the Queen and her young children. God grant a great age to Queen Nefer-Titi! (see above), for long years may she hold fast the Pharaoh's hand! Grant a great age to the royal daughter Meri-iten (i.e. dear to the Solar Disk), and to the royal daughter MaKt-aten (i.e. protected by the Solar Disk), and to their children! may they hold fast the hand of the Queen their mother for ever and ever !"

## The Tell el-Amarna Correspondence.

In the year 1887 a remarkable discovery of clay tablets bearing cuneiform inscriptions was made in Egypt. The discovery of such documents in Egypt was quite unexpected; but they are now generally recognised

TELL EL-AMARNA TABLET:
[Letter from an unnamed king of Alashia, in Northern Syria, or, as others think, Cyprus, to the king of Egypt.]
as supplying an important chapter in Oriental history. The tablets were found at Tell el-Amarna, the ruins of the city of Chu-aten, built by Amenophis IV. after his adoption of the heretical creed of the worship of the Aten or Solar Disk (see page 84). As there are some letters
addressed to his father, Amenophis III., among the tablets, the whole collection may be dated between 13.c. 1500-I 450 .

At this period, owing to the marriages of Amenophis III. with wives from Babylonia and Middanni (N. Mesopotamia), the Egyptian court was crowded with Asiatics, and correspondence with the East was carried on in the style of writing then most used for diplomacy and commerce in Western Asia, namely, in the Babylonian cuneiform.

Among the tablets from the city now in the British Museum, the Royal Museums at Berlin and at Gizeh (Cairo), are letters from Babylon and Middanni, as well as from Tyre, Sidon, Gebal, Askelon, Gaza, Lachish, and Jerusalem, showing the universal use of the Babylonian writing at this period, more than a century before the Exodus. The letters from Jerusalem are of great interest. They are written by Abdi-Hiba to the king, complaining of the advance of the Philistines and others against him. Abdi-Hiba describes himself as the Pharaoh's vassal:
"Behold, this territory of Jerusalem-neither my father nor my mother gave it me; the king's mighty arm gave-it me!"

His letters will be found translated below, pages 89-93.

# THE PHARAOHS IN SYRIA. 

The Hittites.
The Hittites, the Khittim, or Benē Kheth of the Hebrews, and the Khetta of the Egyptians, were a powerful confederation of tribes in North Syria and Asia Minor. Their original home seems to have been in the Taurus, north of the gulf of Antioch, whence
1.

HITTITE KING (WITH PIGTAIL). they pushed northward and westward as far as the neighbourhood of Smyrna. Southward they overran Syria and Palestine, having an advanced post at Hebron in the time of Abram (Gen. 23. 2, 3).

After the expulsion of the Hyksos or Shepherd Kings, completed by Ahmes (Amosis), the founder of the 18 th dynasty, Egypt-under Thothmes III., the greatest king of that dynasty - established once more its suzerainty over all the petty principalities of Canaan and Aram (A.V. Syria), as far as the Euphrates, and even beyond it, for the Tell el-Amarna tablets contain despatches to the reigning Pharaoh (cf. page 86) from Mesopotamian princes. But as the dynasty became weakened by internal dissensions (apparently the cause of the periodical fall of Egyptian dynasties), the Khetta appear in the Orontes Valley (their advance is recorded in the Tell elAmarna tablets) as a power able to oppose Egypt, and even to ally itself with Pharaoh on equal terms (cf. page 104). Their power from the 17 th to the 14 th centuries b.c. was very great in Western Asia. In the Tell el-Amarna tablets, we find them during the latter part of the 18 th Egyptian dynasty advancing through the Orontes Valley, and gradu-

Kadesh, in the valley of the upper Orontes, were not only commanding military posts, but also great emporia of trade.

On the rise of the rith Egyptian dynasty about b.c. i370, Seti I., its founder, found that towards the close of the previous dynasty, almost all the Asiatic provinces had been lost. Then commenced a series of annual campaigns conducted with unceasing vigour, and conspicuously by Rameses II. (pages 103-105; cp. 2 Kings 23. 29). In the north of Syria, the Egyptians had to encounter the opposition of a powerful Hittite confederacy. Among the allies were Lycians, Teucrians, Dardanians, and other peoples who had come eastward during the period of Egypt's weakness. In the end, the offensive power of the Hittites was broken by the great battle of Kadesh, in which Rameses II. defeated the confederation and their allies from Asia Minor (see pages $\mathrm{IO}_{4}$ sq.).

The Old Testament allusions to this warlike and commercial people are few. The expedition of Hadadezer (2 Sam. 8. 3) may have been directed against the other Hittite centre, Carchemish, for he had had wars with Toi, king of Hamath, which

HITTITE HEADS seems, from its monuments, to have been (at any rate in later times), a Hittite city.

The confederacy may be meant by the Kings of the Hittites, and evidently these Hittites were celebrated for their horses

Relics of the southern branch round Hebron were among the bondservants of Solomon (1 Kings 9. 20), and some Hittite princesses became his wives (ibid. II. I).

Later, the Hittites reappear upon the monuments as barring the westward advance of Assyria as they had formerly resisted the northward advance of Eqypt. Evidently they successfully resisted Tiglath-pileser I., but, by 35 years of war (commemorated on the Black Obelisk, $c f$. pages $164^{-68}$ ) Shalmaneser II.

Deut. 3. 9), and penetrated to the Mediterranean, near Beyrout, by the old road from Damascus along the Dog River (Nahr el Kelb), where he recorded his successes by inscribing his likeness on the rocks, as Rameses II. had done long before him.

The Khetta had successfully resisted Egypt ; but Assyria proved to be more persistent and better organised, and the Hittite confederacy was gradually shattered, stronghold after stronghold falling before Assyria. In b.c. 745 , Pul, i.e. Tiglath-pileser II. (III., see page 170), the founder of the new Assyrian empire, captured Arpad, having overrun the kingdom of Hamath (cf. Isa. 1o. 9, \& 36. ig).

With the capture of Carchemish in b.c. 717 by Sargon II. (cf. page 185), the Hittites disappear from history. Prior to this, as shown by the inscription of Panammû, many of their strongholds had passed into the possession of the Arameans (Syrians). (Sce page i81.)

## A Hittite Portrait.

(Circ. b.c. 130о.)
This head, from an inlaid tile from the palace of Rameses III. at Tell elYahidch, in Lower Egypt, gives us clearly the type of the race. The type of face is distinct from that presented by any other of the races of Western Asia. The principal characteristics are the straight nose and the receding forehead and chin ; while the plaiting of the hair in pigtails, Tartar fashion, is distinctly shown (cf. No. I., page 95). The Egyptian artists depict the Hittites as beardless and black-

ROCK CARVING AT bOGHAZ KEU1. haired, and of yellowish-white complexion, with a thin wirelike moustache (cf. Nos. II., III., pages 95,96 ) and brown eyes, and with features, low stature, and thick limbs resembling those of the warriors upon the Monuments of Hamah (Hamath) and Gerābis (Carchemish) ; their dress comprises a high conical cap, with the brim turned up in horn-shaped points, surmounted by the crescent moon and the solar disk (apparently the emblems of the Hittite Ashtoreth), and boots with upturned toes and long fingerless gloves. Such boots and gloves are still worn by the mountaineers of Cappadocia, and indeed of Asia Minor and Greece, for protection against snow and frost. From such data it is inferred that the original home of the Khetta was in some lofty mountain range, such as the Taurus. Archaic sculptures and inscriptions scattered throughout Asia Minor are now usually termed "Hittite," even including the famous figure on Mount Sipylus, which the Greeks popularly identified with the Niobe of their mythology, but which Herodotus supposed to be a monument of the great Egyptian conqueror Sesostris (i.e. Rameses II.). Many of the so-called Hittite inscriptions are found in silver mines of the Taurus and Asia Minor; a sign that the authors of these hieroglyphics worked these mines.

## Amun of Thebes.

The god Amen, or Amun,* i.c. the hidden one, was the chief god of the Theban pantheon, and, from the rise of the 18 th dynasty, about 1800 b.c., was regarded as the national god of Egypt. Hence the

Amun, or Amun Rā, as he is also called, along with his consort Māt, or Mūt (i.e. mother), and Chonsu (=Sumerian Enzu, from Ganzu, Gunzu; a title of the Moongod), formed the divine Triad of Thebes, to which the magnificent temples of that city were erected.

The hymns to Amun, of which there are many in the British Museum and other collections, have a very high character, and approach very closely to the language of Monotheism. The following is an extract from one translated by the late Sir P. Le Page Renouf:-
"The One, Maker of all that is; the One, the only one, the Maker of beings; from whose eyes mankind issued, from whose mouth are the

"Hail to Thee for all these things-the One, alone with many hands, lying awake while all men sleep, to seek out the good of His creatures-Amun, sustainer of all things !" (C). Pss. IO4 and 121.)

## Ruins of Thebes.

This capital of the Egyptian empire was known to the Hebrew writers by the name of No* or No-Amon, the Ni'U of the Assyrian inscriptions. The city rose to grandeur during the period of the 18 th and 19th dynasties, especially under Thothmes III. and Rameses II., who made lavish gifts and extensive additions to the great buildings of the temple of Amun. The passages in Scripture referring to this city are of importance, as showing the interest with which the Hebrew prophets followed the political movements of the time. Nahum (3.8), in his warning to

The site of Thebes is now represented by the great ruins of Karnak and Luxor in Upper Egypt. $\dagger$

* " $N 0$ " = the Egyptian nut, i.e. city; No-Amon therefore means City of Amon.
$\dagger$ Ancient Thebes stood on both banks of the Nile; Luxor and Karnak are on the E. bank; Medinet Habû, the Memnonium, Deir el-Bahari, etc., on the W. Dank. During the Hyksos rule in the Delta the native Egyptian kings made Thebes their capital.

Between the figures are engraved the cartouches of Seti I., the second king of the igth or Theban Dynasty, b.c. 1366 (Brugsch) or (1327) Petrie. The inscription reads: "the good god Men-maat-Ra, beloved of Amun; the son of the Sun, Seti, beloved of Mãt."

## Seti I. Fighting against the Asiatics.

(Circ. I370 в.C.)
Seti I., the first notable king of the igth dynasty, waged many wars in Syria and Palestine, and especially against the Hittites. His especial object was to capture the city of

"the going up of Pharaoh to conquer the land of Kadesh in the territory of the Amorites."

In another inscription it is stated that-
"he has struck down the Asiatics, he has overthrown the Khetta (i.e. Hittites), he has slain their princes."

The campaigns of Seti I. paved the way for the great victories of Rameses II. in Syria and the humbling of the Hittites.

## Colossus of Rameses II.

This magnificent statue was found in 1820 , lying on its face in a pool of water, at Mitrahenny, on the site of Memphis, about fourteen miles south of Cairo. It was pre-
 sented by Muhammad Ali to the British riation; but not removed owing to its great size (length, 38 feet 6 inches;

HEAD OF RAMESES II.
girth, 27 feet; weight, 100 tons). It is formed of a single block of fine crystalline limestone. The feet have not been found. Mariette says the head, of which there is a cast in the Egyptian gallery of the British Museum, " is modelled with a grandeur which one never tires of admiring." It was raised and turned over by Major Bagnold in 1887, and a shed built over it for its protection.

## Great Hittite Campaign of Rameses II.

(The Battle of Kadesh.)
Rameses II. was a valiant and able warrior, his greatest achievement being the victory over the strong Hittite confederacy, which he won in the battle of Kadesh, on the Orontes. This decisive engagement had great influence on the fortunes of Egypt, and for a long period gave the Egyptians complete command over the rich provinces of Syria.

The armies met in the narrowest part of the valley, near the city. Here, after a hard-fought battle, the allies were defeated; but so strong was their power that the Egyptian king was glad to conclude a treaty of peace with the king of the Hittites, and to take his daughter to wife as part of the bargain. This treaty, which was engraved on a plate of silver, is the oldest whose terms are on record; and the spirited poem of Pentaur, describing the battle, inscribed on the walls of the temple of Karnak and elsewhere, is considered one of the most valuable historical memorials of the Egyptians.

THE BATYLI: OF KADESH.
Rameses II. engaging the chariots of the Hittites and their allies before the city.

In the first part of the great battle-scene, depicted on the temple wall at Karnak, we see the giant form of the King of North and South, User-mā̈t-Rā (i.c. Potent by the Law of Ra), Sotep-en-RA (Chosen of Ra), Rā-messu meri Amun (i.e. Rameses beloved of Amun), driving the chariots of the foe pell-mell into the river. The town of Kadesh with its garrison stands on a island in the stream, its name being written in hieroglyphs on the central tower. To the left, the king of Khirbu (Aleppo) is being helped out of the water; 9,000 foot-soldiers, "smiting the foe," are marching on the right bank. An inscription on the wall thus describes the scene :-
"When his Majesty halted, he encamped on the north-west of Kadesh. He had come up with the hostile forces of the Hittites, being quite alone, no other was with him. There were thousands and hundreds of chariots all around him on every side. He dashed them down in heaps of dead before his horses. He slew all the kings of all the nations who were allies of the Hittite king, with his princes and elders, his soldiers, and his horses. He threw them one upon another, head over heels, into the Orontes. Then the king of the Hittites turned and lifted up his hands to supplicate the Divine Benefactor (i.e. the Egyptian monarch) for grace."

THE BATTLE OF KADESH (continued).

## A Letter in the Ancient Egyptian Hieratic Writing.

This document, written on papyrus with a reed, shows how hieroglyphics were abridged and rounded off, under the influence of handwriting. So far as the script alone is concerned, it might well belong to the times of the 19th dynasty, to which Chabas, Dr. Lincke, and M. Kminek-Szedlo, who was the first to publish it in English, assigned it. In his opinion, the papyrus was written in the third year of Meneptah II., the Pharaoh of the Exodus. Other scholars, however, think it must belong to a much later period, on the ground of certain expressions which occur in it, and which are not found in documents of that age. The translation is from the pen of the well-known Egyptologist Mr. F. Llewellyn Griffith.

## Rameses II., the Pharaoh of the Oppression.

(b.c. 1340; Petric, 1275-1208.)

A discovery made at Deir-cl-Bahari in 1881 included the mummies of some of the greatest of the Pharaohs. Among them was the body of the most famous of them all, Rameses II., the supposed Pharaoh of Moses. This remarkable ruler held the throne of Egypt for a period of sixty-seven years, and died at an age of over ninety years. The face is of a highly intellectual type, and indicates great firmness; it is altogether such as might be expected of a man who conquered the whole of Western Asia, the famous " Sesostris" of Herodotus.

HEAI OF MUMMY OF RAMHSES II.
Rameses II. was a lavish donor to the Egyptian temples, and especially to that of the Theban Amun at Karnak (pages 100, roi), the greater portion of which was built by him. In return for this support of the priesthood, the body of the old warrior was removed from its tomb and hidden in the cave at Deir-el-Bahari, when the priests of Amun fled from Thebes before the advance of the Susian kings of the 22nd dynasty, B.c. 900 .

# ISRAEL IN EGYPT.-SCENES FROM EGYPTIAN LIFE. 

## Pithom, the Store-City: Egyptian Granaries.

The Pharaoh who knew not foseph oppressed the people of Israel, perhaps on account of their association in former times with the Hyksos invaders (cf. Gen. 46. 34), and imposed upon them the task of Ex. 1. 11.
Gen. $41.48,56$. two great kings of the igth dynasty, Seti I. and Rameses II., for two purposes-to store the tribute brought home from the Asiatic wars, and to form commissariat stores for the large armies going to and returning from Syria. They are similar to the cities of store built by order of Solomon ( I Kings 9. 19). The name of Rameses came into prominence with the 1gth dynasty; but the monarch who made it celebrated by his long reign of sixty-seven years and his brilliant wars was Rameses II., and it is this monarch who is now generally identified with the Pharaoh of the Oppression.

Such an identification was indicated by the fact of one of these storecities being named Raamses, i.e. Rameses, a designation unknown to the royal personages of an earlier period. In the Wady Tumilat, near to the famous site of Tell el-Kebir, excavations were conducted by M. Naville in the mound of Tell el-Maskhuta, which resulted in the recovery of bricks and inscriptions showing that this was the site of an ancient city whose name was Pithom or Pa Tum, i.e. "the City of Tum or Tmu" (the god of the setting sun), and that the city was founded by Rameses II. A Greek inscription testifies that the ancient name of this city was Heroopolis, or the city of Ero; a name perhaps derived from the old Egyptian Ar (Ari, Aru), "a store-house."

The exploration of the city area showed that it consisted almost entirely of store-houses, massive buildings with walls 22 feet thick. Like the Egyptian granaries represented in the paintings, the only opening
was at the top, where the corn was poured in. The whole was conEx. 5. 10. structed of brickwork, and in the large store-houses were compartments formed by walls from 8 to to feet thick, built of bricks made without straw. In these bricks without straw we may see the work of Israel in bondage, in accordance with the Biblical statement that the Pharaoh refused them straw.

The Egyptian name of the district in which Pithom
Ex. 13. 20. was situated was Thukut, which exactly corresponds to the Succoth of Exodus.

In the lower scene the labourers are carrying the wheat in bushel measures up a staircase to the roof of the granaries, and pouring it into the chambers below, in the presence of the steward. The capacity of the chambers is marked in numerals on the walls. In the upper scene some are winnowing with wooden shovels, and a scribe sits on a great heap of grain, noting the number of bushels carried to the store-chambers. Before him is written, "The scribe of wheat measures, Tehuti-nefer."

# Brick-Making in Egypt by Foreign Captives under Taskmasters. 

(Tcmp. Thothmes III. Circ. b.c. 1503-1449.)

The annual inundation of the Nile left behind it large quantities of mud admirably suited for the making of bricks, which, dried in the sun, formed a durable building material in the rainless climate of Egypt. The bricks made from Nile mud require straw to prevent cracking ; Ex. 1. 14 \& 5. 7-18. which is not the case with those moulded from the clay of the torrent-beds on the edge of the desert. Kiln-burnt bricks were not used in Egypt until Roman times. Like those of Babylonia (see page 204), the bricks were larger than ours. The one figured below (page 113) measures about 15 inches by 7 , and is a little over 5 inches thick; it is made with chopped straw.

Our illustrations are taken from a series of wall-paintings in a tomb which represent the building of the Temple of Amun at Thebes by foreign captives of Thothmes III. (of the I8th dynasty), the great Egyptian conqueror of Syria and Phœnicia. Among the hieroglyphic inscriptions occur the words-
"The taskmaster saith to the labourers, "The stick is in my hand, be not idle." "
The inscription over the upper picture is-
"Captives whom his Majesty carried away, building the Temple of his father Amun."
On the right of the lower picture it is stated that the work is-
"For the new building of the store-house of the god Amun, of Apt, in Thebes."

Scene II.-Here we see two men fetching water in large jars from a poncl full of water-lilies; two others cutting off portions of the clay; another carrying a load of it to the moulder, who is just turning a brick out of his wooden mould; another fixing his cutter; and another settling the bricks in rows to dry. The inscription states that the work is "for the new building of the storehouse of the god Amun of Apt in Thebes."

## Captives Dragging a Colossus in Egypt.

(Tcmp. Usertesen II. Circ. b.c. 2366 (or 2716-2684).)
That the ancient Egyptians were well acquainted with practical mechanics, is evident from the vast masses of stone which they managed to transport to distances of hundreds of miles from the quarries. Thus the obelisks of Thebes and Heliopolis, measuring from 70 to 93 feet long, were dragged the whole way from Aswân on sledges by forced labour, in the manner shown in the illustration. The largest of these, which stands at Karnak, weighs about 300 tons, and traversed a distance of 138 miles; while those of Heliopolis ( $\mathbf{O n}$ ) were conveyed 800 miles and more. The colossus of Rameses II. at the Memnoniuın, which when entire weighed over 887 tons, was also brought all the way from $A$ swan to Thebes. The elevation of obelisks, and of immense stones like the lintels of the doorways at Karnak and elsewhere, some of which are 40 feet io inches long and 5 feet 2 inches square, also indicates a marvellous knowledge of mechanical appliances; though we are left in the dark as to their precise nature, for in some instances the use of the inclined plane, which has been suggested, was impossible for want of space.

Our illustration exhibits the transport of a colossus of a grandee (" Tehuti-hotep, beloved of the king "). It is fastened on a sledge with double ropes, twisted together, and kept taut by inserted pegs. Compresses of leather or some other substance are placed between the ropes and the statue, to obviate damage from friction. Hieroglyphics state that the statue is 13 cubits, or 22 feet $2 \frac{1}{2}$ inches high. It is being dragged by 172 men, in four rows of 43 each, some of whom are Egyptian convicts, others foreign captives, wearing their own distinctive dress. Behind the fourth row are some carriers of grease for oiling the track. Behind these again three men carry a piece of cogged timber for placing, when necessary, under the sledge; and after these walk three taskmasters, stick in hand. The four rows of men at the back of the statue are mer or superintendents of the work. A man is pouring grease on the track from the plinth of the statue; and another, standing on its knees, is beating time to the chant of the labourers, to insure all pulling together. In front of the statue a priest is offering incense (arit sentra). A detachment of soldiers, unarmed, and carrying branches of trees, is seen marching towards the statue, beside the first row of labourers.

## Transport of an Assyrian Colossus.

This picture supplies an admirable pendant to the preceding. It is taken from large fragments of sculptured alabaster, vividly representing the transport of one of those huge man-headed winged bulls which were set up as guardian powers in the doorways of Assyrian temples and palaces (see Plate facing page 28). These slabs were brought by Layard from the gallery of Sennacherib's palace at Kuyunjik, which was adorned with a series of similar sculptures. The method of transport is much the same as in the far more ancient Egyptian illustration, the colossus being mounted on a heavy wooden sledge, and dragged along by means of four stout cables attached to the car; but in the Assyrian instance we notice also the use of rollers and levers, which is strangely absent from the Egyptian scene. The men drawing the sledge appear to be captives; and certain differences of costume suggest that they belonged to different conquered peoples. Small ropes, passing over their shoulders, are attached to the four great cables, which are themselves fastened to projecting pins on the front and rear of the sledge. Taskmasters armed with swords and staves are driving them, and the ruthless cruelty of these is painfully illustrated. Behind the sledge, we see the working of the huge lever, used for starting it and helping it over broken ground.

A man, kneeling on one knee, is altering the height of the fulcrum by inserting wooden wedges of different sizes. Below, some are carrying the rollers, over which the sledge has already passed, from the rear to the front. On the colossus are four persons; the first kneeling on one knee and giving the time to the drawers by clapping his hands; the second, with outstretched arm, giving the word of command ; the third with a trumpet at his mouth; the fourth bearing a mace. The last three, and four others who are walking before them, are evidently soldiers, as their weapons indicate. Behind the sledge are men drawing carts loaded with ropes and timber, and others carrying other appliances. On the river or canal, at the top of the picture, we see a boat and raft laden with stone, like those still used in the country, and a man swimming on a skin, after the manner described by Xenophon.

## Egyptian Musicians and Dancers.

In these scenes we have examples of the guitar, the double pipe, the lyre (the harp of Gen. 4. 2 r ; Ps. 43. 4), and the square tambourine or tabret. They afford some idea of the character of the instruments so frequently mentioned by the writers of the Old Testament, and help us to realize in some degree the state of musical knowledge in the ancient world. Besides the large and elaborately ornamented

harps, four or five other instruments are shown, including the double flute or pipe, the upper part of which is defaced in the third row of figures, but which is perfect in the first. Those who wish to know more about the music of the Bible may be referred to the article by Sir John Stainer, in the Queen's Printers' Aids, revised by the present writer (i897).

## Funeral Processions of the Egyptians.

In the upper scene, a shrine, surmounted by the jackal-emblem of Anepu (Anubis), the Egyptian Hermes or Conductor of the Dead, is being carried by four priestly bearers. A woman, perhaps the wife of the deceased, kneels at the side. A master of the cereCf. Gen. 50.7-11. monies, followed by eight women with bared bosoms, precedes; and four men with long staffs (the ordinary badges of Egyptian gentlemen) follow the shrine: all making gestures of mourning, by beating their breasts and their mouths while wailing (the interrupted sound has a peculiarly melancholy effect), or by throwing dust on the head.

[From a wall-painting in a tomb.]

In the lower scene, the richly decorated hearse, with the sarcophagus laid on a bier inside it, stands in the sacred boat, which rests on a sledge; and the whole is being drawn by four oxen down to the sacred lake (cf. page roo) of the nome, or to the Nile, on the western side of
which were the tombs.* A priest, wearing a leopard-skin, offers incense with his right hand and pours a libation with his left before the body. In front of the priest

The images of the goddesses Asit and Nebhät (Isis and Nephthys) stand in the boat, at the head and foot of the sarcophagus, guarding the pious dead. Behind, follow male and female mourners, throwing dust on their heads. On the prow of the boat is painted the mystic Eye of Osiris; and the hearse is adorned with the hieroglyphs for Life and Permanence, painted in pairs.

## Richly Decorated Mummy-Case.

The first illustration represents the cover of the second coffin of a priest of Amun and Mât (cf. page 99), and prophet of the double heart of Amun. It is painted, as usual, with figures of gods connected with the world of the dead. The other gives the side view of the mummy in its case.

The bodies of Jacob and Joseph were embalmed in Egypt, carried up into Canaan, and buried there ; see Gen. 50. 2, 26 ; Exod. 13. 19; Josh. 24. 32.

A RICHIS DECORATED EGYPTIAN MUMMY-CASIE.

## Anūbis, the Egyptian Hermes, tending a Mummy on its Bier.

The guardian goddesses Nebhāt and Asit (Nephthys and Isis) stand in a posture of reverence at the head and feet of the body. The four canopic vases (with the heads of the gods or genii of Amenti, Amset, Hāpi, TTua-māutef, Qebḥsennuf) contain the intestines of the deceased.

## The Soul

Reanimating the Body in the Tomb.

The mummy lies on its lionshaped bier, tended by Anepu or Anubis, the jackal-headed god who was the Conductor of the Dead. Over it hovers the soul of the departed, symbolized by a human-headed bird, applying the emblem of breath to the nostrils of the mummy.

## "After Death the Judgment."

Though differing in some details, the general representation of this subject is identical in the Egyptian tombs and papyri. In our two examples, Anepu (Anūbis), the jackal-headed god, is seen weighing the dead man's heart (Egyptian ab, of which the hieroglyph is a two-handled vase) against the ostrich feather, the hieroglyph for Truth and Right (shu, mā̃t), in the other scale. Tehuti or Thoth, the ibis-headed god of letters, is registering the result with reed and writing-palette. $\bar{A}$ memt, i.e. the Devourer (of the wicked), a triform monster compounded of crocodile, lion, and riverhorse, keenly watches the recording god, waiting to devour the heart if it should fail to counterbalance the feather exactly.

TWO PICTURES OF THE JUDGMENY AFTER DEA'LH IN AMENTI, THE LGSPTAN HADES.

The bust of Mañt, godless of Trull, rests on the standard of the " Great Balance," in the upper scene; in the lower, a Cynocephalus or dog-headed ape, an emblem of Thoth, occupies the same position (sec frontispiece). In the one case fourteen, in the other twelve gods appear, sitting above as assessors of the trial, with a table of offerings before them, by which, in the upper picture, the deceased kneels in prayer (Diodorus gives 42 as the full number of divine Assessors; and this number is actually represented in the Ptolemaic temple of Deir-cl-Medinch, Thebes). Another point of difference is that in the upper picture Anepu is seen, on the extreme left, leading the dead man by the hand into the Judgment Hall (the "Hall of Twofold Truth ") ; in the lower, the deceased and his wife are apparently watching the trial. (The two small female figures which stand in front of the deceased in the lower picture are Meschenit and Renenit, the goddesses of birth and babyhood. The man-headed bird above them is the soul of the deceased man (cf. page 122). Under the beam of the balance stands a figure symbolizing his fate or fortune ; above which is a small sphinx.)

To the right of the balance in both pictures, the result of the trial being supposed favourable, the justified person is presented by Hâru or Horus, the hawk-headed god, to his father Uasari or Osiris, the " Lord of Eternity," who sits enthroned in his palace, holding the crook, sceptre, and flail, the symbols of sovereignty, power, and chastisement, and attended by his sister-goddesses Asit and Nebhāt (Isis and Nephthys). From the waters under his feet springs a lotus, supporting the four genii of Amenti, the Egyptian Hades, above whom, in the upper picture, floats the winged Eye of Osiris, holding a flabellum or fly-flap. In the lower scene, the deceased kneels at a table of offerings before the great god.

When found righteous, the deceased Egyptian received the title of "Osiris," being in some sense identified with the god, into whose presence he was admitted. Henceforth he was believed to enjoy plenteous fare, and an abode in the Sechet hotept or Elysian Fields.

THE FOUR GENII OF AMEN'I.

## The Goddess of the Sacred Fig-Sycamore Tree presenting Fruit and Drink to a Deceased Pair.

A scene often repeated in the wall-paintings of the Egyptian tombs. Sir Gardner Wilkinson describes it as follows:-
"The goddesses Athor and Netpe [Hat-hart and Nut] in their respective trees, the Persea and Sycamore-fig, frequently presented the virtuous after death with the fruit and drink of heaven ; which call to mind the ambrosia and nectar of Greek fable."

Dr. Birch, in his notes to Wilkinson's Egyptians (Vol. IV., page II9), writes :-
"Athor, in fact, was iclentified with Nut, as the goddess of the celestial water or ether, and as such gives the bread and water of life out of the sycamore, to the soul which thirstily drinks the living waters flowing from her vase."
"The Persea was sacred to her, as the sycamore to Nut; and in the funeral subjects of the Theban tombs she is seen performing the same office to the deceased and his friends as that goddess-giving them the fruit and drink of heaven."

The representation also reminds us of the Hebrew "Tree of Life" (Gen. 2. 9; 3. 22; Prov. 3. 18; 11. 30), and of the similar supernatural trees of Prophetic and Apocalyptic vision (Ezek. 47. 12; Rev. 22. 2).

## THE EXODUS.

Rameses II., after his long reign, was succeeded by his son Meneptah, or Mer-en-Ptah, i.c. beloved of Ptal, who had lately been associated with him on the throne. His father's enormous expenditure and costly magnifi-

EGYPTIAN SACRED BULL. cence had impoverished the realm, and left him an embarrassed heritage (cf. in Judah, the case of Solomon and Rehoboam some centuries later). Of Meneptah's reign we know but little; but an inscription in the Temple of Amun, at Thebes (page 99) seems to imply by the phrase "Put away the dejected heart from thee," that he was lacking in energy. During his reign the Libyan tribes invaded the western portion of Lower Egypt. Probably it was then that the watch over the Israelites was removed. On returning from this expedition the Egyptian army pursued the Israelites. It is not to be expected that we should find any Egyptian account of the disastrous result. The Biblical narrative (cf. Ex. 14. 23, 28) does not state that the Pharaoh himself perished in the Red Sea.

At the close of this dynasty, the Egyptian power once more became weak ; and probably this weakness enabled the Hebrew people to conquer the Canaanites, who had been disabled by the terrible chastisements of Rameses II., and were disunited among themselves.

In February 1896 Petrie explored the funeral temple of Meneptah at Thebes, and had the great good fortune to unearth both the statue and also the inscribed stele, of which we give copies, pages 128 -1 30 .

Portions of the grey granite of this life-like statue, c.g. the eyes, are painted. The ovals or cartouches on the shoulders give the names of Meneptah; that on the right, the one shown, is Ba-EN-Ra meri-Amun, i.c. Ram of Ra, belowed of Ammn.

Cf. Exod. 1.10-22. (father of Chu-en-áten, see page 83), but utilised on the other side by Meneptah for an inscription concerning his victories over the Libyan invaders of Egypt, and apparently

also over various peoples of Palestine, including Israel, of whom it is said that-

and indeed " the earliest certain allusion to any historical connexion with them on any monument or record outside of the Old Testament " (Petrie). Some think that it offers a striking parallel to the narrative of Exod. i. 10-22; but this opinion rests on misinterpretation of the text.

## Shishak or Shashank I., the Invader of Judah in the Time of Rehoboam.

(Circ. в.c. 960.)
On the southern external wall of the great temple of Amun at Karnak (Thebes), Shashank I., the Shishak of the Bible, who was the first king of the 22nd dynasty, has recorded in characteristic Egyptian fashion the results of his expedition against Judah, which, according to the brief

SCULPTURE REPRESENTING SHISHAK LEADING HIS LNEMIES CAPTIVE.
account of I Kings 14. 25-28, took place in the fifth year of Rehoboam, the son and successor of Solomon, and which was probably instigated by Jeroboam, king of Israel, who had been a refugee at his court from the tyranny of Solomon (i Kings ir. 2(-fo). The Biblical writer gives
no details of the campaign, except the plunder of the Temple treasury; but Shishak has left us a lengthy list of about a hundred captured cities, mostly Judean, though some of them belong to the northern kingdom. Among the names are the Egyptian equivalents of Abel, Adullam, Ajalon, Beth-anoth, Beth-horon, Beth-tappuah, Gibeon, Jud-hamālek (cf. page 138), Megiddo, Shunem, Taanach, etc.

In the sculpture, the giant-form of the conqueror, Shashank MeriAmun, is seen grasping with left hand the ends of the ropes passed round the necks of long rows of captives, whose arms are tied behind their backs; and with his right threatening with blows the suppliants who kneel before him with uplifted hands. The names of the conquered cities and districts are graven in the ovals attached to each prisoner. Many of these names have unfortunately been much damaged, as will be seen from the enlargement below. (Yud-hamālek is the third name in the third row from the top.)

## Sword of Rammânu-Nirāri I., King of Assyria.

(Circ. I300 b.c.)
This interesting weapon is of bronze, and the hilt was originally inlaid with ivory and jewelled. It is sickle-shaped, like the sword of Bêl in the Babylonian sculptures, and is $2 \mathrm{I} \frac{3}{8}$ inches by about $\mathrm{I} \frac{1}{8}$ inches broad. It is inscribed: Ekal Rammânu-nirāri shar kishshati abil Budu-ili shar Ashshur abil Bêlnirāri shar Ashshur-ma, "Palace of Rimmonnirari, king of the world, son of Budu-il, king of Assyria, son of Bel-nirari, king of Assyria." These three sovereigns reigned from about B.C. I375 to I300. Rimmonnirari was one of the greatest of the early Assyrian kings. He vanquished Nazi-Murudash, the king of Babylonia, and annexed part of his territory. The sword seems to have been found by Arabs at Kileh-Sherkat, the site of Ashshur, the old capital of Assyria. It belongs to Col. Hanbury, and an account of it was given some years ago by Mr. Boscawen, in the Transactions of the Society of Biblical Archaology. In shape it bears no likeness to the straight two-edged sword so often represented in the Assyrian bas-reliefs,
 some examples of which are figured on P. I99, but it more nearly resembles the falchion-shaped weapons of the Egyptians, as annexed. The one with the figure of Anubis is of bronze.

# OLD TESTAMENT ETHNOGRAPHY. 

## Ancient Chaldeans or Accadians

(better Sumerians).
The two heads here reproduced were unearthed by M. de Sarzec at Tell Loh. They are life-size, and are of the same material and workmanship as the statues of Gudea, discovered at the same time and place (see page 54). Very discrepant accounts have been given of them. Menant and others have fancied that a distinct racial type, viz., that of the primitive

ANCIENT CHALDEANS OR ACCADIANS (HETTER SUMERIANS).
non-Semitic (Turanian, or even Tartar) Chaldean people, was plainly to be recognised in them. But the unusually large eyes and exaggerated eyebrows, the strongly defined chin, and the nose, which, when unbroken, was probably not flat but somewhat arched, like those of the other heads of the same period, can hardly be considered distinctively

Tartar features; and while it is natural to suppose that these and the other heads found by De Sarzec represent average specimens of the Chaldeans of their period, so far as the sculptors had skill to pourtray them, it is well to remember M . Heuzey's caution, when we are looking for special indications of race in sculptured remains so ancient as these: " It is only subject to the greatest reserve that we can venture to say anything as to the ethnography of the types created by sculpture, especially when those types are archaic, and therefore exposed more than all others to the influence of school conventions. It is a common habit with antique sculptors to allow traces of their work in its rough shape to subsist in the finished creation. In all countries the march of art has been from square and angular to round and

CHALDEAN TERRA-COTTA OF FEMALE FIGURE IN THE LOUVRE. flowing shapes, from short and thick-set to graceful and slender proportions."

## Typical Heads of the Nations of Canaan and the Adjacent Countries.

The walls of the great temples of Egypt are adorned with representations of the mighty victories of the Pharaohs; and, owing to their habit of recording conquests by typical portraits of the races against whom the armies of Egypt fought, from these sculptured tableaux we are able to obtain a valuable series of racial illustrations. The sculptures of the great temple of Karnak, dedicated to the god Amun, supply us with portraits of most of the races of Canaan against whom Thothmes III., of the 18th, and Rameses II., of the 19th dynasty, waged war. This valuable collection of ethnographic representations has been photographed by Professor Petrie, and his casts of them are preserved in the British Museum, from which some of the illustrations here given have been made. (The rest are from the pencil of the Rev. H. G. Tomkins.)

Egyptian.-The dominant race in Egypt at the earliest historical period, as pourtrayed in the sculptures and paintings of the early dynasties, presents a high type of

EGYPTIANS OF THE 4 TH DYNASTY. features.

It is now believed that the dynastic Egyptians were members of a white race, which entered Egypt from Pûnt or South-west Arabia and the opposite coast of Somâli-land, at a very remote period.

During the later dynasties the Egyptian type became much changed by intermixture with Asiatics and negroes.

The Philistines were called by the Egyptians the Pulsata or Pulista. The type of the face is very remarkable; so singular, indeed, that it is extremely difficult to class them with other races. There is, however, a resemblance to the early inhabitants of Cyprus and of the coasts of Asia Minor, which enables us to recognise in the Philistines another of the numerous bands of wandering pirate tribes of the Eastern Mediterranean, which had first obtained a settlement in Lower Egypt, and then on the coasts of Syria.

The Amorites are a handsome type, of fair reddish complexion, with blue eyes, red beard and eyebrows, but black hair. The opinion of ethnologists is almost unanimous in regarding them as belonging to an old white race inhabiting the shores of the Mediterranean, of which the only existing type may be preserved in the Kabyles of North Africa. In early times they were the

## THE SO-CALLED MONUMENTS OF THE

## HITTITES.

The system of hieroglyphic writing exemplified by these remarkable monuments has not yet been deciphered, although many scholars have, from time to time, proposed their own solutions of the problem, among the latest Professor Jensen, of Marburg, who calls the inscriptions "Cilician." His theory, however, has been ably criticized by Professor Hommel, who connects the Hittites with the Scythians, and the first appearance of the Iranians in history; professedly starting from a paper published by myself in the Proceedings of the Society of Biblical Archaology ten years ago, entitled Iranian names among the Hetta-Hattê : see his monograph Hethither und Scythen, reprinted from the Sitzungsberichte der königlichen böhmischen Gesellschaft der Wissenschaften (Prag, 1898). The system of writing is probably not altogether unconnected with the original pictorial script of Babylonia.*

STONE BOWL WITH INCISED INSCRIPTION.
[Fonnd at Babylon.]
The sculptured stones represented below are some of the fruits of the late George Smith's excavations at Gerâbîs on the Euphrates, the

BAS-RELIEF OF A KING, WITH SUPPOSED HITTITE INSCRIPTION.
[From the site of Carchemish.]
site of the ancient Carchemish (Jer. 46. 2), which was taken and destroyed by Sargon, king of Assyria, B.c. 717. The first (page 141) apparently presents the figure of a king, holding a sceptre; and though much defaced, the work is obviously Assyrian in style, and need not be much older than the 8 th or 9 th cent. b.c.

The same remarks apply to the one on this page the subject of which we recognize at once from its likeness to the familiar Assyrian sculptures (page 33) ; while of the third, little more can be said than is indicated in the title.

FRAGMEN'I OF BAS-RLILIEF FROM GERABIS, THE ANCIEN'T CARCHLBMISH. A cherubic figure in Assyrian style. Hittite characters in four lines in front.

> portion of one side of a stone doorway, with supposed hittite INSCRIPTION.

[F1om Carchemish on the Euphrates, the chief Hittite capilal and commercial emporiun.]
The stone is a piece of basalt, $39 \frac{1}{2}$ inches in height, cut into vertical steps, each 22 inches, $8 \frac{3}{4}$ inches, $8 \frac{1}{2}$ inches, and 7 inches wide. The steps are here separated, and arranged as it may be supposed the lines of the inscription were intended to be read, from right to left and from left to right alternately (i.c. always tozards the animal faces). The longest panel, which was probably within the doorway, is 22 inches wide in the longest line. In this, as in most of the other inscriptions, the characters are cut in relief. The stone Bowl (page 140) and the boss of Tarkondemos (page 145) are the principal exceptions, the symbols and figures on these being incised. It seems probable that the group with the bird (an eagle?), which occurs near the beginning of the second line, and again towatds the end of the fourth, contains the name of Carchemish.

## Rock Sculpture of a Local Baal, a God of Corn and Wine, with supposed Hittite Inscriptions.

This fine sculpture is carved on the chiselled surface of the red limestone rock, which rises about 40 feet from the water's edge of the river of Ibriz, a place about three hours S.E. of Eregli, in Lycaonia. A king or satrap is praying to a god (perhaps the god of the stream)

ROCK SCULPIURE AT IBRIZ, WIT'H SUPPOSED HI'ITITE inscriptions.
A king or satrap worshipping a local Baal. whose hands are laden with the bearded wheat and grapes which the neighbourhood still yields in abundance. The design of the figures is good, and strongly suggestive of Assyrian influence, like the sculptures from Carchemish. The god is about 20 feet high, the worshipper about 12 feet.

The existence of this highly curious memorial of the past was first discovered by the Rev. E. J. Davies, M.A., and published by him in the Transactions of the Society of Biblical Archaology, Vol. IV. part 2, 1876. The horned cap of the god should be noticed as an Assyrian feature (see page 30). " He wears boots turned up in front, and bound round the leg above
the ankle by thongs, and a piece of leather reaching half-way up the shin, exactly as it is worn to this day by the peasants of the plain of Cilicia round Adana" (Davics). The hieroglyphs between the head and arm of the gorl, and those behind the king, no doubt conceal the names and titles of each. There is another inscription in the same character below the figures, just above the water's edge.

## The Bilingual (" Hittite" and Assyrian) Boss of Tarkondemos.

A THIN concave circular silver boss, with an incised figure of a king or warrior holding a lance or staff, and an identical " Hittite" inscription before and behind, surrounded by an inscription in the cuneiform character. This object, which perhaps originally covered a knob of a staff or dagger, was in the possession of M. Alexander Jovanoff, a numismatist of Constantinople, some 40 years ago. The late Dr. Mordtmann published a facsimile of it in 1863. It has since disappeared, but not before an electrotype of it had been taken at the British Museum, where it was offered for sale, but rejected as a possible forgery. The cuneiform legend has been usually read: TarQūtimme shar māt Erme, supposed bilingual hittiteand Tarqutimme king of the Land of Errne. Now, however, Hilprecht, with whom Hommel agrees, would read Mitan ( = Middanni) as the name of the country. Sayce thinks it belongs to the age of Sargon, circ. b.c. 721. The name of "Tarqutimme" seems to be identical with that of Tarkondimotos (Dio Cassius) or Tarkondemos (Plutarch), a Cicilian prince in the time of Augustus.

## Terra-cotta Seals and Seal-Impressions.

$$
\text { (Cf. Job 38. } 14 \text {; Cant. 8. 6.) }
$$

The interest of these objects lies in the fact that the inscriptions on them are obviously in the strange and still undeciphered character known as Hittite. The eight smaller ones, arranged in the two rows
at the bottom, are seal-impressions, and were discovered in September I85I by Sir A. H. Layard in the Record Chamber of the Palace of Assur-

TERRA-COTTA SEAL.S ANJ SEAL-IMPRESSIONS, WITH SUPPOSED HITTITE IN'SCRIPTIONS. bani-pal at Kuyunjik. The last three of them bear the same legend, which Professor Sayce has identified with the name of Sanda-sarmê, a king of Cilicia, who visited Nineveh in the time of Assur-bani-pal, and gave his daughter to that monarch. Sayce thinks these seals were attached to the marriage-contracts (P.S.B.A., June 1882). Their date would thus be about the middle of the 7 th cent. B.c. But this ingenious conjecture is still unverified. These eight objects are now in the British Museum.

The others are in the collection of M. Schlumberger of Paris, who bought them of a dealer in Constantinople, about 1879, to whom they had been brought from Asia Minor. Most of them are conical in shape, with a hole near the point, and are inscribed at the larger end. M. George Perrot published an account of them in the Revue Archéologique, December 1882. For the sake of comparison, I add a drawing of an Assyrian lion by the same hand. It will be immediately evident, even to an untrained eye, how far the model surpasses the dimınutive copy in boldness and freedom of design, in power of execution, and, in spite of certain con-
 ventional features characteristic of Assyrian art, in the truthful delineation of nature.

# Babylonian Boundary Stones or Landmarks. 

(Circ. b.C. II 50-I Ioo.)
The boundary stone or landmark was one of the most ancient institutions in Chaldea, no estate being considered safe without one or more such being placed upon it. The stones were always boulders or natural stones, of which the surface was sufficiently smooth for the inscription. The title-deeds to the land, with particulars and dimensions of the ground, were inscribed on the stone; and all the gods of the pantheon, especially those of the household of the owner of the land, are invoked to curse any person who injures or removes the landmark. (With this compare the Biblical curse against such a one as removed his Deut. 27. 17;
(f. Josh. 24. 27. neighbour's landmark.) The stones are often mencf. Josh. 24. 27. tioned in deeds, and are analogous to the Hebrew

EMBLEMS OF THE GODS,
in the form of a Planisphere, with four other examples added
"Stones of Witness."
The stones set up did not always relate to private ownership; e.g. the first of the two here figured contains the charter of freedom granted to a certain territory called BitKarziyabku, by Nebuchadnezzar I., king of Babylon, about B.C.II50.

The other records the sale of a piece of ground by Amel-Bel to Mardug-nāsir, in the time of Mardug-nādin-ahi, Nebuchad-
nezzar's successor, who reigned about fifty years later.
Both are decorated with emblems of the gols, prototypes of our signs of the Zodiac, but the second displays also a characteristic figure of the king.

# The Religion of Babylon and Assyria, as Illustrated by the Seal-Engravings. 

## I.-THE MOON.GOD.

Ur, the original home of Abram, was the seat of the worship of Sin, the Moon-god, called by the old Sumerians En-zU, "Lord of Knowledge"; a name which Hommel has identified with the Egyptian Chon-su. The great temple of Ur was built by Ur-ba'u, about b.c. 2800 (sec page 63). The same god had a famous temple at Harran, the place where Terah and Abram settled after leaving Ur (Gen. ir. 3I).

Sin was naturally the god of nomadic tribes, whose journeys are usually made by night ; and it is generally held that mount Sinai was so called, as being an ancient "high-place" of Sin. The antiquity of the worship of Sin, and the reverence in which he was held, are indicated by the fact that the great goddess Ishtar, universally adored by the Semitic peoples, is called "the daughter of the Moon-god."

The first of the two small Seals here given shows Sin seated on his throne, holding a cup of wine in his right hand (Bel and Dragon, vv. 3,6 sqq.). A priest stands praying with uplifted hands before him; and, behind

No. I.-WORSHIP OF SIN. the priest, a worshipper whom he has brought into the god's presence. The symbol of the

No. II.-WORSHIP OF SIN AND SHAMASH. crescent moon attached to an inverted tree, suggesting the waxing or monthly growth of the moon's disk, establishes the identity of the god.

The second Seal shows Sin, the moon, and Shamash, the sun, enthroned opposite each other, and each holding a bowl of food or wine in the right hand. A king, holding a sceptre in one hand, and stretching forth the other towards Shamash, stands between. The symbols of the star and the crescent indicate the sun and moon respectively. Behind the

Sun-god is a tree with seven branches, suggesting perhaps the week of seven days, regulated by these deities (Fifth Tablet of Creation series; Gen. I. 14-i8). See also Sacred Trees.

The third Seal (of lapis lazuli) exhibits the worship of two eagleheaded deities, wearing feathered kirtles, and attended by priests in the like strange garb. An antelope and sacred tree fill up the picture.

No. III.-WORSHIP OF EAGLE-HEADED DEITIES.
[An old Babylonian seal of lapis-lazuli, in Mr. Ball's collection.]

## II.-THE SUN-GOD.

The worship of the sun is well illustrated by these three Seals. Most happily for the identification of the subject, on the first Seal the god, who reappears on the second without a name, is designated Dimmer utu (or Babar), Dimmer

No. I-THE GOD OF THE MOUNTAINS ( $l l$ Shaddé ). Satum, the Sungod, the god Shaddai.

Satum is a Babylonian pronunciation of shadîm or shaddê, "mountains"; and is equivalent also to Sati, which is explained bâmâtu," highplaces, hill-tops" (:- Heb.bâmôth). There can be little doubt that this old Babylonian title is the origin of the enigmatical Hebrew Shaddai, rendered "Almighty" in our version. El Shaddai, Gen. 17. I (A.V. the Almighty God), Exod.6. 3 (A.V. God Almighty), exactly corresponds to the Sumerian Dimmer Satum, Assyrian il shaddê. According to Amos 4. I3, God walks on "the bâmôth (A.V. highplaces) of the earth."

NO. IL-RUDER TREATMENT OF THE SAME SUBJECT AS No. I.

The great doors of heaven, surmounted by lions (representing perhaps, as in Egyptian mythology, Yesterday and To-day), are held open by attendant deities; and the morning sun is seen climbing over the mountains. Rays of light rise from his shoulders, and he grasps a re-

(It is possible that the scene above described represents two priests opening the doors of a shrine, within which the Sun-god was thus exhibited as rising over the mountains at day-break. The figure with folded arms on the right in No. I. would then be a worshipper.)

No. III. shows the same god, apparently ascending a temple-tower in four stages. Before him stands a sceptred king, in an attitude of reverence. Behind the god is an altar, on which is the linear symbol of grain repeated. Two tall figures, wearing shaggy hides-like the leopard-skins of the Egyptian priests-stand with raised arms, about to strike at the neck of a half-naked man who kneels between them. On one side of the victim is a bird of prey, ready to devour his flesh; on the other, a small antelope - a symbol of sacrifice. Above him is a trace of the winged solar disk. Clearly the scene represents a human sacrifice, either actual or symbolical (cf. Jer. 7.31; 19.5; 2 Kings 3. 27 ; 16. 3 ; 21.6).

## III.-THE GODDESS ISHTAR (Ashtōreth).

The great Oriental Venus, under one or other of her names-Ishtar in Assyria, Ashtöreth in Canaan, and Aphrodite amongst the Greeks-was common to all the religions of Western Asia ; it is, however, from Babylonia and Assyria that we obtain most information regarding this widely prevalent form of worship.

The cultus of the goddess Ishtar is extremely complex in its character, owing to the fact that in Assyria especially she was the goddess par excellence, and absorbed the attributes and epithets of many other goddesses of the older creeds.

The various forms in which she appears there may, however, be thus distinguished: she was the celestial goddess, the goddess of love, and the goddess of war.

In her celestial character the goddess represents, first, the crescent moon, and is called the " Daughter of the Moon-god." In this character she appears in the legend of the descent of Ishtar into the under-world in search of her lover Tammuz, or Adonis ; in this character,
Ezek. 8. 14; as Queen of Heaven, we find her worship practised by the
\& $44.15-28 . \quad$ Hebrew women and rebuked by Ezekiel and Jeremiah. The weeping for Tammuz, the Dumuzi of the Babylonians, was a great festival in Phoenicia, especially in later times in the glen of Abaka, "the vale of weeping," at the source of the Adonis river in the Lebanon. Tammuz was the youthful summer sun, the lover of the youthful moon, Ishtar, who was killed by the cruel tusk of winter. It was in this celestial character that Ishtar appeared as the "two-horned Ashtoreth" (cf. the name Ashteroth-Karnaim, i.e. the Ashtoretlis of the tweo horns, Gen. 14.5) with a crescent moon on her head like the Egyptian goddess Isis. The cakes offered to the Quecn of Heaven are often mentioned in the Babylonian religious texts. She was also the goddess of the planet Venus.

The second character of Ishtar, as the goddess of love and lust, is one of which we

SSITAR, THE (GOUDESS OF LON1:
have many examples in the Assyrian inscriptions. It was her special character as the Ishtar of Erech. The story of her amours is told in the sixth tablet of the Epic of Nimrod, where, like the Greek Circe, Ishtar changes her lovers into animals, by way of punishing them. Her temptation of Anu's gardener may contain the germ of the story of the Fall. Gilgamesh reproaches her thus:-
"Thou didst love Ishullanu, the gardener of thy Sire, Who constantly brought thee precious things (dainties), Daily adorning thy table. But when he lay down to sleep, thou wouldst bind (ensnare) him :'My Ishullanu ! come, let us eat (enjoy') thy manly strength, And let thy hand * come forth, and touch thou our middle !' Ishullanu answered thee :' Mc-what askest thou of me ? Mother, thou hast not baked; I eat not ! The food I shall eat is bad $\dagger$ and bitter ; Cold, numbness, darkness !'"-(Epic of Nimrod', Tal. VI., Col. II., 20 ff.)

In her character of goddess of war, Ishtar is but little met with in the Scriptures, being a distinctly Assyrian goddess, whose chief seat of

ISHTAR, THE GODDESS OF W,AR.
worship was in the city of Arbela. In this form she is represented as armed with the bow.

# A Stone Tablet pourtraying the Worship of the Sungod, and bearing an Inscription of Nabû-apla-iddina, King of Babylon. 

(Circ. в.c. 879-853.)

Ab̂̂-habBah, where this monument and other important remains of antiquity were found by the veteran explorer, Mr. Hormuzd Rassam, lies about I6 miles S.E. of Bagdad, and is the site of the old Babylonian city called Sippar in the inscriptions, the Sipphara of the Greek writers. The stone is about $\mathrm{II} \frac{1}{2}$ inches high by 7 inches broad and 2 inches thick. A grey terracotta box, inscribed on each side with words meaning Image of Shamash, the great Lord, Who dwelleth in E-Barra, some clay moulds of the upper portion of the stone, and two inscribed cylinders of Nabonidus were found along with it, buried beneath the asphalt pavement of the ruined temple.

In the inscription, Nabû-apla-iddina, or Nebo-baladan, as the Israelites would have called him, relates the former destruction of the sanctuary by the Suti, who are thought to be the Shoa of Ezek. 23. 23, and his own restoration of it and of the services and sacrifices. The vestments to be worn by the god on special days, c.g. the 7 th Nisan, are enumerated, ending with the statement, Total: six splendid robes of costly material, the King's Gift (Col. VI. 5, 6).

About 620 b.c., Nabopolassar, the father of Nebuchadnezzar, again restored the temple of Sippar, and by his orders the box was made for this stone, and also the moulds of the obverse, on the back of one of which he recorded his work. Finally, Nabonitus, the last king of Babylon, also repaired the temple, depositing his two cylinclers as a memorial of the fact.

This inscription is far from easy. I have translated the portion shown in the illustration from the text as published in The Cunciform Inscriptions of Western Asia, Vol. V., Plates 60, 6r. Mr. Pinches was the first to describe the stone: see T.S.B.A., Vol. VIII., Part 2.

## Translation.

Shamash, the great Lord, Who dwelleth in E-barra which is in Sippar, which owing to the troubles and confusions of the land of ACCAD the Sur $\hat{\text { U }}$-folk, an ill foc, destroyed, wrecking the sculptures: His laws were forgotten, and His figure and His ornaments disappeared (lit. Hed out of hands), and none was seen anymore. Simmas-shichu, king of Babylon, purposed to rebuild it, but He (the god) gave him not His countenance: His image and His ornaments he found (lit. saw) not; but the . . . of the Lord's Presence he . . . , and reestablished His Continual Offering. E.KUR-ShOma-ibaShshî, the Pontiff of Sippar, the Elder (?), he appointed to worship (?) in Bitr-ḤU.SHUL. HI (?). Under KaShShO-Nadin-aHi the king, that Continual Offering was cut off, and the lncenseoffering ceased. Under E-Ulbar-Shâkin-SHÛMi the king, E.Kur-shûma-ibashshî, the Pontiff of Sippar, the Elder, [Col. II.-] went before the king his lord: "The perpetual offering of Shamash hath ceased!"said he.-One cab of food, one cab of sesame wine, the victual of the Sag-zal (Chief Anointer ?) of E-Sag-gil, out of the perpetual offering of Bel, for Shamash he (the king) appointed ; and unto E.Kur-shûma-ibashshî, the Pontiff of Sippar, the Elder, he showed favour. The left portion of the garden-land on the border (?) of Gibilki (New Town?) which is within Babylon, unto Shamash he gave, and put E.Kur-shûma-ibashshî, the Priest of Sippar, the Elder, in charge of it.

Afterwards, NabÛ-APLA-IDDINA, king of Babylon, the called of Merodach, the beloved of Anu and Anatu, the rejoicer of the heart of Erua (Zêrbánitu), the brave hero, who came (?) to the kingdom, the bearer of the strong bow, the overthrower of the wicked foe the Sutû-folk whose sin was heinous; whom-that he might avenge the land of Accad, make the towns inhabited, [Col. II.-] found the sanctuaries, carve the carven work, fulfi] the divine laws and the statutes, reestablish the Continual offering, make splendid the Freewill-offerings,--the great Lord Merodach invested with a righteous sceptre to execute the shepherding of the people:-Shamash the great Lord, Who had long been angry with the land of Accad (and) had turned away His neck, in the reign of Nabû-apla-iddina king of Babylon did show compassion, and turned His face again. A sculpture (or model) of His image in tinted clay (?), His make and His ornaments, was found on the bank of the Euphrates, on the western side. Nabû-nadin-Shuma the Pontiff
Cf. 2 Kings 22.8. of Sippar, the Elder, of the seed of E.Kur-IbaShShî, the Pontiff of Sippar, the Elder, the sculpture (or model) of that image [Col. IV.-] unto NabU-apla-iddina, the king his lord, showed; and Nabû-apla-iddina king of Babylon commanded him to make that image.

In the sculpture, as will be seen, the Sun-god sits on a carven throne, in a shrine or Holy of Holies. In his right hand he holds a symbol indicating the straight course of the sun across the heavens. (But cf. the Egyptian $Q$ shen, circle.) Above are the symbols of the sun, moon, and the planet Venus, under which, and opposite the horned tiara of the god, is written, "Tiara of Shamash the Lofty of Eyes" (cf. Isa. 3. 8). The first line of inscription, above the symbols of the heavenly bodies, reads: " Sin, Shamash, and Ishtar, who dwell in Ocean (Zu.ab)." The two little figures under the throne are composite, and may be human-headed apes; cf. the Egyptian ape-attendants of the Sun. Before the shrine is an altar with a large solar disk, connected by ropes with two small figures on the top of the shrine (perhaps the genii who guide the sun along his celestial path). A priest is presenting the ling to the god. Behind

stands a third person, with hands uplifted in prayer. Over them we read : Salam Shamshi beli rabi Ashib E-Barra Sha kirib Sipar, i.c. "Image of the Sun-god, the mighty Lord, Who dwelleth in E-Barra ( Bit-shamshi, the House of the Sun ; cf. Beth-shemesh) which is in Sippar."

symbols of the sun, the planet venus, and the moon.

## Seal of Arad-Nabium.

As pointed out by Lenormant and Mr. Tomkins, this fine Seal seems to offer a striking parallel to some of the principal details of
Ezek. 1. the imagery of Ezek. I. It represents a god, like the Sungod in the preceding illustration, sitting on a throne which is supported by four winged man-headed bulls or cherubim (though only two are visible), on the deck of a boat, beneath which appear the waters of the ocean. This recalls the expression of the Sun-tablet from Sippar: "Sin, Shamash, and Ishtar, who

BOAT-GOD. dwell in the Ocean." The heavenly bodies appear to rise out of the ocean, and to descend into it again. Hence, Ocean and the Deep ( $A p s \hat{\imath}$ and Tiannat; page 2) are the parents of the gods of light. Hence also the classical myth of Venus rising from the sea, to which the subject of this Seal may present a parallel; for the planetary symbol is seen on each side of the throned god, and the terminal figures of the boat and the two emerging from the waves remind us of the Tritons of Greek sculpture, and may be supposed to be lifting the god and his ark above the water. Behind the seated god stands a small figure, who perhaps represents his divine messenger. A larger figure on either side appears to be making offerings. The boat terminates in human half-figures, and two others are seen in the water below. Possibly, the former pair are intended for oarsmen. The Seal belonged, as the inscription indicates, to AradNabium son of . . . . . , the servant (i.e. worshipper) of Nin-si-anna (i.e. Ishtar).

# ASSYRIAN WARFARE AND MILITARY ENGINES. 

## Assur-nāṣir-pal II. Besieging a "Fenced City," and, for comparison, Rameses II. and his three Sons Besieging a City.

The wheeled tower, from within which the battering-ram is worked, also carries bowmen and shield-bearers. Bricks or stones are falling from the breach in the wall of the beleagured place. The king

19. 32 ; Isa. 5. 28 . leads the assault in person, attended by his Tartan or Commander-in-Chief, his Rabshakeh or chief of the officers, and his Rabsaris or chief eunuch.

With this fine specimen of Assyrian sculpture compare the Egyptian wall-painting below it of "Ramessu meri-Amun, User-mant-Rā, sotep-en-RĀ," i.e. Rameses, beloved of Amun, Potent by the Law of Ra, Chosen of $R a$ ( $=$ Rameses II., see page 105), and his three sons assaulting a city in chariots (Isa. 3I. # Limestone Monolith of Assur-nāṣir-pal II., King of Assyria. 

(Circ. в.c. $885-860$.)
Layard found this fine monument in the ruins of the N.W. palace at Nimrüd, standing on a plain square pedestal, apart from the wall, with the altar before it. The altar,
 which has lion's feet and is much like a Greek tripod, may have been used for the worship of the royal image.

Within the arched frame incised in the stone the king is seen, clad in his sacrificial robes. Round his neck he wears the four sacred symbols of the crescent, the star, the trident, and the cross. A knotted cord girdles his waist, above which are shown the hilts of three daggers. In his left hand he holds a mace or sceptre, while his right is raised, with the forefinger extended. The position of the hand is probably a form of worship not unlike that used by some of the human figures when near the sacred tree. He seems to be adoring the symbols of the five planets which are sculptured between the head and the right hand.
The block is entirely covered, except on the sculptured parts, with well-graven inscriptions relating the history of the king.

## Royal Hunting Scenes.

The old Egyptian and Assyrian kings were as proud of their feats in the chase as in the battlefield. In Gen. ro. 9 the legendary founder of the Babylonian monarchy is called a mighty hunter before the Lord (cf. page 44, supra).

AN EGYPTIAN LION HUNT.
The superior truth of the Assyrian portraiture of the royal beast becomes manifest at a glance. It is evident that the Assyrian sculptors

ASSUR-NTSTIR-PAL HUNTING THE LION.
were familiar with lions. The artists may have been permitted to witness some of the royal hunts; they may also have made their sketches from captive specimens (scc opposite). The lions of Assyria were gradually thinned down, and perhaps became extinct in the country. Individual kings killed great numbers of them ; thus, Tiglath-pileser I. (B.C. II20), boasts of having slain as many as nine hundred and twenty lions. The passage is worth translating, as it informs us what other large game the old kings hunted.

LION HUNT.

I brought. Ten strong bull elephants, in the land of HaRRAN and the basin of the Habor, I slew. Four elephants I took alive. Their hides, their ivory, along with the living elephants, to my city Asshur I brought. At the bidding of NiNiB who loveth me, 120 lions, in my daring courage, with the assault of my prowess, on my feet I slew ; and 800 lions from my chariot I laid low. All kinds of wild beasts and winged birds, the prize ( $e-i m$, cst. of immu ?) of my catching, I heaped up." (Prism-Inscription, Col. VI., 58-84.)

Lions seem to have become so scarce in Assyria that, by the time of Assur-bani-pal, they had to be imported and kept in cages for the royal hunting-days. They are still found in the basin of the Habirr, and have been seen among the ruins of Babylon.

## The Black Obelisk of Shalmaneser II., King of Assyria.

(B.c. $860-824$.)

This famous monolith, now in the British Museum, was discovered at Nimrind, the ancient Calah (Gen. ro. II), the royal city of the Middle Assyrian Empire. a long record of thirty-one jears of maneser II., king

By comgreat Lord, my Lord, I effected their rout. saddle-horses, their intook from them; 20,500 the sword I laid low."

Compare with this epitome the fuller narrative of the stele of the same monarch, found at Kurkh, S. of Diarbekir, and now in the British Museum (W.A.I. III. 8. 78 sqq.) :-
"In the eponym-year of Daian-Asshur (B.C. 854), in the month Iyar, on the I4th day, 1 set out from Nineyeh, crossed the Tigris, approached the citics of (;iammu, on the Balich. They were afraid of the terror of my lordship, the glancing of my strong weapons, and with their own weapons killed Giammu their lord. I entered Lillala and Til-sha-Salachi. I brought my gods into his palaces; a feast in his palaces I made. The treasury I opened, his hoard I found, his goods and substance I spoiled, to my city of Ashur brought them. From Lillala I set out, approached Kar-Shulmanuasharid ; in boats of sheepskin I crossed the Euphrates in full flood a second time. The tribute of the kings of that side of the Euphrates, Sangar (Shamgar) of Carchemish, Kundashpi of Kumuch (Commagene), Aramé son of Gusi, Lalli of Melidi (Melitene), Chayani son of Gabari, Garparuda of Patin, Garparuda of Gurgum, silver, gold, tin, copper, vcssels of copper, at Asshur-uttir-aṣbat on that side of the Euphrates, above the Sagur (Sajur), which the Hittites call Pitru (Pethor), I there received. Setting out from the Euphrates, I approached Halman (Alcppo) ; they dreaded battle, clasped my feet. Silver, gold, their tribute, I received; offerings before Rimmon of Halman I made.
"Setting out from Halman, I approached the cities of Irchulêni of Hamath: Adennu, Bargâ, Arganâ, his royal city, 1 took; his spoil, his substance, the goods of his palaces, I fetched out; I set fire to his palaces. Setting out from Arganâ, I came to Qarqara: Qarqara, his royal city, I wrecked, razed, burnt with fire. 1,200 chariots, 1,200 saddlehorses, 20,000 men of Addu-'idri of Damascus, 700 chariots, 700 saddle-horses, 10,000 men of Irchulêni of Hamath, 2,000 chariots, 10,000 men, of Ahab of Israel ( $A, k a \cdot a b . b u$ mât Sir.'i. la. aa), 500 men of Guê, $\mathrm{I}, 000$ of the land of Murri (in Cap力adocia), io chariots, $\mathrm{Io}, 000$ men of Irqanat, 200 men belonging to Matinu-Ba'li (Mattan-Baal; cf. Mattan, 2 Kings II. 18), of Aryad, 200 men of Samsanata, 30 chariots, 10,000 men of Adunu-Ba'li (AdoniBaal) of Shiânu (the Sinite, Gen. 10. 17), 1,000 camels of Gindibu'u the Arabian, 1,000 men of Ba'sa (Baasha) son of Ruchubi (Rehob) the Ammonite,-these twelve kings he took to help him ; to make war and battle they came to meet me. With the august forces which Ashur the Lord bestowed, with the strong weapons which Nergal who marcheth before me conferred, I fought with them ; from Qarqara to Gilzau I routed them. I 4,000 of their fighting men with the sword I laid low; like Rimmon, I rained a storm upon them, spread their carcases far and wide, covered the ruins with their numerous troops, shed their blood with the sword : the low ground (mushipatu) was narrow, the field too confined (?) for the slaughtering of them ; the broad plain was used up for burying them by their people. I reached the Arantu (Orontes) before turning back. In that engagement I took from them their chariots, their saddle-horses, their horses harnessed to the yoke."

In the eighteenth year of his reign, that is b.c. $8_{+_{2}}$, the king made war against Hazael, king of Damascus. The record of this on the obelisk
is very short; but a longer account is given on one of the pavement slabs from Calah. It reads as follows :-
"In the eighteenth ycar of my reign for the sisteenth time I crossel the Euphrates; Hazael of Damascus trusted to the strength of his armies, and mustered his troops in full force. Senir (Hermon), a mountain summit which is

SUBMISSION OF JEHU, SON OF OMRI. in front of Lebanon, he made his stronghold. I fought with him, his defeat I accomplished, 6000 of his soldiers with weapons I laid low; II2I of his chariots, 470 of his horses, with his camp, I took from him. To save his life, he retreated; I pursued him ; in Damascus his royal city I shut him up. His plantations I cut down. As far as the mountains of the Hauran I marched. Cities without number I wrecked, razed, burnt with fire. Their spoil beyond count I carried away. As far as the mountains of Baal-Rosh, which is a headland of the sea (at the mouth of the Nahr el Kelb, i.e. Dog River), I marched; my royal likeness I there set up. At that time I received the tribute of the Tyrians and Sidonians, and of YahUa (Jehu) the son of Khumri (Omri)."

## Scenes from the Black Obelisk.

The bas-reliefs on the obelisk represent the tributes received by Shalmaneser II. from the various nations, whose submission is recorded by the inscription.

1. Tribute of Zua, king of Cozan (2 Kin, 17.6).
2. Of Jelu, " son of Omrl," king of Istael.

In the illustration on the opposite page the upper relief records the payment of tribute by Zua, king of Gozan (2 Kings 17.6); the lower relief represents the embassy of Jehu, humbly offering to the great king
" the tribute of YahUa ( $/ c^{\prime} / u$ ) the son of KHUMRI (Omri), bars of silver, of gold, basons of gold, bowls of gold, cups of gold, flagons (lit. buckets) of gold, bars of lead, a royal sceptre, and spearshafts (?)."

Indian elephant and apes, the tribute of the Armenian Muzri (cf. I Kings 10. 22).

In the above picture is represented the tribute of the MUZRI, comprising an elephant and apes of various kinds (cf. I Kings 10. 22). It is important to notice that the Assyrians knew of a northern as well as a southern Muzri (Egypt). The former lay in N. Syria, between the Orontes and the Taurus range; and it is this country which seems to be intended in 1 Kings 10. 28; 2 Kings 7. 6. See Winckler, Alttestamentliche Untersuchungen, page 172.

## Inscribed Statue of Nebo, the Babylonian God of Letters.

Nebo or Nabû, i.e. the Prophet, was the Babylonian god of learning and the special patron of the scribes. His great sanctuary
Isa. 46. 1, 2. was the temple called E-Zidda at Borsippa, the principal seat of learning in Babylonia (see pages 201, 203, 219, 221). In the prophecy (Isa. 46. r) Nebo represents the scribe and priest caste, as Bel represents the civil powers.

The statue in the illustration was erected by the governor of Calah, named Bel-tarzi-iluma, for the preservation of the life of the Assyrian king Rimmon-nirari III. (b.c. 8iz783 ) and his wife Sammuramat (Semiramis), who were contemporary with Jeroboam II.

The titles of Nebo are interesting. In this inscription he is called the master of devices or skilled in (artistic) designs; the All-knowing; the broad-eared, i.e. widely receptive, intelligent (elsewhere the open-eared); the wielder of the writing-reed; holder of the measuring-rod; He whose it is to make to know and to divine (aright); without whom no counsel is taken in heaven. The close is remarkable: Man of the future! in Nebo trust ! in another god trust not! The wife of Nebo was Tasmit, "hearing," evidently in the sense of the "pupil" or "student."

# Tiglath-Pileser II. (III.). 

$$
\text { (в.c. } 745-727 . \text { ) }
$$

This monarch, who usurped the throne of Assyria in b.c. 745, was a Babylonian prince formerly known by the name of Pūlu, the Pul of 2 Kings 15.19 , and the Porus of the Canon of Ptolemy. In his annals, now preserved in the British Museum, he mentions Rezin, king of Damascus, Menahem, and Pekah, kings of Israel, and Azariah (or Uzziah), king of Judah. It was this very king who first introduced the system of the deportation of the inhabitants of conquered lands; a precedent afterwards followed by Sargon II. (в.c. 721) in the case of Samaria, and by Nebuchadnezzar in the case of Judah and Jerusalem.

The cuneiform text of the sculptured slab represented in the plate is part of a fragment of the annals of Tiglath-pileser II. The preceding lines may be rendered as follows :-
"The tribute of Kushtashpi of the city of Kummuch, Raṣumnu (Rezon) of the land of Damascus, Menilhimme (Menahem) of the city of Samerina (Samaria), Hirummu (Hiram) of the city of SSurru (Hcb. Then follows what we read here, though in a more or less mutilated shape, viz:-
"(fa)t (sheep), whose fleeces were dyed red-purple, flying birds of the air, whose wings (were dyed to a blue-purple; horses, mules), oxen and sheep, he-camels, she-camels along with their young, (I received. ## Official Records of Tiglath-Pileser II.

(A Large clay tablet inscribed on both sides, found in the ruins of the king's palace at Nimrîd, the ancient Calah, and now in the British Museum.) In this tablet, which is most unhappily broken across the middle, the king relates the course of events to the seventeenth year of his reigy (в.c. 729). The original text is published as Plate 67 of the second volume of the Cunciform Inscriptions of Western A sia. In translating from this, I have not thought it necessary to note the lacunæ supplied from a duplicate (see Schrader's Kcilschriftliche Bibliothck, Band II., pages 8 sqq.), but only my own conjectures, which are not very numerous.

Since writing the above, I have had the advantage of comparing my text and translation with those of Dr. Paul Rost in his special edition of the inscriptions of this monarch.

## Old Babylonian Seal of Sin-Iqisha, "the Servant of the Lord of the Foundation-stone" (i.e. Sin), who was probably a Priest or Scribe.

A priest is offering a goat to the statue of a god, behind which is the figure of another god, resembling the Egyptian Bes, mounted on a stand for carrying in processions.

In the illustration, page 173, Gods carried in procession by Assyrian warriors, we have a vivid commentary on such passages as Hos. io. 6;

[^35]Jer. 43. 12; Isa. 46. I, 2, 7; Baruch 6. 48, 57 ; sec also 2 Kings 18.

JACKAL-HEADED GOD
Found in the Palace of Sargon II. at Khorsabad, whither it had been probably brought from Egypt. 33, 34 ; Isa. Io. I 1. A later Assyrian king, Assur-bani-pal, has recorded that when he conquered Elam and took Susa, he recovered the image of the goddess Nanā, which had been carried off from her temple in Erech by Kudur-Nanhundi, king of Elam, 1635 years previously (i.e. about B.C. 2280). Assur-bani-pal also carried off the principal Elamite gods.

We do not know from which of the cities taken by Tiglath-pileser II. (III.) the gods pourtrayed (see page 173) were borne away; nor can we certainly say what gods are represented in the sculpture. The standing figures with four horns (a symbol of the sun's rays; cf. Hab. 3. 4), and holding an axe (Baruch 6. 15) and thunderbolt (see page 9), is probably Bel-Merodach. The throned goddesses may be Ishtar and Zêrpânit, wife of Merodach, or Beltis, the wife of the elder Bel, i.e. the great mother, or mother of the gods. The figure within the covered throne seems also to be a goddess.

## The Old Aramean Inscription of Panammû. ${ }^{\text {s }}$

 (8th century b.c.)This and other relics of ancient Aramean culture, including a large statue of the god Hadad erected by Panammû I., and an inscribed bas-relief of BarRekûb, who erected the present memorial stele in honour of his deceased father, Panammû II., were found by Dr. von Luschan in the course of his excavations in the neighbourhood of Zengivl̂ in Northern Syria in r888-1891, and are now in the Berlin Museum. These monuments are of the highest value, as proving that the old Aramaic tongue resembled the Hebrew far more nearly than its modern forms in the books of Ezra, Daniel, and the Targums would indicate; while the written characters are, as a whole, practically identical with those of the Moabite Stone and the oldest Phœnician inscriptions. An interesting feature is that the letters are cut in relief, like the so-called Hittite inscriptions, instead of being incised on the stones.

Sham'al or Sam'al is often mentioned in the Assyrian historical inscriptions, from b.c. 859 downwards. The country lay in the N.W. corner of Syria, between the lake of Antioch and Marash. Tiglathpileser III. twice mentions Panammû (II.) of Sam'al, among the tributary princes of the West ; firstly, in a list of those who paid him tribute in B.C. 738, which includes Kushtashpi of Kummuḥ or Commagene, Rezin of Damascus, Menahem of Samaria, Hirom of Tyre, Pisiris of Carchemish, Eniel of Hamath, Tarhulara of Gurgum, and others; and secondly, in another list recording the tributes (B.c. 734) of Mattan-baal of Aryad, Sanibu of Ammon, Salamanu of Moab, Mitinti of Askalon, Jehoahaz ( = Ahaz) of Judah, Qaushmalaka of Edom, Hanun of Gaza, and other kings.

The inscription on the stele of Panammû is unhappily too much injured for consecutive translation. It seems to give some details of the family history of the royal house of Sham'al before the Assyrians appeared

[^36]on the scene-a story of confusion and bloody usurpation (cf. 2 Kings $9 \mathbb{\&}$ ro), followed by a period of order and prosperity under Panammû. It then goes on to tell how Panammê, as a trusty vassal, helped Tiglathpileser in his wars, and was rewarded by the gift of some towns in the adjacent country of Gurgum ; dying afterwards, apparently in the camp before Damascus, which the Great King was besieging (b.c. 733). His death was mourned by the whole army. The author of the inscription adds that because of his own and his father's "righteousness" the king of Assyria seated him on his father's throne; whereupon he erected this monument as a memorial of his father.

THE INSCRIPTION.

The following selections will give some idea of the general tenor of the inscription:-
"This statue Bar-Rekûb set up for his father Panammû, son of Bar-Şûr . . . . . . .
As for his father, the gods of Ja'dî delivered him out of his dungeon.
[For . . his younger brother had conspired ?] in his father's house, and slain Bar-Ṣ̂ur, his father; and he slew seventy of his father's brethren (?)

And the remnant thereof died, filling the prisons. And he made the wasted cities more numerous than the inhabited cities . . . . . ."

The parricide seems to have issued in civil war, followed by dearth and famine.

Then (line 7)-
"The king of Assyria" is mentioned who, apparently, "made him (Panammû) king over all the house of his father; and he slew [the conspirators ?], and clestroyed out of his father's house

And opened the prisons, and loosed the captives of Ja'lî . . . . . . [and rebuilt] the house of his father, and made it fairer than aforetime. And the wheat and the barley and the spelt and the millet were multiplied in his days; and at that time food [was abundant].
. . . . . . . . . . . and he exalted (?) my father Panammî among the kings of Chebar.

And my father, though he was an owner of silver and an owner of gold, in his wisclom and in his rightcousness he held mouth to the skirt (i.c. kissed it) of the Lord, the king of Assyria . . ."
(The "righteousness" of Panammû and his son may be contrasted with Zedekiah's breach of fealty, 2 Kings 36 . I3, which was solemnly condemned by the prophets, Ezek. 17. I2-2I.)
" . . . . . . and the Lord, the king of Assyria, suffered him to make war against the kings of Chebar . . . . [And he ran]

By the chariot-wheel of the Lord, Tiglathpileser, king of Assyria (cf. I Sam. 8. II ; 2 Sam. 15. I; I Kings I. 5), who made war(?) from the rising of the sun to the setting thereof, [and became lord?]

Of the four quarters of the earth; and the produce of the East was the tribute of the West, and the produce of the West the tribute of the East. And as for my father,

The Lord, Tiglath-pileser, king of Assyria, [added to] his borders some cities of the borders of Gurgum . . . . . And my father Panammû, son of Ba [r-Sûr]

Fell sick;* yea, my father Panammû died among the troops (or during the campaign) of the Lord, Tiglath-pileser, king of Assyria, in the camp . . . . .

And his royal . . . wept for him; and the whole camp of the Lord, the king of Assyria, wept for him. And the Lord, the king of Assyria, took

His corpse (?), and appointed a mourning (?) for him on the way, and conveyed my father from Damascus to (his own) place.

And all his house [wept] for him. And as for me, Bar-Rekûb, son of Panammû, because of my father's righteousness and because of my own righteousness the Lord, the king of Assyria, made me to sit [on the throne]

Of my father Panammû, son of Bar-Ṣ̂̂r ; and I set up this statue [for a memorial of my father], for Panammû, son of Bar-Ṣûr, and built [a chapel ?] . . . . . ."

BROKEN STATUE OR STELE OF PANAMMO II.,

"And this memorial is the portion (?) of Hadad and El and Rekûb-El, the Lord of the House, and Shemesh and all the gods of Ja'dî. [And cursed be he who shall destroy this memorial which I have set up]

For my father, before my gods and before men!"

[^37]The close affinity of the language here to that of the historical books of the Old Testament must strike every reader. There is also an affinity of religious ideas; and it is especially interesting to observe that these old Aramean kinsfolk of the Hebrews worshipped not only Hadad, the god of Damascus, and Shemesh, the Sun ( $c f$. Beth-shemesh), but El, "the mighty," and Sûr, "the Rock," both of which are well known Biblical designations of God. Resheph, too, was one of their deities (cf. Hab. 3. 5; Ps. 76. 3 ; and page 247) ; but perhaps the most noteworthy of all the Divine names in these inscriptions is Rekûb-El, "God's Chariot," i.e. evidently, the cherubic bearer of the Deity (cf. Ps. 18. 10: "He rode on the Cherub," where the Hebrew combines rakab, to ride, and kerub, cherub; also Ps.68. 17). The god Rekûb-El is called "lord of the house," as guardian of the palace, like the Assyrian cherubim which guarded the king's doors (see Cherubim). The notion of a winged bearer of deity travelled further east, and is found in the Garuda, the winged and beaked bearer of Vishnu, of which we give a characteristic representation.

## Broken Cylinder of Sargon II., King of Assyria.

> (в.с. 722-705.)

These fragments were found in that great store-house of Assyrian literature, the Library or Record Chamber of Assur-bani-pal (see page 200), the great-grandson of Sargon II., one of whose campaigns they chronicle.

BROKEN CYLINDER, WITH INSCRIPTION OF SARGON, KING OF ASSYRIA (11.c. 722-705).

Azuri, king of Ashdod, had conspired with his neighbours to throw off the yoke of Assyria; and Sargon had deposed him, and made his brother Ahimiti ( : Ahimoth?) king in his place. But the disaffected princes and peoples of Palestine would not recognise Sargon's rassal-

king, and set Yamani on the throne of Ashdod. (Judah, Edom, and Moab were in treasonable correspondence with "Pharaoh, the king of Egypt, a prince who could not deliver them," as Sargon himself says, in language vividly reminding us of Isa. 30. 5, 7.) Without waiting to muster his entire forces, Sargon at once marched against Ashdod. Apprized of his

Sargon repeopled the towns with foreigners from other conquered places and appointed a governor. Afterwards the king of Ethiopia, overawed by the might of the Great King, sent Yamani in chains to Assyria.

## SENNACHERIB.

(в.c. 705-68ı.)

## Record of the Invasion of Judah and the Siege of Jerusalem.

The famous Cylinder of Sennacherib is a six-sided cylinder of terra cotta which was found at Nineveh. Before its acquisition by the British Museum, it was in the possession of Mr. Taylor; and it is known as the "Taylor Cylinder" among Assyriologists. It contains a record of eight years of Sennacherib, including his third expedition, b.c. 70r, which was directed against the kings of Phœenicia and Palestine,
2 Kin. 19.9. who had been incited to revolt by Tirhakah, king of Ethiopia. The Phœnician cities surrendered to the invader, while the king of Sidon fled to Cyprus, then largely colonised by Phœnicians; Judah and Philistia, being nearer Egypt and expecting help from thence, held out. Askelon was first captured, and Zedekiah its king taken prisoner and sent to Assyria, while the Philistine towns of Beth-Dagon, Joppa, Bene-berak, and Azur, also fell. The people of Ekron had revolted against Padi their king, because he had sided with the Assyrians, and had dethroned him and sent him in chains to Hezekiah. A pitched battle, in which the allies were aided by the chariots of the kings of Egypt and their overlord, the king of Ethiopia, was fought at Eltekeh, and terminated in a victory for the Assyrians. The turn of Judah now came, and this is best described in the words of the inscription :-

[^38]siege-towers), the attack of the foot-soldiers, mines, bills, and axes. I brought out from the midst of them, and counted as spoil 200,150 persons, young and old, male and female, horses, mules, asses, camels, oxen, and sheep, without number. As for himself, I shut him up like a bird in a cage in his royal city of Jerusalem. I built a line of forts about him, and whocrer came forth from the gate of his city, I punished. His cities which I had plundered 1 severed from his territory, and gave them to Mitinti king of Ashdod, Padi king of Ekron, and Zil-baal king of Gaza; and so I diminished his territory. To their former annual tribute I added an impost of presents to my Lordship, and laid it upon them. Him, Hezekiah, the fear of my august Lordship cast down ; and the Arabians (?) and his trusty warriors whom he had brought in for the defence of Jerusalem his royal city, fell away. Along with 30 talents of gold (and) 800 talents of silver, he caused to be brought after me precious stones, carbuncles, kass $\hat{u}$ stones, great pieces of lapis lazuli, ivory beds, ivory thrones, elephant hides (and) tusks, ushu wood, box-wood, all sorts of things, a huge treasure, and his own daughters, the women-folk of his

CYIINDER CONTAINING THE ACCOUNT OF SENNACHERIB'S INVASION OF JUDAH. palace, men-singers, women-singers, to Ninexeh the city of my Lordship; and he despatched his envoy to pay the tribute and do homage" (cf. Isa. 36 \& 37).

The Scriptural and monumental accounts complete and supplement each other. Sennacherib makes no mention of the disaster which befell the Assyrian host ; but it is evident that he did not take Jerusalem, for the tribute was sent after him to Nineveh, not, as in the case of the captured city of Lachish, brought to him before the city. Besides, had he done so, he certainly would not have omitted to state the fact. There may at first appear to be a contradiction in the amount of the tribute. In 2 Kings 18. 14 the
2 Kin 18.14. tribute is given as "three hundred talents of silver and thirty talents of gold"; while in the inscription it is " eight hundred talents of silver and thirty talents of gold." The difference is possibly to be accounted for by the Assyrians and Jews using two different silver tariffs, but more probably by corruption of the Hebrew text. There is no difference in the gold standard.

## The Storming of Lachish in Judah, with Sennacherib Receiving the Spoils and Captives.

This fine series of sculptures from the ruins of Sennacherib's palace at Nineveh, now in the British Museum, represents the assault and surrender of Lachish (2 Kings 18. 13, 14 \& 19. 8) ; a stronghold of the ancient Amorites (Josh. 10. 3), which retained or regained its importance in the times of the Judean monarchy, having been fortified by Rehoboam ( 2 Chron. II. 9; cf. 2 Kings 14. 19, Mic. I. 13). It was one of the sites reoccupied by the restored exiles after the Babylonian captivity (Neh. II. 30).

In the first portion of the bas-reliefs (page 19I) we see the fenced city on its heap (tēl; cf. Jer. 30. I8, and page 194), its towers filled

INHABITANT OF LACHISH HURLING A LIGHTED TORCI FROM THE WALL. with archers, and others who rain lighted torches upon the wooden cars under cover of which the bat-tering-rams are worked,* and upon the tall wicker screens behind which bowmen and spearmen and slingers are assailing the defenders. Here and there scaling-ladders are reared against the walls. From the principal gate captives are issuing; and in the immediate foreground two soldiers are in the act of impaling a youthful prisoner, side by side with his father and brother-an atrociously cruel mode of execution, practised by the Assyrian kings on important captives (see page $173,1.16$ ), and still in vogue among the Turks until quite recently.

[^39]

THE STORMING OF LACHISH BY THE TROOPS OF SENNACHERIB, KING OF ASSYRIA (2 Kings 18. 13, 14, 17; 19. S).
[Sculpture from the rwins of Sennacherib's palace at Nincveh.]

Herodotus relates that when Darius took Babylon, he impaled about 3,000 of the chief men of the city (iii. I59).

In the second portion of the sculptures (page 193), Sennacherib sits on his splendid throne of bronze and carven ivories, while his great officers present the prisoners from the fallen city. Above is the inscription :-
"Sennacherib, king of the world, king of Assyria, sate on a throne, and caused the spoil of Lachish to pass before him."

The victorious monarch grasps bow and arrows, the speaking symbols of his warlike prowess and recent success (cf. Gen. 48. 22; Isa. 5. 28 ; 2 Kings 19. 32 ; and see the plate facing page 200, where Assur-banipal holds his bow and arrows over the lions he has killed in the hunt). Behind the throne stand two eunuchs, holding fly-flaps over the king's head; and behind them is a large tent, over which we read:
"Tent of Sennacherib, king of Assyria."
Below is the great king's chariot with its attendants, one of whom carries a state umbrella; and on the left, some captives are being despatched. Palms, vines, and olives adorn the landscape. The distinctly Jewish type of face of the inhabitants of Lachish should be noticed. During his explorations at Tell el-Hesy (page 194), Professor Petrie discovered the steps and guard-house of the great gate of Lachish, through which the prisoners are represented as passing to surrender (see the Plate, page 19I).

SUBMISSION OF THE PEOPLE OF LACHISH.
Upon the whole, in spite of the total absence of perspective in the design, it will be recognised that these relics of ancient art convey a powerfully realistic impression of the incidents they were intended to commemorate.

# Mound of Tell el-Hesy, the Site of the Ancient Lachish. 

The mound of Tell cl-Hesy is situated a short distance north-east of Gaza. In 1888 digging was commenced here by Dr. Flinders Petrie on behalf of the Palestine Exploration Fund, and has been subsequently continued by Mr. W. Bliss, who named it "a mound of many cities." The exploration led to the identification of the site as that of Lachish, and this has been subsequently confirmed by the discovery of a cuneiform letter which mentions Zimrida, a governor of Lachish (see page go).

The excavations, carried downwards 60 feet from the top of the Tell, i.c. heap, to the rocky platform of the original site ( 60 feet above the stream), revealed a regular series of ruined cities one above the other, eight or nine in number. The uppermost of these ruined cities belongs to the later Jewish period, representing the city destroyed by Nebuchadnezzar, below which were the ruins of the city besieged by Sennacherib in b.c. 7or. Below this, again, were the ruins of an older town, probably of the age of the Judges; and at a still greater depth the yet older settlement of the pre-Israelite age of the Amorites. The ruins
Deut.1.28. of this portion were very carefully explored, and show that the Amorite city was a fortress of great strength, walled up to heaven. The walls were over 20 feet thick and built of mudbricks sun-dried. When such buildings fell into ruins the roofs and upper portions of the walls resolved themselves into a mass of crumbling earth, which effectually protected and preserved the lower portion of the houses, as well as all but the most fragile of their contents. On these "heaps" (cf. Jer. зо. 18) of rubbish the subsequent inhabitants built their new city; and so as city after city fell into decay it made a foundation for its successor, and buried its own records, to be unearthed by explorers.* In the centre of this portion Mr. Bliss found the remains of the residence of the governor, with a kind of primitive barrack before it.

In one of the excavated chambers of this building was found a small clay tablet, in shape and style of writing resembling those found at Tell el-Amarna (see page 86, supra). This tablet is most important, as it shows that the cuneiform writing was in common use in Palestine about b.c. I 400 ; a century before the conquest by the Isratites.

# Monolith with Sculptured Portrait of Esarhaddon, King of Assyria. 

(Circ. 68i-668 в.с.)
This monument was discovered in the ruins of Singirli, north of Antioch, in the Taurus range, which represents the ancient city Sam'al, the capital of a Hittite, and afterwards of an Aramean, kingdom. Upon the front of the monolith we have a representation of Esarhaddon in his royal robes, with two figures at his feet. The first of these is a negro, whose hands and feet are bound with fetters, and who kneels in a suppliant attitude before the king. This, the inscription informs us, is
2 Kin. 19.9. Tirhakah, king of Egypt and Ethiopia, while the standing figure is probably the king of Sam'al. In front of the king's head are a number of figures of the gods invoked in the inscrip-tion-Bel, Rimmon, Merodach, and the goddess Ishtar (Ashtoreth cf. pages I53, I54), represented as standing on the backs of animals.

The inscription is of great importance, as it relates the defeat of Tirhakah by the Assyrians, and the siege and capture of Memphis (Hos. 9. 6, Heb. Moph, Isa. 19. 13, Noph), and enables us to

Isa. 19. 4. identify Esarhaddon with the cruel lord and fierce king of Isaiah's prophecy. The description which the king gives of the campaign is short but graphic :-
"As for Tirhakah, king of Egypt and Ethiopia, the favourite (lit. protégé) of their great deity, from Iskhupru to Memphis his royal city, a march of fifteen days, daily without ceasing great numbers of his warriors I slew ; and himself five times with arrow [and] spear I struck with deadly stroke. Memphis, his royal city, in half a day with war engines I besieged, captured, wrecked, razed, burned with fire."

The Babylonian Chronicle informs us that the capture of Memphis took place on the 12 th Tammuz (June-July), in the roth year (i.c. b.c. 670).

In this inscription Esarhaddon styles himself
Isa. 11.11. King of Egypt (Muzur; cf. the Hebreze Mizraim), Pathros (Patu-risi, "the South Land," Egyptian Pe-to-res), and Cush (Küsu).

The monument supplies an interesting illustration of the custom referred to in Isaiah-Therefore reill I put my ring in thy
Isa. 37. 29. nose, and my bridle in thy lips. This cruelty to captives of distinction was much practised by the Assyrian kings, especially Sargon, Sennacherib, and Esarhaddon.

# ANCIENT MONUMENTS OF THE PERIOD OF THE CAPTIVITY OF JUDAH. 

India House Inscription of Nebuchadnezzar II. (the Great), King of Babylon.

$$
\text { (в.с. } 605-56 \text { I.) }
$$

This inscription, which was found among the ruins of Babylon, is now in the India Office. It consists of six columns of archaic writing in excellent preservation. It contains the name and titles of Nebuchadnezzar II., the son of Nabopolassar, and a record of all the great public works he undertook during his long reign for the improvement of Babylon. It gives an account of the rebuilding of more than twenty temples in Babylon and Borsippa, of the strengthening of the fortifications of the city, and of the making of the great quays beside the river.

The inscription thus shows us that the question of the Babylonian king, Is not this great Babylon that I have built? involves no exaggeration :

Dan. 4. 30. for the king certainly rebuilt not only the city of Babylon, but almost every great temple and public building in Babylonia. Hardly a single mound throughout the whole of the land has been opened in which bricks bearing the name of this ireat king have not been found. They are mostly cemented with bitumen (kupru), the "slime" of Gen. ir. 3 .

Among the works recorded here the principal is the restoration of the two great national temples-that of Nebo at Borsippa, called E-Zidina, i.e. The lasting house, and the great temple of Bel Merodach

## Cylinder with Inscription of Nebuchadnezzar II.

 (the Great).This finely moulded and well-written cylinder, which is now in my own collection, records the restoration of E-Barra, the Temple of the Sun at the ancient Sippara (see page 155). It is the most perfect of several which were disinterred from the ruins at $A b \hat{\imath} H a b b a h$; and dupli. cates of it exist in the New York Museum of Art and in the British Museum. The script is archaic Babylonian. It was customary to bury such documents in the foundations of temples; much as we deposit newspapers and other articles under the foundation stones of public buildings at the present day (see pages 207, 210, 211).

The large space occupied by accounts of building and rebuilding temples and palaces in the inscriptions of this great king illustrates the narrative of the similar works of Solomon. Here, also, the completion of the temple is followed by the king's prayer, as in the case of the Israelitish monarch.

The following is a version of the text, which, as will be seen, presents many striking parallels to the phraseology of Scripture :-

#### Abstract

"Nebuchadnezzar, the ling of rightcousness, the humble, the lowly, who hath knowledge of the fear ( = worship) of the gods, who loveth justice and righteousness, who seeketh after life, who putteth in the mouth of the people the fear of the mighty gods; who setteth in order the temples of the gods; who keepeth up E-SAGILLA and E-Zidida (see pages 169 , 201, 203, 219,22 ), the true son of Nabopolassar, king of Babylon, am I.

When Merodach, the mighty Lord, to the lordship of the land lifted me up, and called me an exalted name that I might keep up the cities and renew his temples-at that time, E-Barra, the House of the Sun in Sippara, which had fallen into decay long before my time, was like unto a ruinous heap; Shamash, the mighty Lord, to no former king had shown favour and bidden him to rebuild it. I, the prayerful, the wise, the suppliant, the worshipper of His Godhead, -of the building up of that House my heart bethought itself. I waited for Shamash, I lifted up my hands, I prayed to Shamash, for the building up of that House E-Barra I besought Him ; and Shamash, the mighty Lord, accepted the lifting up of my hands and hearkened unto my prayers. To build up that House, the shrine of Shamash, Rimmon, and Merodach, I decreed; Shamash, Rimmon, and Merodach, for the building up of the House E-Barra, implanted abiding grace in my mind. For Shamash the Lord, the Judge supreme of heaven and earth, the mighty warrior, the glorious hero, the Lord who ordereth aright the decisions of justice, the mighty Lord, my Lord, His House E-Barra in Sippara with gladness and shouting for joy I rebuilt.

'O Shamash, mighty Lord, when Thou joyfully enterest E-Barra, Thy shining House, rightly regard the costly work of my hands, and let blessings for me be on Thy lips ! by Thy just command let me be satisfied with offspring ! life unto far off days [and] a sure throne be granted me! my shepherding be long, lengthening out for ever! A righteous sceptre, a good shepherding, a just staff of rule, prospering the people, adorn my kingdom for ever ! Amid the fierce weapons, the onset of battle, overshadow Thou my people! Do Thou, O Shamash, by judgment and vision rightly answer me! by Thy glorious Word, which cannot be made void, may my weapons attack [and] strike home; [and] the weapons of my foes may they dash in pieces !'"

## Cameo Portrait of Nebuchadnezzar II.

This Greek-looking head is engraved on a black stone. The circular inscription in Babylonian characters reads: Ana Mardug Belishu Nabú-kUdURRI-UṢUR SHAR Babili ana baLaṭishu igish: To Merodach, his Lord, Nebuchadnezzar, king of Babylon, for his own lifc gave [this]. The cameo was thus a votive offering, probably presented in the great temple of E-Sagilla at Babylon.

Cf. 1 Kings 8. O Sin, Lord of the Gods, King of the Gods of Heaven and Earth, 22 sqa. God * of the Gods that inhabit great Heaven! when thou joyfully enterest into that House, may the good done to E-Sagil, E-Zida, E-Gishshir-gal, the Houses of Thy great Godhead, be upon Thy lips ! and the Fear of Thy Jer. 31. 33; great Godhead in the heart of its (their?) people $\dagger$ do Thou implant ! Ps. 132. 9. let them not sin against Thy great Godhead! like that of Heaven, let Ps. 132.14. their (the temples') foundation stand fast! As for me, Nabonidus king
1 Kings 3. 11. of Babylon, from sinning against Thy great Godhead save me! a life of
1 Chron. 29. 19. far days for a boon grant Thou! And as regards Belshazzar the eldest son, the issue of my bowels, implant in his heart the Fear of Thy great Godhead : let him not take to sinning ! let him be satisfied with fulness of life !

## Inscription on a Clay Cylinder of Nabonidus.

Found in the Ruins of the Temple of Shamash, the Sun-god, at Abû Habbah, the Ancient Sippara, and now in the British Museum.

To readers of cuneiform who are already familiar with the inscriptions of Nebuchadnezzar the Great, this inscription presents little difficulty. I have translated it from the original text, as published in The Cuneiform Inscriptions of Western Asia, Vol. V., Plate 64. There is a good German version by F. E. Peiser in Schrader's Keilschriftliche Bibliothek, Band III., 2 Hälfte.

In my righteous reign, Bel the great Lord, in love for my kingship, unto that city and House graciously turned; took pity (on it). In the beginning of my eternal kingship, He caused me to see a vision: Merodach the great Lord and Sin the Light of Heaven and Earth did stand on each side (of me) : Meronach spake with me: "Nabonidus king of Babylon with thy riding-horse(s?) carry bricks; build up E-Gul. $\mathrm{G}_{\mathrm{L}}$; and make SIN the

Reverently l spake unto the Lord of the Gods Merodach : "That House which Thou hast commanded to build, the UmmanMancla folk have encompassed it, and their forces are strong." But Merodach spake with me: " "he Umman-Manda which thou hast mentioned,-they, their country, and the kings that marched with them, are no more!" The MU-SAR (i.e. name-writing), the writing of the name of Assurbanipal king of Assyria, I discovered and altered not; with oil I anointed it, sacrifices of lambs I offered; with my own Musar I put it and restored it to its place.
For Shamash, the Judge of Heaven and Earth, E-barra His House, which is within Sippara, which Nebuchadnezzar a former king rebuilt, after searching for its old founda-tion-record without finding it ;-that House he rebuilt indeed, but in 45 years that House's walls had fallen. I felt uneasy, was fearful, took alarm, and my countenance was disturbed. When I had brought out Shamash from within it and made Him dwell in another House, that House I pulled down, and I made search for its old foundation-record ; and I dug to a depth of i8 cubits, and the foundation-record of Naram-Sin the son of Sargon, which for 3,200 years no king that preceded me had discovered, Shamash the great Lord of E-Barra, the House of the dwelling of His heart's delight, permitted me, even me, 1 Kings 6. 1, 37, 38. to behold. In the month Tisri, in a favourable month, on an auspicious day, which Shamash and Rimmon appointed me in a vision, with silver, gold, precious stones, forest growths, even fragrant plants and cedar, with rejoicings and festivities, over the foundation-record of Naram-Sin the son of Sargon, neither exceeding nor falling short by a finger's breadth, I laid its flooring (or platform). 5,000 stout cedars for its roofing I laid on ; lofty doors of cedar, thresholds, and door-sockets, in its gates I fastened ; E-Barra, along with Bît-ilu-Azagga (the Bethel of the God Azagga; or transcribe E-I.DIB-AZAGGA) its step-tower, newly I built and finished the work of it: the hand of the God Shamash my Lord I took, and with rejoicings and festivities I caused Him to inhabit the dwelling of heart's delight within it. The writing of the name of Naram-Sin the son of Sargon I saw, and altered not: with oil I anointed it; offerings of lambs I made ; with my own name-inscription I deposited it, and restored it to its place.

O Shamash, mighty Lord of Heaven and Earth, the Light of the Gods His Fathers, Issue of the bowels of Sin and Nin-gal! when thou enterest into E-Barra Thy beloved House, when Thou settlest in Thine eternal Sanctuary, me, Nabonidus, king of Babylon, the Prince Thy Supporter, the gladdener of Thine heart, the maker of Thy lofty dwelling-place,-my good works joyfully behold, and daily at Thy rising and

Do Thou, O Anunitu, mighty Dame! when Thou joyfully enterest into that House, with joy behold my good works, and every month at sumrise and sunset unto Sin the Father That begot Thee present Thou the good (as an offering)!

Whosoever thou art whom the Gods and Shamash shall call to the kingdom, and in whose reign that House decayeth, and who will build it anew,-the MU-SAR, the writing of my name, let him look at and alter not : with oil let him anoint it : offerings of lambs let him offer : along with the MU-SAR, the writing of his own name, let him deposit it, and restore it to its place! May Shamash and AnUnitu hear his prayers, hearken unto his word, walk beside him, overthrow his enemies ! daily unto Sin, the Father That formed Them, may They speak for his good (or tell of his goodness)!

## Note on the Date of Hammurabi, the Amraphel of Gen. 14.

In another inscription (Br. Mus. 85, 4-30, 2; published by Bezold, P.S.B.A., 1889), after stating that Nebuchadnezzar, son of NabopoLASSAR (Nabû-ap-lu-u-sur), in the course of his restoration of the temple of the Sun (E-Barra) at Larsav (now Senkerch), had found the foun-dation-record or memorial-cylinder (temenna) of his ancient predecessor Burna-Buriash, but had failed to find the corresponding record of "the ancient king who was before Burna-Buriash," Nabonidus adds that in the tenth year of his own reign Shamasi commanded him to restore His Sanctuary again. Winds and storms had wrecked the old clay walls and exposed the old foundations; in consequence of which, Nabonidus states, "The writing of the name of Hammurabi, the ancient king, who 700 years before Burna-Buriash had built E-Barra and the step-tower over the ancient foundation-record, within it I beheld " (col. II. 10-26).

Burna-Buriash is identical with Burra-Buriash, king of KarDuniash or Babylonia, whose date is determined by his correspondence with Amenophis IV. or ChU-EN-AंTEN, king of Egypt, circ. $145^{\circ}$ b.c., one of whose daughters was married to the son of Burna-Buriash. (Cf. page 83). The father of Burna-Buriash, Kuri-galzu, is mentioned by Nabonidus in a cylinder-inscription from Ur, now in the British Museum (col. III. 32 ; see W.A.I. I. 69), and by Burra-Buriash in one of the Tell el-Amarna letters to Amenophis IV., also in the British Museum. Hence we arrive at 2150 b.c. ( $450+700$ ) as the approximate date for Hammurabi, the Amraphel of Gen. I4.

## Inscription of Nabonidus.

Found at the Mound called the Mujelibeh, near Hillah, and now in the Muscum at Constantinople.
(Published by V. Scheil, Recucil de Travaux, etc., Vol. XVIII., Liv. I et 2. Paris, I896.)
In this valuable inscription, which is sculptured on a semicircular stele of basalt, Nabonidus has given us some historical notices of the highest interest, which will be found translated below. Although the upper part of the stele is unfortunately broken away, we know that the Assyrian king, whose destruction of Babylon is, related in Col. I., must be Sennacherib; for we are told that Merodach, i.e. the image of the god which had been carried off by the conqueror, abode in Assyria twenty-one years. Now Sennacherib took Babylon in the year b.c. 689 ; and if we subtract 2 I from this date, we get 668, the first year of Shamash-shûm-ukîn (Sammughes, Saosduchinus), which, according to the Babylonian Chronicle B. IV. 34, was the year of Merodach's return from Assyria to Babylon. And further, Col. I. concludes with the statement that the king of Assyria was slain by his own son, which agrees with what the Babylonian Chron. B., the Bible, and Berosus, relate of Sennacherib's end.

This inscription also enables us to determine precisely the date of the fall of Nineyeh. In Col. X., it is said that 54 years had elapsed since the ruin of the temple of Sin at Harran (Charran, Carrhae) by the Umman-Manda or Medes, when Nabonidus set about restoring it. As he relates elsewhere (see page 208), he was divinely bidden to undertake this work in the first year of his reign (i.e. in i.c. 556), but was only able to do it three years later, when Cyrus had broken the power of the Umman-Manda, i.e. in 553. Adding 54 to this date, we get b.c. 607 as the year of the fall of Nineyeh, and the final ruin of Assyria.

[^43]Col. X. I. 12. At Harran (the temple) L-Guigut, which hat been overthrown 54 years, -by the havoc of the UMman-MandeU the temple had been laid waste, -by help of the Cools the appointed time of grace drew nigh unto it. It was 54 years,* when Sin returned unto His place. Now at last to His place He returned, and Sin the Lord of the Diadem was mindful of His cxalted abode, with all the Gods $\dagger$ who had gone forth with Him from $\ddagger$ His mansion. Merodach, the King of the Cods, commanded their gathering together.

The seal of precious jasper ( $a s / h \phi \hat{u}$ ), the royal stone,
Gen. 38.18, 25 wherewith AsshurbaniPal king of Assyria adorned the (signet and cord). image of SIN for a memorial of his name, and made the cords § thereof,-the praise of Sin on that seal engraved, and on SIN's neck fastened it ; whose figure from days long past no man [had seen] $\|$ owing to the havoc of the enemy; 1 slept and saw His signs (or His oracles ; or the tokens thereof), in E-SaGgil, the House of the Keeper of the Treasure $\mathbb{T}$ of the mighty Gods
We can only guess the sequel of Nabonidus' dream, owing to the loss of the upper portion of Col. XI. Doubtless, he found Asshurbanipal's votive seal, if not also the image of Sin, under the guidance of the "signs" revealed in his dream.

## Head of a Sceptre from Babylon.

(Circ. в.c. 600.)
This fine specimen, which is in several respects unique, is a piece of semi-transparent blue chalcedony, beautifully cut and polished, and engraved with three lines of neo-Babylonian characters. Part of the original bronze rod of the sceptre still runs through the centre of it, though not shown in the illustration. The inscription is:
(I) Ana Nabium bêli si-ri bêli-shu Nabû-mukîn-abli abil Nûr-Sîn
(2) amelu Bur-gul Mardug amelu Ni-DUR Din-Tir-ki ana Din Zi-me-shu Gid-Da u-me-shu Silim Kui-shu.
(3) ṭûb lib-bi-shu . . . ina DIN-TIR-KI ana da-ra-a-ti u-she-pish-ma Ba.

This may be rendered:

Then follows in Col. II. the history of the overthrow of Astyages the Mede (called Ishtuwegu) by Cyrus (Kurash), "king of Anshan." Nabonidus' neglect of the great Babylonian Festival of New Year and the religious ceremonies connected with it, is noted over and over again in the inscription ; the suggestion being, no doubt, that to this fatal omission, repeated year after year, the various misfortunes and ultimate fall of the king were due.

There is a great gap between Col. II. of the Obverse and Col. I. of the Reverse. The former ends with the eleventh year of Nabonidus (Nabîi$n \hat{a} \cdot \hat{i} d)$; the latter describes the final events of the reign-the revolt of the subject-peoples, the king's attempt to conciliate his alienated gods, Cyrus' invasion of Accad, or North Babylonia, where " the king's son," i.e. Belshazzar (Bèlu-šarra-uṣur), as we know from another inscription, was permanently quartered with the troops, apparently waiting for the invader's approach; the surrender of Sippara (which was some fifty miles N.W. of Babylon) and the flight thence of Nabonidus to Babylon, the entry of Cyrus into the capital, and his appointment of Gobryas (Ugbaru, Gubaru) as governor of the city. The narrative is evidently of priestly origin, and in all probability was written in Babylon shortly after the establishment of the Persian rule.

## Sculptured Stele, with Portrait of Cyrus.

(Circ. в.с. 538.)
This famous bas-relief of the Liberator of the captive Jews is the oldest known relic of Persian sculpture. It stands at Meshed-Murghâb, among the ruins of the

PORTRAIT SCULIPURE OF CYRUS, KING OI* PERSIA. (Diewhafoy.) ancient Pasargadae, which Cyrus made his royal residence after the conquest of Asia Minor and Babylonia. The age of the remains at this site is determined by the inscriptions of Cyrus engraved upon them in Persian, Median, and Babylonian cuneiform ; the last indicating that Cyrus had already added Babylonia to his dominions (circ. в.c. 538).

It will be noticed that the features are distinctively European, and quite unlike the Assyrian and Egyptian types. Yet the ornamentation of the figure is entirely borrowed from Egypt and Assyria. The triple crown with aracus snakes is Egyptian (the small figure held in the right hand is also topped by a uracus); the four cherubic wings, and the fringed and embroidered border of the dress are Assyrian.

# Inscription of the Broken Cylinder of Cyrus. 

(From Babylon.)
In this inscription the great Conqueror of Babylon and Liberator of the Jews evidently speaks for himself. In spite of the large fracture affecting the beginning and the end of it, the general import is perfectly clear; and the ideas and language present a very instructive parallel to those of the Biblical books of Kings, and the latter half of Isaiah. The religious tone of the whole is as sincere as that which characterises the inscriptions of Nebuchadnezzar himself. Cyrus ascribes the ruin of Nabonidus to the anger of Merodach, "Lord of the gods," which was excited by innovations and omissions in the sphere of religion (lines 5-10, 33). The opening lines, after relating Nabonidus' elevation to the throne, appear to have described the various measures of the new king, which were hostile to the local temples of Babylonia and their timehonoured rights. Nabonidus appears to have aimed at enforcing the universal worship of Merodach, the tutelar god of Babylon, by the suppression of the old local worships-a decided step in the direction of Monotheism. His policy thus resembled that of Hezekiah (2 Kings 18. 4, 22), and Josiah (2 Kings 23. 5, 8, 9, 15, 19). It is unfortunate that his proceedings, which were detailed in lines $5-8$ of the inscription, can no longer be precisely determined; but it is evident that the king attempted to centralize the national religion in his capital by withholding the wonted supplies from the great local sanctuaries, and by removing their gods to Babylon (lines ro, 33) ; abolishing "the continual offering " in each case, and instituting the worship of Merodach throughout the country (line 7). Merodach himself resented the invasion of his own domain by the intruding gods, and chose Cyrus as his minister of reparation, to restore the gods of Babylonia to their proper abodes, and the gods and peoples of other lands and cities, who had been expatriated by the Babylonian sovereigns, "to their own dwelling-places" (line 32). We thus see that the permission given to the Jews to return to their own country, and the surrender to them of the sacred vessels of their Temple (in default of any image of their God), was no act of isolated clemency, but a part of the general policy of the Persian conqueror towards the foreign populations who had been deported to Babylonia by Nabopolassar and his successors.

I have translated the inscription from the original text as published in Vol. V. of The Cunciform Inscriptions of Western -tsia, Plate XXXV.

The people of Tin-Tir in a body, the entire land of Shinar and Accad, the nobles and grandees, bowed down before him, kissed his feet, rejoiced at his accession ; their faces brightened.

## The Phœnicio-Hebrew Alphabet, showing its Origin from the Old Linear and Primarily Pictorial Script of Shumir or Shinar, rather than from the Egyptian Hieratic Character.

[Since De Ronge stanted the theory, many scholars have held that the Egyptian hieratic writing (see fage 107) is the real basis of the Phanician alphabet. It is, however, impossible to sec any likeness betaecn some of the lefters and their supposed Egyptian prototypes; and the theory leaves the names of the letters-Alcfh, Bcth, Gimel, Esc.-totally unaccounted for. The late Dr. Mordtmann suggested, but was unable to cstablish the rieal aicw, which is now held by Prof. Honmel and others. For completeness' sake, our table gives both the Babylonian and the Egyptian hieratic forms.]
It is not so likely that the great monumental systems of hieroglyphic writing originated independently, as that they are offshoots from one original stock. In all branches of research, science looks for ultimate unity in the apparent multiplicity of actual phenomena, and the present case is not to be assumed without reason as an exception to the general rule. If, however, people want a priori grounds for a provisional theory of connexion, such may be found at once in the contiguity of Babylonia, Syria, Egypt, and their immemorial intercourse with each other. But, further, this theory is strongly corroborated by two considerations. The first is that of the still accumulating evidence for the Babylonian origin of the vast system of the Chinese characters; the second, that of the probable derivation of the Egyptian writing and even language from the same ultimate source. It is probable that alphabetic writing is based on a simplification of the same primitive system.

Levy indeed denies the hieroglyphic origin of the Phœenician alphabet. And Von Gutschmid affirms, "That the Semitic alphabet did not come from cuneiform writing may be taken as certain; but also it is not probable that it came from the hieratic character of the Egyptians" (Encycl. Brit. s.v. Phœnicia). Against such opinions it may be urged in limine (I) that the hieroglyphic or pictorial origin of writing in general is now almost universally recognised by those who have given special attention to the subject ; (2) that the old Persian cuneiform writing supplies an actual instance of alphabetical development from the Assyrio-Babylonian syllabic system; (3) that the ancient Egyptian system, which probably started from a Babylonian basis, has already developed a set of some twenty-five strictly alphabetical signs, which it uses in combination with pictorial syllabic symbols and determinatives; (4) that the Cypriote syllabary obviously represents an intermediate stage between the pictorial or ideographic indication of entire words, and the alphabetic indication

## CoMIPARATIVE TABLE

OI:

ANCIENT ALPHABETS.

of elementary sounds; and (5) that the Japanese alphabet or syllabary of seventy-two open syllables, with the vowels $a, c, i, o, u$, and the diphthongs $a i$, $a u$, is historically known to have originated in abridgments and contractions of more or less complex Chinese ideographs.

To build an alphabet on the basis of other alphabets is doubtless no insuperable task. We have the historical examples of Mesrop, the Armenian, of the Gothic bishop Ulphilas, and those of many modern missionaries. The old Wigur script, which was the archetype of Mongolian and Manchau, was adapted from a form of the Semitic alphabet; and that splendid monument of the scientific analysis of articulate sounds, the Devanagari, appears to depend on another form of it. The one alphabet has gone the round of the world. It does not look as if men were much given to absolute originality in these matters.

We assume then that the writing of words preceded the writing of the phonetic elements of words. The first writing was pictorial and ideographic; then came the stage of phonetic spelling, partial or complete, in the case of ideograms likely to be misread owing to polyphony or other causes. In Sumerian the addition of the symbol $5 Y Y / s a$, to the symbol $\dot{g} a d, \dot{g} u d, p a, ~ s i g$ (from sag, zag), restricts us to the sound sig, and excludes the other values of the character. And when the symbol $\langle\ll$, which might be read either $c s$ or $b a$ or $\sin$, is provided with the gloss $=11$ si-in, we understand that in this instance it is to be read sin, and not es or $b a$. Now this resolution of words which are closed syllables, like bad, gab, $d u g$, sin, into the elements $b a-a d, g a-a b, d u-u g$, si-in, is an important step towards the achievement of alphabetic writing. The same may be said of such resolutions as Eyyl shid into shi-ta, shi-ti, or I- lig into li-ki, or 다 (g)ud (also gis) into (g)u-tu, where shita, shiti, liki, etc., seem to be later developments of the original monosyllabic root. Before however the analysis of closed monosyllables like bad, gab, etc., into $b a-a d, g a-a b$, etc., was possible or likely to suggest itself, the existence of words consisting of a single open syllable was necessary. The strong tendency of Sumerian to drop final consonants when not followed by a vowel, gave rise, at a comparatively early period, to a number of words of this kind. Thus there can be little question that $b a$, to divide, was originally identical with the root bad, to split, to open, $\mathrm{S}^{\mathrm{b}} 222$; cp . also $b a r, b a$, half, and $b a l$, axe. This tendency prepared the way for phonetic spelling of the kind under consideration. The comparatively modern Chinese method which spells a word by writing two characters together, and taking the initial sound of the first with the final sound of the second, is similar in principle, if clumsier in effect. Thus the native
lexicographers spell 心 sim，heart，昔 林 sik－lim，s－im，the middle letters being disregarded．＂The Sumerian and the Chinese modes have this in common，that both combine words to suggest the sound of another word．To return to one of our instances，the si，originally sig，and in，by which we spell 《＜＜sin，are by themselves as much significant words as the 昔 sik，si，and 林 lim，lin，of the Chinese example．And in both languages，when two monosyllables are thus combined to spell another word，they are absolutely as non－significant individually as alphabetic signs．The meanings of $s i(g)$ and $i n, s i(k)$ and lim，have no bearing whatever on the meaning of $\sin , \operatorname{sim}$ ．This is surely a decided step in the direction of alphabetic writing，consisting as it does in the use of written symbols to suggest only sounds，not sense．The Chinese，it is true，got no further；but a quick－witted people like the Japanese could find out how to utilize simple open syllables for the purpose of constructing a scientific syllabary analogous to the ancient Cypriote．

The ordinary progress of phonetic change and of dialectic variation， by which the vowel of a syllable might fluctuate between $a, i, u$ ，would further tend to emphasize the consonantal sound as the constant element in a syllable．When it was observed that $-=1 b a$ had also the value $b i$ ， that was $h a$ ，and $\underline{h i}$ ，that was both $n a$ and $n u$ ，the possibility of using a written symbol to suggest the constant sound directly and to imply the vowel required by the sense，may have presented itself to the unknown authors of so－called alphabetic writing．I say so－called，for it is evident that the Semitic alphabet and all its ancient offshoots are essentially syllabic．This is probably the true explanation of the fact that the Phoenician alphabet is destitute of any special symbols for vowel sounds．They were not necessary while the language was still a living one，because each of the twenty－two symbols was itself of syllabic origin and thus implied the presence of a vowel，which was $a, i, u$ ，according to circumstances．

It would seem，then，that when a sufficient number of open syllabic sounds，like $b a, g a, d a$ ，already find appropriate symbols in the script of a language，an alphabet virtually exists．The practical obstacle to the immediate perception or utilization of the fact will lie in the number of symbols，greater or less，with identical values．This and other difficulties in the way of alphabetic origination would not be overcome in a day． We have not to imagine a deliberate invention of the Semitic alphabet
＊The Accadian ideogram sill，shepherd，looks like an instance of the same mode of spelling，being composed of sig＋II dib（crook＋flock）．

Since De Rougé, it has, no doubt, been a widely circulated opinion that the Phœnician characters were originally borrowed from the hieratic Egyptian. But almost every scholar who has given any particular attention to the sulject has expressed himself dissatisfied with the comparisons suggested by De Rougé and his followers. In some instances the supposed resemblances are remote, in others altogether invisible. (See the Plate, and especially the letters Aleph, Beth, Teth, Nun, Ain, Pe.)

The complete sacrifice of the old traditional names of the letters has also been felt to be a difficulty in the way of the Egyptian theory; and it is plainly in favour of our own view that it, for the most part, retains and accounts for the names of the letters. To take a couple of instances, it will, I think, be generally recognized that $S$ bēt is sufficiently like 4 ba , bi, to split (Sumerian bad, bid, $=$ Chinese pit).

The difference of shape between the Babylonian sign and the Phœnician $S$ is merely a variation for convenience of writing. The latter may be called a one-stroke adaptation of the former. As to the name, beth, b-t (Semitic Babylonian būt, bēt) is the common Semitic term for house. The original sound of the symbol becomes its name in the Phœnician alphabet ; the original meaning is naturally exchanged for a familiar Semitic one which happens to be that of the corresponding Semitic sound.

Gimel, $\rceil, ~ \uparrow, \bigwedge$, Arabic gīm, Greek gamma, resembles ), the linear equivalent of the Babylonian , gam, gamma, to bow, bend, curve (Assyrian qadādu). This root occurs in VIV gam-mal, "camel," strictly, "the humped"; a term which passed into Assyrian and the other Semitic languages, and of which the Sanskrit kramêla, kramêlaka, is probably an adaptation, ushta being the true Aryan term for camel. Gam, as the name of the third letter, was Semitized into gimel, naturally enough in view of these facts. But besides gimel, only three or four of the twentytwo letters can be called perfect triliterals (lamed, samech, aleph, tzaddi ??). The monosyllabic form of almost all the names agrees with our theory that they are partially Semitized (imperfectly triliteralized) Sumerian terms.

It will be noticed that more than one Sumerian prototype is given in the Table for many of the Phœenician letters; and, looking at all the facts, one might be inclined to think that the Phœnician characters represent the common element of Sumerian signs acrophonically similar in sound. Perhaps, however, we should rather say that for an indefinite period the various related Babylonian symbols were used indifferently as alphabetic representatives of the Semitic sounds indicated by the corresponding letters. This would be the first step ; and it seems to account
for the varying forms of the Phœnician signs, which need not all be deduced from a single ancestor, but may preserve traces of several. One locality, even one individual scribe, might prefer one form of a letter, another another, until at last by the intercourse of commerce and diplomacy a form would result exhibiting a likeness to all, but not exactly identical with any of the prototypes.

## The Baal Lebanon Inscription.

We unfortunately possess only fragments of this ancient and interesting inscription. It is engraved on portions of three bronze sacrificial bowls (paterae), and is at least contemporary with the inscription of Mesha (see page 239), if not older than that famous monument. Some would date it about b.c. Iooo. The engraved portions of the three bowls are shown in the illustration, which is borrowed from the Corpus Inscriptionum Semiticarum. They are distinguished by slight differences in the writing. These fragments, which are very thin, were purchased at Limassol, in Cyprus, from a seller of old iron, by a dealer named Laniti; and were acquired in 1877 by the Bibliothéque Nationale of Paris. The bowls are supposed to have been dedicated originally by different donors at about the same time in a temple of Baal Lebanon, not far from Sidon. The remains of the inscription on the fragments of the first bowl may be rendered :-
governor of Qarthadasht, servant of Hiram, king of the Zidonians. Then he gave to Baal Lebanon, his Lord, as the choicest of the bronze (or in the best bronze)

The small fragment of the second bowi has only:. . . . . tâab, governor of Qarthadasht

Here the syllable tap appears to be a relic of the lost name of the " governor of Qarthadasht," who dedicated this bowl.

The small fragment of the third reads:-
. . . . . . [to Ba]al Lebanon, his lord
Both Esarhaddon and Assurbanipal mention a city of Qartihadasti in Cyprus. It is the same name as Carthage, and means New-town.

I am Mesha, son of Chemosh-[Mclech], king of Moab, the Dibonite;
My father reigned over Moab thirty years, and I reigned after my father ;
And 1 made this $b \bar{a} m \bar{a} h(=$ "high-place ") for Chemosh at Korkhah,
A $b[\bar{a} m \bar{a} h]$ of salvation, for he saved me from all the kings, and made me look on all my encmies.
Omri was king of lsrael, and he oppressed Moab many days, for Chemosh was angry with his land.
His son succeeded him, and he also said, "I will oppress Moab."
In my days he said [thus] ; but I looked on him and on his house, and Israel perished for ever.
Omri took [all] the land of Medeba and [Israel] dwelt in it during his days, and [half] the days of his son, even forty years ;
But Chemosh [cap]tured it in my days.
And I rebuilt Baal-Meon and made therein the tank (or pool),
And 1 [rebuil]t Kirjathan. The men of Gad had dwelt in the land of Ataroth from of old, and the king of Israel rebuilt Ataroth for himself (or for them) ;
But I made war against the town and took it;
And I slew all [the people of ] the town for the pleasure of Chemosh and Moab, and I carried off thence the altar of Dodah, and dragged it before Chemosh in the city.
And I settled therein the men of Sharon and the men of Macharoth.
And Chemosh said to me, "Go, seize Nebo beside (?) Israel!" and I went in the night, and fought against it from the break of day until noon, and 1 took it ;
And I slew in all seven thousand men and boys and women and girls and damsels; for unto Ashtor-Chemosh I had devoted them.
And I took thence the altars of Jehovah and dragged them before Chemosh.
And the king of Israel had built Jahaz; and he dwelt in it whilst he waged war against me;
But Chemosh drove him out before me.
And I took of Moab two hundred men, all its chiefs ; and I carried them to Jahaz, which I took to add it to Dibon.
I it was who rebuilt Korkhah, the Wall of the Woods, and the Wall of the Mound (Ophel) ;
And I rebuilt her gates, and I rebuilt her towers.
And I built the king's house, and I made the conduits of the water-tanks within the city;
But there was no cistern within the city, in Korkhah; so I commanded all the people, "Make you each one a cistern in his own house":
And I dug the channels for Korkhah by means of the prisoners from Israel.
I rebuilt Aroer, and I made the highway through (or to) the Arnon (ravine ?), and I rebuilt Bethbamoth, for it was overthrown.
I rebuilt Bezer . . . . . for all Dibon was subject [unto me].
And I reigned . . . . a hundred cities, which I had added unto the land.
And I rebuilt Medeba and Beth-Diblathan
And Beth-Baal-Meon ; and I took there the shecpmaster . . . . the focks of the land.
And Horonan (= Horonaim)-there dwelt in it the Dedanite. And Dedan said . . . .
. . . . . Chemosh said unto me, "Go down, war against Horonan!"
So I went down and warred [against it] . . . . . . Chemosh dwelt in it (or restored it) in my days . . . . . .

It is at once apparent how important a document this is to the Bible student. It affords an apparently independent contemporary record of the border-wars between Moab and Israel, and also throws considerable light upon topography.

## PHCENICIAN MONUMENTS.

## Limestone Stele of Jehaumelech, King of Gebal.

(Byblus.)
A Phenician monument of the 5 th century b.c. The king stands in Persian garb before his goddess, whose crown and sceptre are of an Egyptian type, with a cup of wine for pouring a drinkCf. Ps. 116. 13, 14. offering in his hand. The winged solar disk overshadows
both. Below is inscribed in Phœnician :-

#### Abstract

"I am Jehaumelech, king of Gebal, son of Jaharbaal, grandson of Adon-melech, king of Gebal, whom the Lady Baalath of Gebal made sovereign over Gebal. And I call upon my Lady Baalath of Gebal, for she heareth my voice. And I make for my Lady Baalath of Gebal this brazen altar which is in this [place], and this gilded graven figure, opposite my own figure, and the gilded [winged solar disk] in the [mid]dle of the stone, and this colonnade and its pillars and the capitals upon them and the roof thereof I made, even I, Jehaumelech, king of Gebal, for my Lady Baalath of Gebal ; because as often as I have called upon my Lady Baalath of Gebal, she hath heard my voice and done me pleasure. May Baalath of Gebal bless Jehaumelech, king of Gebal, and make him live and prolong his days and his years in Gebal because he is a righteous king! and may the [Lady Ba]alath of Gebal give him favour in the sight of the gods and in the sight of the people of this land, and the favour of the people of [other lands for ever]! Whatever sovereign or man shall fashion another work upon [this altar or upon] this gilded sculpture, or upon this colonnade, I, Jehaumelech, [king of Gebal set my face against] the maker of that work ; and whether . . . . . ... may the Lady Baalath of Gebal [curse] that man and his seed!"

It is hardly necessary to call attention to the close correspondence of the language and religious ideas of this inscription with those of the prophets and psalmists of the Old Testament. But the apposite words of the late Professor Robertson Smith may well be quoted here:-
"As the kings of Israel ascribe their sovereignty to the grant of Jehovah, so the king of Gebal . . . . . declares that it was the divine quecn of Byblus who set him as king over the city. As the psalmist of l's. cxvi. says, 'I take up the cup of salvation, and call upon the name of Jehovah,' so this heathen king is figured standing before the goddess with a cup in his hand, and exclaiming,' 1 call upon my lady the sovereign of Ciebal, because she hath heard my voice, and dealt graciously with me.' And just as the prayer for life and blessing to the king of Isracl in Ps. Ixxii. is a prayer for a king judging in righteousness, the Phoenician goddess is invoked to bless Jelammelech, king of Gebal, and give him life and prolong his days in Gebal, because he is a just king, and to give him favour in the eyes of gods and men." (1rophets of Isracl, Lect. II., page 5 1.)

# Inscription on the Sarcophagus of Eshmunazar II., King of the Zidonians. 

Eshmunazar, "Eshmun helpeth," is a name like Eleazar, "El helpeth." The touching language of the young king's epitaph offers many noteworthy parallels to Old Testament phraseology. Eshmunazar II., as we learn from this inscription, was still under the tutelage of his mother, the widowed queen Ammashtart ("handmaid of Ashtoreth"), when he died, circ. b.c. 400.

And therefore the Lord of Kings gave us Dor and Japho, the fine corn-land in the field of Sharon as a recompence (?) for the great things which I did, and added them to the bounds of the country, that they might belong to the Zidonians for ever.

The Cypriote is briefer :-
"The statuc which Manasses (sic) Nōmeniōn gave and dedicated to the grd Apollo of Helos. With luck!"

The interest of the Cypriote writing lies in the fact that it consists not of letters, but of syllables, although the Cypriote language is a dialect of Greek; i.c. the words ton andriantan, "the statue," are written in the Cypriote thus: To-NA-TI-RI-A-TA-NE. The system thus occupies a middle position between pictorial and alphabetic writing.

Ben-Hodesh, "Son of (= born at) New Moon," answers to Nōmeniōn, the Greek Noumenios, which has the same sense. Resheph, the Phœnician and Cypriote Apollo, is also mentioned in the old Aramaic inscriptions of Sam'al. Milkiyathan began his reign circ. b.c. 375.

## The Sacrificial Tablet of Marseilles.

(Corpus Inscriptionum Scmiticarum. 165.)
This celebrated monument is a stone inscribed in the Phœnician language and writing. It defines in formal terms the priestly dues in money and portions of the victim, for every kind of sacrifice. The technical terms are much the same as those employed in the Mosaic Law. The tablet mentions the Peace-offering (shèlem), the Whole-offering ( $k h a \bar{a} l \hat{\imath} l$ ), and the Meat-offering (minchath); thus constituting an excellent commentary on the laws of sacrifice in the Book of Leviticus. It originally belonged to "the House of Baal (Zephon)" at Carthage, and was found at Marseilles in $1844^{-5}$ (see CIS. Pars. I. Tom. I. Fasc. 3). It may be assigned to the fourth or perhaps the fifth century b.c.

I The house of Baal-[Zephon ?]. Requisi[tion of the Tax]es, which the [Superintendents of Tax]es decreed, in the time of [our lords Halaz]baal the Judge, the son of Bod-Tanith son of Bod[-Eshmun, and Halazbaal].

20 Every Iriest who taketh tax in excess of what is appointed in this Table, he shall be fined
21 [Eve]ry sacrificer that shall not pay the [amount prescribed fo]r the tax, which [is appointed in this Table, he shall be fined].

With the above inscription it will be instructive to compare a similar one, found by Nathan Davis in 1858, on the site of Carthage, and now in the British Museum. It will be noticed that in this second Table of

Sacrificial Dues the skins or fells of the victims are given to the Priests, as in Lev. 7. 8, instead of a fixed sum of money in each case.

Portions of eleven lines remain, mostly broken off at both ends; but the general conformity of the inscription with the Marseilles Tablet is so close, that it may be partially restored from that source. (See CIS. 167.) The Translation is as follows:-

I The Requisition of Taxes which [the Superintendents of Taxes] decreed.
2 [In the case of an ox, whether an Whole-offering, or a Peace-offering, the f]ell [shall belong] to the Priests, and the pieces to the sacrificer
3 [In the case of a calf, whether an Whole-offering, or a Peace-offering, the] fell [slall belong] to the Priests, and the pieces to the sacrificer
4 [In the case of a he-goat or a she-goat, whether an Whole-offering, or] a Peaceoffering, the fell of the she-goats shall belong to the Priests; and the inwar[ds and the feet] shall belong [to the sacrificer].
5 [In the case of a lamb, or of a kid, or of] a young (or wether) ram, whether an Whole-offering, or a Peace-Offering, the fell shall belong to the Pries[ts].

12 [In the time of our lords . . . . . and their Associates].
Notes to the Marseilles Inscription.-Line i. The Tablet gives the Sacrificial Regulations for a particular temple, viz., that of Baal-Zephon (or some other Baal) at Carthage. These were naturally adopted in the corresponding temple at the Phœnician settlement of Marseilles (Greek Massalia; from Phœnician לin, Mazzāl ==Assyrian manzaltu, māzaltu, "station,"" dwelling-place").

Zephon (Exod. 14. 2) is a probable restoration, both from the remains of the letters on the stone, and from the occurrence of the name עברצפן, Obed-Zephon or Abdi-Zephon, "servant of Zephon," in Punic inscriptions.

The close resemblance of the language of this Tablet to that of the Old Testament is evident from the outset. Baal's temple is his "house" (Judg. 9. 46 ; 16. 23 ; I Kings 16.32 , \&c.) ; the "taxes" or contributions due to the priests are called $\boldsymbol{\text { Memas mathôth, " gifts "-a plural of the }}$ very term used in the Hebrew of 2 Chron. 24. 6, 9, for the Temple-tax (A.V. "collection"); they are fixed by "the men who were over the taxes" (cf. I Kings 4. 6; 12. 18). I'urther, Carthage is governed, like

Isracl of old, by two " judges" (Phoenician and Hebrew, D'שa, shôfetîm, whence Livy's Süfétés), assisted by various Boards or Committees, and a Senate, which is perhaps denoted in this Tablet by the term rendered "Associates" or "Colleagues" (חברנם; cf. the חבר, "Association," of the Jews on the Maccabean coins). The names of these supreme magistrates have a Biblical cast: Halazbaal, "Baal delivereth," is like Helez (2 Sam. 23. 26) for Halaziah, "Jah delivereth"; Bod-Tanith and Bod-Eshmun, "servant of the goddess Tanith" and "servant of the god Eshmun," recall such names as Obadiah, Abdiel, Obed-Edom, etc.

Line 3. The inscription enumerates all the objects of sacrifice, viz., large and small cattle, birds, and the fruits of the soil, in very much the same order as Lev. I-7; first, the Bloody, and then the Unbloody Offerings, the latter being called מנחת, as in Hebrew. And it is clear that the בליל, källl, "whole-offering" or holocaust, answers to the Heb. עולה, 'ôlă'l, A.V." burnt-offering" (cf. the use of kākl in the Hebrew of I Sam. 7.9; Deut. 13. 17; Ps. 51. 19; Lev.6.22, $23=15$, 16 Heb., "wholly burnt"). The șaw'at (צועת) as clearly answers to the Levitical "זובח שלממים, zèbach shelämîm (Lev. 3. 6), A.V. "peace-offering"; so that we have here the two chief forms of Bloody Sacrifice, both of which are prescribed in Exod. 20. 24.

The Phœnician term צועת, saw'at, may be compared with the Ethiopic root $గ \mathbb{T O}$ : sawi'a, "to call," "invite," e.g. to a sacrifice (I Sam. 16. 3, Ethiopic Version), and may accordingly denote a sacrifice to which guests are invited, as distinguished from a holocaust. Otherwise, as Munk thought, the Phœnician word may be connected with the Ethiopic maswärt, "s sacrifice," although the sounds correspond less perfectly.

The שלמה כליל, shèlem kählll, " Peace-offering of (i.c. belonging to) a Whole-offering," probably denotes a secondary sacrifice, which at Carthage may have been the usual accompaniment of the Whole-offering or holocaust; cf. line II, and see W. Robertson Smith, Rel. Scm. ${ }^{\text {. }}$ page 237, note.

Line 4. "Neck and shoulders." The breast and the right shoulder (or thigh) belonged to the priest in Jewish law (Lev. 7.31, 32). The meaning of the Phœenician expressions is uncertain. The editors of CIS. render prosecta et augmenta; assuming a correspondence between Phoenician and Roman sacrificial usage. The Phœenician term קצרת, $q-s-r-t$, has the same radical letters as the Arabic qasar, "necks." But it has also been compared with qusra, "short rib"; and we might even suppose a relation to qutr, "side," which is used in the plural for the prominent parts of a horse, such as the withers and rump.

The other Phœenician term, תלS", $y$-ş-l-t, resembles the Syriac yasṣilla, " elbow" (Ecclus. 9. 9; Ezek. r3. 18) ; cf. also Arabic wuşl," joint," "limb."

The term שלבם, sh-l-b-m, is equally obscure. It is hardly akin to Arab. șulb (sulub, şalab), which means " backbone," " loins." Shelabbim (in the parallel inscription, Davis, No. go, 'eshlabbin) may perhaps be compared with Assyr. shelabbit, "worm" or "maggot," and so denote the intestines as vermiform; or it may be connected with léb $\vec{a}^{\prime} b$, Assyr. libbi, in the sense of what is inside, $\tau \grave{a}$ èv $\tau \epsilon \rho a$. Possibly also it means the ribs, as being cross-pieces; cf. the use of the word in Hebrew, i Kings 7. 28.

Line 5. The puzzling expression באטופטא was ingeniously supposed by Rénan and the other editors of CIS. to cover a loan from the Greek
 only suggest that the phrase is compounded of $\boldsymbol{\aleph}$, " not," and a term derived from the same root as the Talmudic טומטום, which denotes an animal whose sex is not apparent (from טמםם טמטם , טמטם " to close up," "shut
 thus: : בעטט ומט . באטט וֹטא, "kicking and plunging"; a phrase descriptive of the calf.

Line 7. Some take יבל as "ram," instead of " he-goat," and point איא אn in line 5 as hart." But the he-goat, so frequent in Leviticus, is not likely to be wanting here. Besides, whereas the ram is often represented on votive cippi from Carthage, the stag never is.

The term $z \hat{e} \hat{\imath}$ or $z \hat{\imath} \imath$, which seems related to the Hebrew $z \hat{e} r$, "ring," " circular moulding," reminds one of the gold and silver ring-money of ancient Egypt, and may have denoted the same sort of thing, considering the long-established intercourse between Phœenicia and the Delta.

Line 9. The phrase צרב איר has caused much perplexity. As the line starts with lamb and kid, a third young animal might be expected; and as in Arabic zarb is " a cote for lambs and kids," we might, perhaps, take s-r-b'ayil to mean " a coteling, viz. a ram," i.e. a young ram. But as Arabic saraba is found in the sense of şarama, "to cut," s-r-b 'ayil is possibly " a wether ram," which is ranged with lambs and kids, as being of less value than an entire animal (line 5 . Notice the smaller money-tax).

Line ir. The words ץ's אם have been rendered "tame or wild." In connexion with the sacrifice of birds, however, it seems natural to refer to Lev. I. I4 and 12. 6, 8; and when we find that the "young pigeon" ( $g \hat{a} z \bar{a} l)$ of Gen. 15.9 is actually rendered ${ }^{\prime \prime}$ "צ in the
 a Phœenician term for turtledove, derived from a root $\boldsymbol{j} \boldsymbol{j}$, Assyr. 'agannu, " to be sad": or perhaps 'agan 'anag' 'anach, 'anan, 'anah,
" to sigh," " mourn," Assyr. 'anâchu, " to sigh." To " mourn like a dove" is a common phrase in Babylonian poetry (cf. Isa. 38. 14; 59. II).

Of the two new kinds of sacrifice here mentioned, $5 \Psi \mathcal{S}$, $S h-s-p h$, and תin, Ch-z-th, the former may be connected with Heb. "שׁ","outpouring" (of wrath), Isa. 54.8, and the Assyr. shispu or shizbu, " milk" (that which overflows). This rare root is apparently cognate with that of $\boldsymbol{T}$, "overflow" (Prov. 27.4). The latter word, חחו, may be akin to chāzûth, "agreement" (Isa.28.18) : sec Gen. I5 for the description of a Covenant-sacrifice.

Line $\mathbf{1 2}$. The original text begins: "For birds, whether hallowed firstfruits," etc.; but as the words italicised are wanting in the parallel inscription (Davis, No. 90, line 9), it is probable that they should be regarded as due to the scribe's, or rather the sculptor's, inadvertence here. It may be, however, that the term for birds has taken the place of a general word for the various kinds of bloodless offerings which follow.

Line 14. The expression and for milk is written twice in the original ; another inadvertence on the part of the engraver of the stone, who need not be supposed to have been a priest, or especially familiar with the sacred laws. To point the repeated letters so as to get the sense and for fat is against the general subject of the line, which deals with Unbloody Sacrifice.

Line 15 . The term $\boldsymbol{\square}$, $m-n-m$, " nothing," supplied at the end of the line from the parallel inscription, I would compare with the Assyrian manama, " any one " (usually with negative, " no one ").

Line 16. CIS. translates: Omnis indigena et omnis incola et omnis parasitus dcorum; but שטחה can hardly mean incola, and מרזה אלם (cf. Amos 6.7; Jer. 16. 5) is strange in the sense of parasitus deorum. As וֹחו is used of the breaking out of leprosy on a man (2 Chron. 26. 19),

 such a connexion recalls מכה אלהים (Isa. 53.4), and may be compared with Arab. razaha, " to fall down through weakness or emaciation" (also " to thrust through with a spear"); it would seem that we have to do here with the special case of sacrificers who are ceremonially unclean. Cf. Meier and Schröder ; and see Lev. 13-I4.

Lines 17 , 18 . The " writing" or " book" which " the men who were over the taxes wrote," is evidently the Carthaginian source from which the laws of this Tablet were compiled for the benefit of the settlers of Marseilles.

Line 20. There is no root ברץ in Semitic (including Assyrian); ב must therefore be the preposition, and the expression bedîs or bedị̂ may be taken to mean " in deviation from" . . if. Arab. dâasa, " to turn aside or deviate from the right road."

# The Bilingual Inscription of Canopus. 

(B.C. 238.)

The Bilingual Inscription of Canopus, preserved in the Gizeh Museum, is an official document of the time of Ptolemy III., Euergetes, king of Egypt. It is engraved in thirty-seven lines of Egyptian hieroglyphics and seventy-six lines of uncial Greek characters on a block of hard fine-grained limestone, seven feet high by two-and-a-half broad, found by Professor Lepsius, in the year 1866 , in the ruins of $Z$ oan, the ancient Tanis. The demotic text, which is in seventy-four lines, occupies the right-hand edge of the slab. It relates to certain divine honours decreed for the king and his sister-consort Berenice, and for the deceased princess Berenice their daughter. The inscription is entire in both languages; a fact which gives it the advantage over that of the Rosetta Stone, which is unfortunately imperfect. The opening lines specify the exact date:-
"Year IX. (month) Apellaeus, day 7, (month) Tybi, day 17, of the Egyptians, under the Majesty of the King of Upper and Lower Egypt, Ptolemy, the Ever-living, Beloved of Ptah, Son of Ptolemy (and) Arsinoë, the Divine Adelphoi ; Apollonides son of Moschion being Priest of Alexander the Justified, and of the Divine Adelphoi, and of the Divine Euergetai ; Menecrateia daughter of Philammon being the Canephoros before Arsinoë Philadelphos; on this day a Decree (was made)."

This opening reminds us very much of Luke 3. I, 2. The date is equivalent to March 7, в.с. 238. A version of the inscription, which is too long for translation here, may be seen in Das bilingue Dekret von Kanopus, by Lepsius, Berlin, i866. The closing lines are as follows:-
"That this Decree be written by the Arch-priests of the Temples, and the Overseers of the Sanctuaries, and the Scribes of the House of Ciod, graven on a Stele of stone or bronze, in Hieroglyphics, the Writing of the Books, and the Writing of the Ha-nebu (Greeks) ; and that it be set up in the Assembly-hall in Temples of the First Class, Temples of the Second Class, (and) Temples of the Third Class, in order to apprize all men of the honour done by the Priests of the Temples of Eigypt to the Divine Eiuergetai and their children, according to right."

THE BILINGUAL INSCRIPTION
OF CANOPUS (8.c. 238).

EYRE \& SPOTTISWOOOM, Her Majesty's Praters, GREAT NEW ST, LONDON, L゙.C.

[^0]:    India House Inscription of Nebuchadnezzair II. (the Great), King of Babilon 203 Cylinder with Inscription of Nebuchadnezzar II. (the Great) 205 Cameo Poritrait of Nebuchadnezzar II.

[^1]:    * Mummu, if of Sumerian origin, as is probable, may be compared with Chinese mung, eldest, chief; or better, perhaps, with ming, dark, as in ming hai, the dark (i.c. deep) sea. Aps $\hat{\mathrm{t}}$ and Tîmat are prototypes of Homer's Okeanos and Tethys, as the original parents of all things, even of the gods. The name Tethys may perhaps be related to Tifmat-Tiatait, and that of the sea-god Poseidas-Poseidon to $A p s \pi$, while Okeanos may have some connexion with Kingu (1. 126).
    $\dagger$ The Sumerian ge-bara, black stretch, refers to the colour of the soil.
    $\pm$ The Sumerian god Lagh-ma (Lamma?) and his wife Lagha-ma are probably dragondeitjes. We may perhaps compare with Lagh the seconcl element in She-ragh, a serpent-god, and Chinese lung, dragon. Among the monsters created by Tiâmat (page 3 infr.) are Lachami or dragons; and Nabonidus set up Lachmn's at the doors of the temple of Harran. The meaning of the characters laf-ma may be either "Terror-clad," or "Terror-making,'" or "Terror-being."
    § Anshar and Kishar are personifications of "The Ilost of Heaven " and "The llost of Earth " (Sumerian an, heaven ; kJ, earth ; shar, host).

[^2]:    * With Assyr. amu of. Arab aimu", plur. nyam, a long white and specially venomous serpent. Ifere, of course, a mythical serpent is intended, as in the other instances. The ideogram naturally came to be used in the sense of storm-dcmon, storm, because storm-clouds were mythologically conceived as serpents (Job 26. 13, Meb.).

[^3]:    * The Sumerian name of the place where the gods meet at New Year, in order to "pronounce dooms" or determine destinics. It means World-gathering, Universal Assembly, or the like, and should, perhaps, be read ub-shugin, as the symbol ukin had also the value kin or GIN, and shu-gin resembles shu-nigin, hapharu, "assemblage," "total," and gin was used in the sense of gimru, "all" (Briinnow, 2388). Ub, "region," for which we also find 18 , is the Chinese ip, yip, $i$,"district"; shu, "hand," = Chinese shcu, " hand "; GIN = Chinese k'iün, " concourse," " all," k'ün, " to collect in crowds " (1.S.B.A. Feb. i890, page 207).

[^4]:    * A gloss, explaining the Sumerian lab-gidul.

[^5]:    * Mašdu, Assyrianized form of Sumerian Mash-du, sabitu, gazelle. (Nu-Nu is sîru, flesh : see Briinnow, 1969.)
    $\dagger$ Berosus wrote that, after killing her, "Bel (Meroclach) went back and cleft the woman (Thalath, or rather Thamtc; leg. ©AMTE pro ©A』AT $\Theta$ ) in the micldle, and made one half of her Earth and the other half Heaven." (Eusebius, Chron, page 12 , ed. Aucher, Venice, isis.)
    ${ }_{+}+$Sumerian: House of the Host [of Heawen].

[^6]:    * This seems to be a loan from the Sumerian, in which l u is the common ideogram for sheep, flock, and mash may mean bright, pure, shining. The stars are well calle a shining flock: see Tablet VII, Reverse, 1. 7. 8 .

[^7]:    * Dingir sud ghab $=$ Goll who overohelms the wiched. $\quad$ (Ghab $=$ bi'šu.)
    $\dagger$ i.c. Heaven. In Rabbinic usage, God is called "The Place" (mäqôm).
    $\ddagger$ The Spirits of Heaven.
    § This was the sacred number of several gods, but especially of Ia. By proclaiming this title, the gods completed the total of fifty titles of honour with which they successively hated Merodach.

    S 7986.

[^8]:    * The religious intention of the entire poem is well shown by the hortatory epilogue with which it closes. The author's aim is not private and personal; but, like the sacred writers of Israel, he is simply anxious that king and people should be duly instructed in the great works of their God, so that, by honouring him aright, they may retain his favour and escape his wrath.
    $\dagger$ House of Earth; Sumerian name of Bel's temple at Nippur.
    $\ddagger$ House of Heaven, Anu's temple at Erech, the Sumerian UnUg, which is perhaps the Enoch of Gen. 4. 17.

[^9]:    * The abyss of waters under the earth, whence springs and rivers flow.
    $\dagger$ King of the pure Abode: i.e the god Ia.

    7. The Anunnaki were angels or spirits of "The Great Water " (Sumerian a.nus) underground, the watery abyss whence the springs and rivers flow.
[^10]:    * I'robably referring to the procession in which the god's image or ark (Babytonian " ship") was carried along the streets on certain festivals, in order to ensure peace and plenty.

[^11]:    "Their upper (i.c. human) part reacheth to heaven, and their bosom (i.c. the scorpion body) to the underworld ; whose terror is overpowering, and whose look is death (of. the Greck (iorgon) ; whose splendour is awful, overthrowing mountains. . It suntise and sunset they watch over the sum."

[^12]:    * Haupt and others read the ideogram I'ir-mipishtim, "Offspring of life." But the Sumerian Ghis-zi represents an older Guz-zi=Kush-zi=Nah-mpishtim," Rest of soul," i.e. "Tranquilhearted," whence the Hebrew Nôuh, i.c. hist, is abriclged by omission of the second element in the I Balbylonian name.

[^13]:    * i.e. the Cherub on which they rode forth in wrath (l's. 18. 10: Isa. 19. I Ezek. 1. 4 squ.)
    $\dagger$ The fence and wall of Nûh-napishtim's homestead on the river-bank.
    ${ }_{+}{ }^{7}$ This looks like a variant rendering of the previous line, and may therefore imply an original Sumero-Accadian text, of which the extant Assyrian is a translation.

[^14]:    * The site of the Babylonian Paradise, at the mouth of the four rivers, Euphrates, Tigris, Karn̄n, and Kerkha. This suggestion, and some of the renderings here adopted, are due to Professor Paul Haupt, the principal authority on the original text.

[^15]:    ** The capital letters mark Sumerian words, the sinall type Semitic Babylonian words and terminations, the occurrence of which here and there proves the text to be of Semitic origin.

    $\dagger$ i.e. Khâhh, S.E. of Medina (Hommel).

[^20]:    * See page 7o. The name of Kudur-Lagamar has not yet been found; but it is composed of the Elamite elements Kudur, " servant," and Lagamar(u), the name of a deity whose image was carried off by Assur-bani-pal at the sack of Susa. Moreover, it is like the Elamite royal names, Kudur-Mabug and Kudur-Nankhundi.

[^21]:    * KU.ки.ке.ки.mal is perhaps only a scribe's error.

[^22]:    "For the goddess (Ishtar) of Zari-unuki, his majestic Lady, the mil-lal of Heaven and Earth, his Lady, Hammurabi, the called of ANU and Bel, his . . . . , the favourite of Shamash, the Shepherd that delighteth the heart of Mrrodach, the Pastor dear to the heart of ISHTAR, the mighty king, the king of ISabylon (KA-DINGIRRA-KI), the king of SHUMIR and Accar), the king of the Four Quarters of Heaven, the king who the sanctuaries of the great Gods new-made ; in the day when ISHTAR, who maketh his tokens good, delivered SHumir and ACCAD unto his sovereignty, (when) prostrate into his hands she delivered them; for Ishtar his Beloved (in) Zari-unuki, the city of he: Ladyship, li-Za-kalama (The House of the Life of the Land) her beloved House he buitt."
